PREFACE

THE languages spoken on the North-Western Frontier of India-in Laghman, Kafiristan, the Indus Kohistan, Chitral, Gilgit, and Kashmir-are very little known. In preparing the chapters dealing with them in the Linguistic Survey of India, I was met by a difficulty of classification. I was unable to satisfy myself as to whether they were of Indian or Eranian origin. The present work is an attempt to solve this question. It will be observed that I have come to the conclusion that these languages, which I group together under the name of 'Modern Paiśācī,' form a third, independent, branch of the great Aryan family, and that they are neither Eranian nor Indian, but something between They seem to have left the parent stem after the both. Indo-Aryan languages, but before all the typical Eranian characteristics, which we meet in the Avesta, had become developed.

As regards the internal grouping of the languages of this family, it will be seen that my arrangement closely agrees with that of Professor E. Kuhn in his article *Die Verwandtschaftsverhältnisse der Hinduknsh Dialekte*, on p. 29 *et seq.*, of the *Album Kern*. When that article first appeared I was not prepared to agree with it in all respects, but the further researches made by me in the preparation

iii

2094086

PREFACE

of this volume, have shown me that when I ventured to differ from that distinguished scholar he was right and I was wrong. On the other hand, the additional information contained in these pages will, I think, show Professor Kuhn that the languages of the Dard Group are more nearly connected to the Kāfir languages than he has hitherto admitted. Some of the resemblances between Kāśmīrī and Veron are very striking.

I trust that materials herein contained will assist scholars in the interpretation of the inscriptions found in the localities where these languages are or were once spoken. They have already thrown considerable light on the diction of the Shāhbāzgarhī inscription of Asōka.

GEORGE A. GRIERSON.

CAMBERLEY.

THE PIŚĀCA LANGUAGES OF NORTH-WESTERN INDIA

PART I

GENERAL ACCOUNT

CHAPTER I

INTRODUCTORY

PROFESSOR PISCHEL has described the main peculiarities of Paiśācī Prakrit and of its sub-dialect, Cūlikā-Paiśācikā, on pp. 27 ff. of his Prakrit Grammar. He considers Paišācī to be an independent dialect of North-Western India, and draws attention to points of agreement between it, Dard, Kāfir, and Romany. Miklosich¹ had already noticed the apparent connexion between Dard and Gipsy in 1874, and Pischel² had so early as 1883 suggested the relationship of these with Paišācī. He lays stress on the facts that not only are there phonetic coincidences, but that also the lost Paišācī work, the *Brhatkathā*, was particularly popular in Kaśmīr, and had been paraphrased by Sōmadēva and Kṣēmēndra, both of whom were Kāśmīrīs.³

¹ Beiträge zur Kenntniss der Zigeunermundarten, I., II. (Vienna, 1874), pp. 15 ff.; IV. (Vienna, 1878), p. 51. Compare also the same author's Über die Mundarten und die Wanderungen der Zigeuner Europa's, IV. (Vienna, 1879), p. 4.

² Deutsche Rundschau, xxxvi. (Berlin, 1883), p. 368.

³ Mr. Tawney informs me that the publication of Dr. Stein's translation of the $R\bar{a}jatarangin\bar{i}$ has shown him that the Kathāsaritsāgara,

To these coincidences may be added the Kaśmīr tradition preserved in the $N\bar{\imath}lamata \ Pur\bar{a}na.^1$ According to this, Kaśmīr was originally inhabited by Nāgas. Kaśyapa wished to introduce men, but the Nāgas objected. Kaśyapa then cursed them, and ordered them to dwell with Piśācas. Finally relenting, he arranged that the country should be inhabited during the six months of winter by Piśācas ' from an island in the sand-ocean, six $y\bar{\imath}janas$ long,' and that men should then slay the Piśācas, and dwell in the land for the rest of the year. At the commencement of winter the men were again to emigrate, and leave the country to a new set of Piśācas. After four *yugas*, a Brāhmaņ, Candra-dēva by name, learned certain rites which delivered the country not only from Piśācas, but also from excessive cold in winter.

If there is any truth at the bottom of this legend, the Piśācas must have been hardy northerners, accustomed to cold. At the present day the country to the north of Kaśmīr, with Gilgit for its centre, is inhabited by Šīns (Dards), and the legend points to a long contest between them and the 'men'—*i.e.*, immigrants from India—for the possession of the Happy Valley. This entirely accords with the linguistic conditions at the present day. The language of the Šīns, or Šīnā, is one of those which Pischel has connected with Paiśācī. The Kāśmīrī language itself, though in the main Indian in character, has at its base a considerable Šīnā vocabulary. The commonest words, such as those for 'father,' 'mother,' 'I,' 'thou,' are of Šīnā, not Indian, origin.

In the following pages an attempt is made to compare all these languages with each other, and to test their

the well-known Sanskrit version of the $B_chatkath\bar{a}$, exhibits an intimate knowledge of the geography of Kaśmir.

¹ Cf. Bühler, Detailed Report of a Tour in Search of Sanskrit MSS. made in Kaśmīr..., J.R.A.S., Bo., 1877. Also, see Index to Dr. Stein's translation of the $R\bar{n}ja$ -taraṅgiņī, s.v. Piśāca. By tradition, Piśācas were eaters of raw flesh, and cannibals. Regarding cannibal legends in the modern Piśāca country, see the present writer's Piśāca $= `\Omega\mu o\phi \acute{a}\gamma os$, in J.R.A.S., 1905, pp. 285 ff. alleged relationship with Paiśācī. I think that I am justified in saying that nearly every characteristic of that form of speech, as recorded by the Prakrit grammarians, is present in them. I therefore consider myself justified in classing them together under the name of 'Modern Paiśācī.' I also endeavour to give materials sufficient to enable us to decide as to their position in regard to other Aryan languages.

While we meet frequent instances of phonetic conditions which can only be paralleled in Indian languages, we also meet others which are equally distinctively Eranian. Such are the changes of d > l (only occasional in India); of dv > d(ditto); of sk > c; and the preservation of consonantal groups having a sibilant for the first member. At the same time, there are certain typical Eranian modifications which are entirely wanting in Modern Paiśācī. For instance, there is no example of the Avesta change of Aryan sm to hm.

On the other hand, they possess marked phonetic characteristics of their own. Such are the regular retention of unprotected medial consonants and the frequent hardening of sonants; the tendency to aspirate a final surd, and, at the same time, the entire absence of sonant aspirates; the retention of a short vowel before a simplified conjunct consonant; the probable non-existence of any distinction between cerebral and dental consonants; the change of medial t > r; the peculiar and characteristic treatment of the letter r; the frequent palatalization of original gutturals, cerebrals, and dentals, and even of l; and the treatment of conjunct consonants, such as tr, tm > t, ty > t, and sm> sp or s.

In regard to accidence there is the same uncertainty. Some of the grammatical forms are peculiar to Modern Paiśācī, others can best be explained from Eranian, and others from Indian analogies. Attention will be drawn to these in the proper place.

In vocabulary, again, while nearly the whole is Aryan, 1-2

one half is strikingly Eranian, and the other half equally strikingly Indian. Most of the few non-Aryan words can be traced to the Burušaskī spoken in Hunza-Nagar. Such, for instance, is the group of words meaning 'iron.' We are thus led to the suggestion that the Nāgas, who are said to have preceded the Piśācas as the aboriginal inhabitants of Kaśmīr, may have been representatives of this tribe.

Although these languages show affinities with both Indian and Eranian, they cannot be called mixed forms of speech. The twofold affinity is part of their essence, and exists alike in phonetics, in grammar, and in vocabulary. It is not a mere instance of word-borrowing.

We are therefore driven to the conclusion that the Modern Paisáci languages are neither of Indian nor of Eranian origin, but form a third branch of the Aryan stock, which separated from the parent stem after the branching forth of the original of the Indian languages, but before the Eranian languages had developed all their peculiar characteristics. After the separation, the inaccessible home in which their speakers settled, and the inhospitality alike of the country and of its inhabitants kept them apart, and very fairly preserved the languages from contamination by those of allied The country in which the Piśācas settled was origin. apparently originally inhabited by the ancestors of the present speakers of Burušaskī, whom they expelled or absorbed. Only on this theory can I explain the linguistic phenomena which present themselves.

We may here note that these Piśācas sent colonies into the Panjāb proper, along the lower course of the Indus. They settled in the Kēkaya country—*i.e.*, the Western Panjāb—and in the Vrācada country, or Sindh. The modern vernaculars of these countries at the present day, Lahndā and Sindhī, have some of the characteristics of Modern Paišācī. Such are the preservation of a medial unprotected t, the absence of compensatory lengthening, the interchange of cerebrals and dentals, and some of the pronominal forms. These languages are, however, in other respects purely Indian. There are also striking coincidences between Modern Paiśācī and the language of the Shāhbāzgarhī inscription of Asōka.¹

The Eranian languages with which Modern Paiśācī most closely agrees are those non Persian East-Eranian speeches known as Ghalcah (properly 'Talcah') spoken in the Pāmirs immediately to the north of the Piśāca country, and Paštō. There are only occasional instances of agreement with Persian as against non-Persian. Such is the change of dv to d.

The Modern Paiśācī languages dealt with in the following pages are as follows:

Kāfir, or Western, Group:

Bašgalī. Wai-alā. Veron, Presun, or Wasĭ-veri. Pašai.² Gawar-bati. Kalāšā. Khō-wār (strictly χō-wār) or Citrālī. Dard, or Eastern, Group : Šīnā. Kāšmīrī.

Gārwī.

Maiyā.

These fall into the above three well-defined groups. Of the Kāfir languages, Bašgalī, Wai-alā, and Veron are the purest. There is another Kāfir language, named Aškund, about which nothing is yet known except the name. The three remaining have fallen somewhat under the influences of neighbouring forms of speech—Pašai under that of Paštō,

¹ See my Linguistic Relationship of the Shāhbāzgarhī Inscription, J.R.A.S., 1904, pp. 725 ff.

² Dr. Hoernle has suggested to me that the word 'Pasai' may be a modern form of 'Pisāca.' I have no historical reason for connecting these words, but the following pages will show that the derivation is, speaking from the point of view of phonetics, quite possible.

Kalāšā under that of Khō-wār, and Gawar-bati under those of Khō-war and Gārwī. The only true member of the Dard group is Šīnā. The others are now Indian languages, having succumbed to the Sanskritizing influence of their powerful neighbours in the immediate south. Their basis is, however, Dard, and they frequently offer instances of typical Paisaci characteristics. Garwi and Maiya are two dialects selected from several which are together grouped elsewhere under the name of Köhistäni. Khö-wär occupies an intermediate, and somewhat independent, position. It often shows striking points of agreement with the Ghalcah languages. Of the Kāfir languages, Veron is interesting as showing more signs of agreement with Eranian languages (e.g., the regular change of d to l) and with Cūlikā-Paiśācikā (e.g., the change of b to p) than do the others. It is also noteworthy that in several points (e.g., the aspiration of afinal surd) it agrees with Kāśmīrī.

The localities in which the various languages are spoken are shown in the map prefixed to this volume.¹

The present work consists of two parts. The first gives a brief general account of the phonetic system, and describes the accidence of each language in some detail. This is followed by a comparative vocabulary of selected words. The second part deals with the phonetic side of the question in considerable detail, discussing every phonetic phenomenon which has come under my notice.

Though I have quoted Avesta and Sanskrit words with great freedom in suggesting derivations, I in no way suggest that any word is derived from an old Eranian or Sanskrit original. I only quote them as showing the most nearly related ancient Aryan form, to whichever branch it may happen to belong. I trust that this will be clearly understood. I never derive from either Avesta or Sanskrit.

¹ Minor forms of speech, connected with Pašai and Gārwī respectively, are Tirāhī once spoken in the Tirāh country, now inhabited by the Afrīdīs, and Dīrī of Dīr. I have not included these in the above list, as I have very little to say about them. I only compare, although it may sometimes happen that for the sake of brevity of language I employ words which are often used elsewhere to suggest derivation. Derivations can only be made from the old Aryan language from which the speeches of the Avesta and Sanskrit are both sprung, and I have purposely abstained from reconstructing such a language. That every derivation proposed by me will meet with acceptance I do not expect, and I shall be the first to welcome corrections. But I think I may assume that, taken as a whole, my explanations amply prove the existence of the state of affairs which I have suggested in the preceding pages.

CHAPTER II

PAIŚĀCĪ AND CŪLIKĀ-PAIŚĀCIKĀ

BEFORE proceeding to the subject proper, I give an account of Paiśācī and Cūlikā-Paiśācikā, based on the rules given by Hēma-candra.

In describing Paisacī Prakrit, Hēma-candra takes Saurascnī Prakrit (a North-Western dialect) as his starting-point, and points out the particulars in which it differs from that dialect (IV., 323). In many respects Paisācī represents an older stage of phonetic development than does Sauraseni, just as the latter represents an older stage than does Māhārāstrī. As a convenient example we may quote the treatment of the letter t. Paisācī retains a medial Sanskrit t unchanged ; Saurasēnī weakens it to d, while Māhārāstrī elides it altogether. Paisaci, indeed, carries the preference for hard consonants so far that it hardens an original d to t, and this preference is carried to an extreme in $C\bar{u}$ likā-Paiśācikā, in which all soft consonants are hardened. It is necessary to add that Hema-candra (iv. 327) states that according to some authorities Cūlika-Paiśācikā does not harden soft consonants when they are initial or conjunct. Vararuci (x. 3) knows only one Paisaci, which in its main features agrees with this second variety of Hēma-candra's Cūlikā-Paiśācikā. It is of importance to bear this fact in mind throughout the analysis of Paisacī given below; as, to save repetition, I shall not refer to it again, confining my remarks, so far as Cūlikā-Paiśācikā is concerned, to Hēmacandra's first variety.

The following are, according to Hēma-candra, the points

in which Paiśācī (including Cūlikā-Paiśācikā) differs from Māhārāṣṭrī Prakrit in its treatment of Sanskrit words. I take Māhārāṣṭrī as the standard, as this is better known than Śaurasēnī. As my authority, I quote the sātras in the grammar of Hēma-candra. Unless otherwise stated, the sātras quoted are all taken from the fourth book. Forms marked with an asterisk are inferences from his rules, and are not specific quotations.

A. Phonetics :

The only vowel change noted by Hēma-candra is that of *r* to *i* in *-tisa* for *-dyśa* (317). On the other hand, in *tațțhāna* for *drstcā* or, rather, *darstcāna(m), it has apparently become *a* (313), but *tițțha* = *drsta*.

The consonants k, g, c, j, t, d, p, g, and v, when medial, are not elided, as is usual in Mh. (324; I., 177). Similarly, medial kh, gh, th, dh, and bh do not become h (324; I., 187).

k remains unchanged even when medial, and does not become g, as sometimes in Mh. (324; I., 177, 182). kidoes not become ci (324; I., 183). Thus, makara: *marakata, not maragaya; *kirāta, not cilāa.

kh remains unchanged even when medial (324; I., 187). Thus, *sukha, not suha.

g remains unchanged even when medial (324; I., 177). Thus, sugara, not saara. In C.-Paiś., however, g becomes k (325). Thus, nakara for nagara.

gh remains unchanged even when medial (324 : I., 187). Thus, $*m\bar{c}gha$, not $m\bar{c}ha$. In C.-Paiś., however, gh becomes kh. Thus, $m\bar{c}kha$ (325).

c remains unchanged even when medial (324; I., 177). Thus, vacana, not vaana.

ch (cch) follows the usual Prakrit custom (323; 286).

j remains unchanged even when medial (324; 1., 177). Thus, *gaja, not gaa. In C.-Paiś., however, *j* becomes *c* (325). Thus, $r\bar{a}j\bar{a}$ becomes $r\bar{a}c\bar{a}$.

jā becomes āù, not au or jį (303). Thus, pañūā for prajūā; saūnā for samjūā; savraīnā for sarrajūa; nāna for $j\tilde{n}\bar{a}na$. The last example shows that at the commencement of a word $\tilde{n}\tilde{n}$ becomes \tilde{n} . In the declension of $r\bar{a}jan$, a king, $j\tilde{n}$ optionally becomes $ci\tilde{n}$. Thus, gen. $ra\tilde{n}\tilde{n}\bar{o}$ or $r\bar{a}ci\tilde{n}\bar{o}$ (304).

jh follows the usual Prakrit custom, but in C.-Paiś. it becomes *ch* (323; 286; 325). Thus, C.-Paiś., *cacchara*, as compared with Mh., Ś., Paiś., *jhajjhara*, Skr., *jharjhara*.

t remains unchanged (324; I., 195). Thus, **nața*, not *nața*. The syllable *tu* may optionally become *tu* in *kuțumba* or *kutumba* (311).

d remains unchanged (324; I., 202). Thus, *garuda, not garula. In C.-Paiś., however, d becomes t (325). Thus, tatatāka for tadāga.

dh follows the usual Prakrit custom, but in C.-Paiś. it becomes th (323; 286; 325). Thus, C.-Paiś., $k\bar{a}tha$, as compared with Skr. $g\bar{a}dha$.

n always becomes n (306). Thus, guna-gana-jutta for guna-gana-yukta.

ųy becomes $\tilde{n}\tilde{n}$ (305), not *ųų*. Thus, *pu\tilde{n}\tilde{n}a*, not *puųųa*, for *puųya*.

t remains unchanged even when medial (307), and does not become d as in \hat{S} . (260), nor is it elided as in Mh. (I., 177). Thus bhagaratī; parratī for pārratī; satam for śatam.

th remains unchanged even when medial (324; I., 187). It does not optionally change to dh, as in S. (267). Thus, $*n\bar{a}tha$, not $n\bar{a}ha$ or $y\bar{a}dha$.

d becomes t even after n (307); it is not elided, when medial, as in Mh. (I., 177). Thus, matana for madana; tāmōtara for dāmōdara. A good example in C.-Paiś. is kamtappa for kandarpa (325). In numerals d does not become r (324; I., 219); 'eleven' is therefore $*\bar{e}k\bar{a}tasa$, not $\bar{e}\bar{a}raha$, for $\bar{e}k\bar{a}daśa$. Cf. Shb. badaya, twelve; tidaśa, thirteen.

dh remains unchanged even when medial (324; I., 187), but in C.-Paiś. it becomes th (325). Thus Paiś. ayudha; C.-Paiś. mathura for madhura; $th\bar{u}l\bar{i}$ for $dh\bar{u}l\bar{i}$. *n* remains unchanged; it does not become *n* (306). Thus, *gunēna* for *guņēna*; *matana* for *madana*; *natthūna*, having destroyed.

ny becomes ññ (305). Thus, kaññakā for kanyakā : abhimaññā for abhimanyu.

p, even when medial, remains unchanged, and does not become r (324; I., 177, 231). Thus, $p\bar{a}pa$, not $p\bar{a}va$.

ph, even when medial, remains unchanged, and does not become bh or h (324; I., 236). Saphala thus becomes *saphala, and does not become sabhala or sahala.

b remains unchanged even when medial, and does not become v (324: I., 237). We thus get $b\bar{a}|aka$, a child: and sabala, not savala, for sabala. In C.-Pais, however, *b* becomes p (325). Thus, $p\bar{a}|aka$ for $b\bar{a}|aka$.

bh remains unchanged even when medial, and does not become h (324; I., 187). Thus we get sobhana, not sohana; bhāriyā for bhāryā. In Ś. (269) the bh in bhavati is optionally retained, so that we can have either bhōdi or hōdi. According to H.-c., we ought to have only bhōti in Paiś., but one of the examples of 319 is hōti, not bhōti. On the other hand, 318 gives bhoti. In C.-Paiś. bh becomes ph (325). Thus, raphasa for rabhasa; ramphā for rambhā; phakavatī for bhagavatī.

m remains unchanged. It is not changed to \sim as sometimes occurs in Prakrit (324; I., 178). Thus, *matana* for *madana*; *ramati*.

y remains unchanged. It does not become j (324; I., 177, 245). Thus, payacchasē for prayacchasē; yati for yadi. In this connexion it may be mentioned that S. $jj\bar{e}ra$ is represented by $yg\bar{e}ra$ (e.g., 321). The word hydaya becomes hitapaka in Paiś. H.-c. (310) explains this by saying that y is changed to p. Concerning the compound ry see below.

r remains unchanged. It is not liable to change to l, as often occurs in Prakrit (324; I., 254). Thus, $t\bar{c}vara$ for $d\bar{c}vara$; $r\bar{a}ci\tilde{n}\bar{a}$, by a king. In C.-Paiś., however, r may optionally be changed to l. Thus, $g\bar{o}r\bar{i}$ or $g\bar{o}l\bar{i}$ (sic) for gaur \bar{i} ; ludda or rudda for rudra (326).

ry is either changed to jj, as in \hat{S} ., or is sometimes retained under the form of riy (314, 266). I have not noted any instances of the alleged optional \hat{S} . change to yy, although \hat{S} . has optionally ry corresponding to Pais. riy (266). Examples are sujja for $s\bar{u}rya$; $bh\bar{a}riy\bar{a}$ for $bh\bar{a}ry\bar{a}$.

rv becomes, as in Mh., rv. Thus, savvassa for savvasya (316). I have not met any change corresponding to the S. purava for $p\bar{u}rva$ (270).

l becomes l (308). Thus, $s\bar{l}a$ for $s\bar{s}la$, kula, jala, salila. This rule does not apply to the l resultant from r in C.-Pais. (326), or to ll (ucchallamiti, 326).

r remains unchanged (324; I., 177). Thus, têvara for dêvara.

ś becomes s (309). Thus, söbhati, sasī for śaśī, sakka for śakra, samkha for śakła. The ordinary rule is therefore followed.

s also becomes s, as in Mh. (309). Thus, visama, visāna for risāna. In the word for 'six,' s does not become ch, as in Mh. (324; I., 265). Thus, 'sixth' would be *saitha, not chattha. So also for the other words mentioned in I., 265.

st usually becomes th, but is sometimes retained under the form of sata (314). Thus, tittha for dysta; kasata for kasta. It becomes th or th in gerundives (313). Thus, natthūna or natthūna for nastvā; tatthūna or tatthūna for dystvā.

sn is retained, but a vowel is inserted between the two members of the compound, as is sometimes the case with ry and st (314). Thus, sināta for snāta, sunusā for snuṣā.

B. Accidence :

The accidence of Paiśācī closely follows that of Śaurascnī, allowance being made for the phonetic system of the former. H.-c. accordingly gives very little direct information on the subject. What he says is as follows:

The suffix of the ablative of nouns with *a*-bases is $\bar{a}to$ or $\bar{a}tu$ (321). Thus, $t\bar{a}ra$ ca $t\bar{i}e$ $t\bar{a}ra\bar{t}o$ $yy\bar{e}ra$ $ti!!h\bar{o}$ —i.e., $t\bar{a}rac$ ca $tay\bar{a}$ $d\bar{a}r\bar{a}d$ $\bar{e}ra$ d y!!tah; $tum\bar{a}to$ or $tum\bar{a}tu$, from you; mamāto

or mamātu, from me. Compare the S. ablative in $\bar{a}do$, $\bar{a}du$ (276).

As shown above, the ablative singular of the first two personal pronouns is *mamāto* or *mamātu*, and *tumāto* or *tumātu*.

The instrumental singular of the pronouns *tad* and *idam* is (masc. and neut.) $u\bar{e}na$, (fem.) $n\bar{a}\bar{e}$ (322, a different base).

In the conjugation of verbs, the 3rd sg. parasmaipada and $\bar{a}tman\bar{c}pada$ both end in ti (318). Thus, $bh\bar{o}ti$, $n\bar{c}ti$, $t\bar{c}ti$, from roots $bh\bar{n}$, $n\bar{i}$, and $d\bar{a}$ respectively. But when the conjugational base ends in a, the termination may be either ti or $t\bar{e}$ (319). Thus, lapati or lapat \bar{c} , acchati or acchat \bar{c} , gacchati or gacchat \bar{e} , ramati or ramat \bar{e} . This is a reproduction of the corresponding rules for S. (273, 274), with the Pais, preservation of t.

In the third person singular of the future of both voices, the termination $\bar{c}yya$ (*i.e.*, the optative) is substituted (320). Thus, tain tatthūna cinititain raūūā kā ēsā hurēyya—*i.e.*, tāin drstvā cinitiain rājūā kaisā bharēt. Here bharēt is used for bharisyati. So H.-c., but the example is not convincing.

The gerundive ends in $t\bar{u}na$ (312), corresponding to the S. $d\bar{u}na$ (271). Thus, $gaint\bar{u}na$ for $gatc\bar{a}$, $raint\bar{u}na$ for $ratr\bar{a}$, hasit $\bar{u}na$ for hasit $c\bar{a}$, $pathit\bar{u}na$ for pathitra, kathit $\bar{u}na$ for kathitr \bar{a} . When, however, the gerundive originally ended in str \bar{a} , this becomes $tth\bar{u}na$ or $tth\bar{u}na$ (313). Thus, $natth\bar{u}na$ or $natth\bar{u}na$ for $nastr\bar{a}$, $tatth\bar{u}na$ or $tatth\bar{u}na$ for $drstr\bar{a}$.

The suffix of the passive is *iyya* (315). Thus, *giyyatē* for $g\bar{\imath}yat\bar{e}$, *diyyatē* for $d\bar{\imath}yat\bar{e}$, *ramiyyatē* for *ramyatē*, *paṭhiyyatē* for *paṭhyatē*. The passive of the \checkmark kar, do, is, however, kīratē (316).

CHAPTER III

PHONETIC SYSTEM

The alphabet of modern Paiśācī is as follows :

 a, \bar{a}, a (as in 'all'), $i, \bar{i}, u, \bar{u}, e, \bar{e}, ai, o, \bar{o}, au, oi$ (as in 'oil').

~ (the nasal sound. May be placed over any vowel.)

k, kh, χ (Prs. $\dot{\epsilon}$), g, γ (Prs. $\dot{\epsilon}$), n (= \dot{n}).

c, ch, j, z, \check{z} (=Prs. \mathring{j}), n (= \hat{n}).

 \check{e} (= ts), $\check{e}h, \check{j}$ (= dz), n.

t, th, d, r, n (strongly cerebralized. Pronounced $\sim r$ as in Pš.).

t, th, θ (= Arabic ث), d, δ (Prs. $\dot{\zeta}$), n.

p, ph, f, b, m.

y, r, l, v, w.

š, s, h.

Of the above, the existence of t, th, and d is doubtful. See below. The letters are written in the order adopted by me for index purposes. I have placed z and z with the palatals, instead of among the spirants, on account of their close connexion with j. I have followed Gray in adopting c, ch, and j for the pure palatals, and \check{c} , $\check{c}h$, and \check{j} for their corresponding affricate, thus reversing the ordinary German custom. In Kš. a dot is placed under a vowel epenthetically affected by the vowel of the following syllable. In the same language and elsewhere half-pronounced vowels are written above the line. Thus, $m \check{a} r a n^u$. The Skr. \exists is transliterated g. The cerebral \exists is transliterated \dot{r} . An acute accent indicates the stress-syllable.

In the following brief sketch of the phonetics I have given no examples. These will be found in Part II. of the work. With regard to the vowels, there is plenty of evidence as to changes of quantity, but this must be received with caution. The words were not collected by trained observers, and, except in the cases of K^s. and P., the diacritical marks were often omitted. It is, therefore, always possible that a vowel shown as short is really long. So far as materials are available, I have done my best to check all the quantities, but the checking has not been so thorough as I should wish.

Changes of quality are common. Here we are on firmer ground. The vowel a can become i or e, and u or o. The latter change is very frequent, except in P., and generally takes place through the sound a, which is often heard in East Eranian languages. The change to the palatal series is commonly due to epenthesis.

When a compound consonant is simplified, a preceding short vowel is sometimes lengthened in compensation, but usually remains unchanged. Many examples will be found in the following pages. A good one is the set of words for 'camel' (see Part II., § 20). This avoidance of compensation may be considered as typical of these languages, and also occurs in the extreme North-Western Indo-Aryan languages Lahndā and Sindhī.

Aphæresis and syncope both occur. The latter is most common in B., where it gives rise to some curious combinations of consonants at the beginning of a word.

Prothesis, both of a and i, is not unfrequent, not only to aid the pronunciation of an initial compound consonant, but also before simple consonants where no aid to pronunciation is necessary. In the purest Kāfir languages (B., W., and V.), i or y is often inserted in the middle of a word before u, just as some English people pronounce the word 'Lucy,' Lyucy.'

Other vowel changes are made in the same group of languages for the sake of euphony. I have detected signs of consonantal *saudhi* in B., but have not sufficient materials to discover its principles. On this point I may quote the following extract from the preface to Colonel Davidson's Notes on the Bashgalī $(K\bar{a}/hr)$ Language :¹

'Many letters are interchangeable, thus z = j or \check{c} , as $z\bar{\iota}m$, $j\bar{\iota}m, \, \epsilon\bar{\iota}m, \, \mathrm{snow}; \, j = \xi \, \mathrm{or} \, c, \, \mathrm{as} \, manj\bar{\iota}, \, manc\bar{\iota}, \, \mathrm{man}; \, j\bar{a}rlm,$ żārlm, I will kill. Letters are often transposed, as bagrām, bargām; katrawor, kartawor; brobur, barābar, borbur. In words such as $p \leq tarak$ the p is often dispensed with. For the sake of euphony and scansion, words undergo a great variety of changes. Thus, "a man" may be manjī, mancī, $m\bar{o}\check{s}$, $moc\bar{i}$, and even $mun\check{s}\bar{i}$; "very much" may be bluk, biluk, biliuk, biluy; "good" or "well" is le, les, lest, lesta. Short vowels are sometimes lengthened, and long ones shortened; sometimes a syllable is dropped, and at other times one is inserted; thus, "female" may be stri, štri, štārī, ištrī; for "to-day" may be pštarak, štarak, štak, stak, stag; "for the sake of," $duga{\tilde{a}}, ga{\tilde{a}}, tk{\tilde{a}}, k{\tilde{\tilde{e}}}, d{\tilde{\tilde{e}}}$; for "he " or "it is" there are at least ten words, and for "he" or "it becomes," at least six words.

'In very many words I found it impossible to decide whether the vowels should be long or short, whether certain vowels should be nasalized or not, and whether, in certain words, the r and t should be hard [*i.e.*, cerebral] or not. Great varieties of pronunciation were met with.'

The above remarks apply to all the Kāfir languages which I have examined, so that it must be understood that at present it is not possible to obtain more than an approximate idea of their phonetic systems.

In Kaśmīr there is a similar uncertainty in the pronunciation of the vowels. Even paṇḍits, when speaking Sanskrit, pronounce medial and initial *i* as *e* or *ye*, and final *i* and $\bar{\imath}$ as a German *ü*. In their mouths the sound of *u* approaches that of \bar{o} or *o*, while, on the other hand, *e* is pronounced like *i*, $\bar{\imath}$ or $\check{e}\check{\imath}$, and \bar{o} is with difficulty distinguished from \bar{u} . See Bühler's *Detailed Report*, already quoted on p. 2, pp. 25, 26.

¹ I have altered the transliteration of this extract to make it agree with that employed in the following pages.

When competent observers have drawn attention to the indefinite character of the vowel-scale in Bašgalī and Kāśmīrī, it will be readily understood that the same state of affairs exists in the other Modern Paišācī languages.

With regard to consonants, surds, whether aspirated or not, generally remain unchanged. There are, however, some special rules for particular languages.

When a word in V. or K5. ends in an unaspirated surd consonant, the latter is always aspirated. Thus, final k > hh, final c > ch, final t > th, final t > th, and final p > ph. There are occasional instances of the same law elsewhere.

A palatal vowel or semi-vowel following a consonant often palatalizes it. This is the regular rule in Kś. Thus, in that language, where so situated,

 $\begin{aligned} k &> c \text{ (so also in W.).} \\ kh &> ch \text{ [so also even without a palatal following, V. and W.} \\ &\quad (> \hat{s}), \dot{S}. (> c, \tilde{z}) \text{].} \\ y &> j \text{ (or in B., V., and G. } \tilde{z}, \tilde{s}, \tilde{r}). \\ t &> c. \\ th &> ch. \\ d &> j. \\ t &> \tilde{c} \text{ (also in B. and V., and } \tilde{c}h \text{ in W.).} \\ th &> \tilde{c}h. \\ d &> z \text{ (also j in B., W., and Kh., and } \tilde{z} \text{ in B., Kh., and } \dot{S}.). \end{aligned}$

None of these languages have any sonant aspirates (gh, jh, dh, or bh), except in one or two borrowed words. They are always disaspirated, and often further weakened. This is typical.

As in Shb., cerebral and dental mutes appear to be interchangeable. So far as I can ascertain, in all the languages except Kś. (which is strongly Sanskritized), P. (which is subject to the influence of its neighbour Pš.), and to a less extent the semi-Indian Gār. and M., there is no real distinction between these two classes of mutes, and there is only one class, as in Eranian—a semi-cerebral. The available materials were all collected by persons educated according to Indian sound-ideas, and in recording these

semi-cerebral sounds they came under the influence of the personal equation. To some these sounds appeared to be cerebrals, and were recorded as such; and to others they appeared to be dentals, and were recorded as such. I have in my possession two closely-agreeing versions of the parable of the Prodigal Son, recorded in Gilgit Š. by two independent observers. Identical words occurring in each are quite frequently recorded with cerebral letters by one and with dental letters by the other. This was not due to carelessness, for in other respects the texts were most carefully written. In the following pages cerebrals and dentals have been written as they were found in the materials supplied, but it should be remembered that in most of the languages it is very doubtful if there is any distinction at all. Cerebrals are entirely ignored both by General Biddulph and by Dr. Leitner in their accounts of these languages.

In V., Š., and M., when the k-suffix comes between two vowels it is weakened to -g-, and in Kh. it is further weakened to $-\gamma$ -. In one instance (K. $gro < kr\bar{o}da$) kr > gr.

The letter k is sometimes elided at the beginning of a word.

Kh usually remains unchanged, except in Kāfir, where it is disaspirated. When final, in V., it of course remains unchanged.

The letter c is sometimes changed to the corresponding affricata \check{c} , and in Kāfir is liable to be further weakened to \check{s} and \check{z} .

In Kh. medial t regularly becomes r, and, as this occurs in the third person singular of verbs, the change is very frequent. A final t is often apocopated in the other languages, but not in Kh.

The letter p follows the Indian custom in the Eastern languages, and becomes b or w. In Käfir p sometimes becomes k before t or \check{c} .

We have seen that in Ks. th is liable to be palatalized to ch. In Gar. and M., on the other hand, c or ch becomes

th in words of S. origin. When *ch* is derived from *kh*, it is sometimes further weakened to \sharp or \sharp in Käfir.

As regards sonant letters, they, too, are often retained, but examples are wanting for several medial letters. Initial g usually remains g, but, as in Eranian, in the Kāfir group there is a tendency to change it to ξ , \check{s} , or \check{c} .

Initial j and z are usually unchanged, but d (medial) becomes j or r.

The letter d usually remains unchanged, but in Kh. and Kāfir languages it is liable to become j under the influence of a following i. In such cases, in Kāfir, it is sometimes further changed to z or ξ . In V., d, whether initial or medial, regularly becomes l. The same change occasionally occurs elsewhere. This is a regular East Eranian change. Cf. the K ξ . change of l to j. I have not found any instance of the Pai ξ . change to t.

In Š. δ becomes θ or t. Compare the change of dh in C.-Paiś. In G. it becomes θl , and occasionally l elsewhere. The intermediate form θl is instructive.

When bh, according to the general rule, is disaspirated, it sometimes becomes b in the Eastern languages; but this letter is usually vocalized to $\bar{\sigma}$ or dropped.

Nasals, as a rule, are well preserved. In V. and Š. (and also once in B.) $\hat{n}g$ becomes g. Usually it remains as ngor becomes n. The palatal nasal \hat{n} alone shows a tendency to disappear. The dental n generally remains unchanged, but in the West there is a strong tendency to cerebralize it, when medial or final, to n, and thence to change it to \hat{r} or \hat{r} . M is very rarely changed to mb or b. In Kś. and V. it is elided in the word $kum\bar{a}ra$.

The letter y is sometimes retained, as in non-Persian Eranian, but is more generally vocalized to i or e.

The letter r undergoes many important changes, and here it will be necessary to consider the letter not only when it is standing alone, but also when it is in combination with other consonants. It is often preserved unchanged, though in the Kāfir dialects it frequently changes to r, whether an p or t or d follows it or not.

In quite a number of cases it shows an extraordinary readiness to become a palatal letter. This mainly occurs in \check{S} ., but is also found elsewhere. Thus in B r and z are occasionally interchangeable; in Š. r > z or j, and $jr > \tilde{z}$; tr and $\theta r > c$ in S., Gar., and M. (so in Ghalcah), > ch in V., $> \dot{s}$ in P., \dot{S} , and M., and $> \dot{z}$ in Š.; str > tr in Kś., > c or *ih* in Š., and > š in G., which is sharpened to s in Gar.; dr > z in B., and Š., and z in V.; br > jr or z in $S_{\cdot}, > z$ in M., and > j in Gar. With these we may compare the facts that in many Indian languages (and also in Kś., Gãr., and M.) tr often becomes (t)t or (t)th, and that in Modern Paisacī th and c, ch, are often interchanged. We may also compare the Ks. change of lfollowed by a palatal vowel or semivowel to j. It is noteworthy that in the Tibetan of Baltistan, immediately to the east of the Š. area, r sometimes apparently becomes \dot{s} . This tends to show that the palatalization of r was a peculiarity of the language spoken over the whole of this country before it was occupied by speakers of Paišācī or Tibetan.

We have said that r, standing alone, often remains unchanged. It also usually remains unchanged in the following: gr, tr, ndr, pr, br (Kāfir and Kh.), štr, str (K.). Kr becomes kr in K., and r > l in the following: gr > l(once in M.); tr also $> \theta l$, thl, lt or hl (in P. and G.); dr > l (once in M.); br > bl, l (P. and G.); str > šl, hl (P.). There is no example of the letter r, standing by itself, becoming l.

In the Kāfir languages, and also to a less extent elsewhere, r, whether medial or final, is very often elided. This occurs so frequently that it may be taken as typical of the whole family of languages. The only members in which I have not noticed it are Kh. and Kś.

Besides the above-mentioned compounds, the following instances occur of original compounds in which r is a final

member. We have seen that tr is usually either preserved or palatalized. In one case, in B., it is changed to tr, which is probably due only to the personal equation of the original scribe (see above).¹ In Kś. Gār. and M., the languages most under Indian influence, it is liable to become t or th. The G. and P. changes to θl , thl, hl, and lt, above quoted, are also noteworthy. Av. θr closely follows tr. It becomes r in Kh. and r in W., while in the word for 'brother' it is almost everywhere elided. Pr, when initial, is preserved except in V., where it becomes p. Br occasionally becomes b, w, or m, especially in the East. The only Western example is V. wag-ch, a brother. Although generally preserved, str is rarely changed to χ or k. The Indian compound str follows Indian analogies, and is represented by (t)th or (t)t.

In compounds of which r is the first member, there is (as in Shb.) a strong tendency to transfer the r to a preceding consonant. Thus, karya > K. $kr\delta$, parya > Kh. $pron, karma > \check{S}$. $krom, d\bar{v}rgha > K$. $dr\bar{v}ga$, and so on. Most often, however, the r is elided. Thus, ry generally becomes y or n in the East, and [r, r], or r, in the West. The compound rt follows the Eranian Pš. in becoming r, and so does rd in P. and G. In K. and Kh. rd remains unchanged, but elsewhere the r is dropped and d remains. $Rs > \check{s}$ or s, and $r\check{s}t > \check{s}t$ or t in the East, and $\check{s}l$, l, \check{s} , or \check{r} in the West. As usual, we need not lay any stress on the distinction between l and t.

The letter l usually remains unchanged, but is now and then changed to r or r. In Kś. it becomes j when followed by a palatal vowel or semivowel.

The treatment of v is uncertain. Sometimes it is retained as v or w, and sometimes it becomes b or m. In V. the resultant b is twice hardened to p (cf. C.-Paiś). When medial, v is very frequently changed to a labial vowel.

Except in B., V., P., and Ks., the sibilants Indian s and

¹ Compare, however, the Sindhī change of tr to tr, and the Vrācada Apabhramśa change of initial t to t.

Eranian \check{s} are both represented by \check{s} . In one dialect of P. it is regularly changed to χ (Cf. Pš. $\check{\chi}$), and this change is also observable in Kś., in which \check{s} , the suffix of the second person singular, has become kh. In B. and V., while \check{s} is sometimes retained, both \check{s} and \check{s} equally often appear as c, \check{c} , \check{z} , or even s. The change to s also occurs sporadically elsewhere. In K \check{s} . an Indian \check{s} is regularly represented by h.

The Indian *s* usually also appears as \check{s} , but in K \check{s} , when uncompounded, it appears as *h*. Indian or Eranian *s* generally remains unchanged, but in the Kāfir group it becomes \check{s} when followed by a palatal vowel. In K \check{s} , and \check{S} , it sometimes becomes *h*.

The letter h is generally retained, but in Ks. the secondary h, corresponding to s or s, again reverts to s when followed by a palatal vowel or semivowel.

Turning to compound consonants (except those containing an r, which have been already dealt with), attention may again be drawn to the rareness of compensatory lengthening. The double kk, as a rule, becomes k, but in the only instance noted in Š. it becomes nk. The frequent compound ks is generally represented by c in the West, and by ch in the East. In G. it is further changed to th. In other languages there are also other secondary changes. Av. $\chi s > s$, except in Kh., where we have ch.

We have seen that in V. v sometimes becomes p. Similarly, in that language cv > ps.

A very typical change is that of tm to t (as in Shb. and sometimes in India). Only in Kś. do we have the usual Indian change to p. As already stated, in Kś. $ty > \check{c}$. Elsewhere it becomes t, t, or th; never c, as in India. This change, together with the frequent preservation of tr, is quite typical of Mod. Paiś., and is foreign to Indian and Eranian.

Eranian θw becomes t, except in V., where, as in similar cases, we have p as the resultant.

The compound dx follows in the West the Indian and

non-Persian Eranian in becoming w or b, but in the East, and occasionally elsewhere, it follows Persian Eranian and becomes d. Except in the Käfir languages, nt generally becomes nd; but in Gär. and M. it is preserved in the present participle, and in Kš. in the same form it becomes n. In Käfir, nt > tt, or t.¹ The change to n is both Indian and Eranian.

The change of pt to t is the general one. The custom of Persian dialects (as distinguished from standard Prs.) and of most Indian languages is followed. B. and V. change it, in one word, to kt and to kt respectively.

As regards compounds with sibilants, sk becomes kh in Ks., and c in Kh. For the latter we may compare Av. sk > Ps. c.

The compound $\underline{s}t$ generally survives, though it sometimes becomes χ or k. So, in the Käfir group, Indian $\underline{s}t$ is represented by $\underline{s}t$ or $\underline{s}t$ (V. has once $\underline{s}t$); but in \underline{s} , it usually becomes $\underline{c}h$, \underline{s} , or $\underline{s}-t$ (cf. Pais. *kasata*), and in the other languages, on the Indian frontier, it becomes $(\underline{t})th$, $(\underline{t})t$, in the Indian fashion. In the Käfir group $\underline{s}t$ becomes again $\underline{s}t$ (with one occurrence, again, of $\underline{s}t$ in V.). In the East we have the Indian change to $(\underline{t})th$, $(\underline{t})t$. In P., G., K., and Kh., the $\underline{s}t$ is preserved. In one instance—in P.— $\underline{s}t$ has become r.

In the Kāfir group the resultant $\dot{s}t$, in all the above changes, is liable to a further secondary change to (s)s—a development which is also common in Eranian.

The compounds ξtr , g/r, and str have been dealt with under the head r. They closely follow the foregoing.

It will be observed that, except in the East, where the languages have come under Indian influence, the tendency is to preserve a sibilant plus dental under the form $\dot{s}t$ or st. This is Eranian, not Indian.

Forms in which p is the second member are Indian sp

¹ Note the typical change of *santi* to Käfir *ašt*. The group nt > t. Medial *a* has disappeared, and a prothetic *a* added before the compounded *št* (< st).

and Eranian s_P . Both are treated in the same manner, following Eranian, and not Indian, analogies. The latter generally, and the former always, becomes \check{s} , which may further become \check{c} or h. In B. and \check{S} ., however, s_P is retained, with a slight change, as \check{s}_P .

The treatment of sm by V. and Kh. is worthy of special notice. It is changed in Kh. to sp., and in V. is either retained or further weakened to s.

The compounds δy and sy are treated as we might expect, the sibilant in each case being palatalized in various ways. $\dot{Sl} > hl$, and the v of sva is changed to a vowel.

The compound hv becomes (b)bh on the Indian frontier, and b or p elsewhere. The change to p occurs in W. There is no instance noted of the compound in V., where we should expect a similar result.

Retention of Surds and Hardening of Sonants.-It will be remembered that the retention of surds and sonants is a prominent feature in Hēmacandra's Paišācī, and that the hardening of sonants is typical of Vararuci's Paiśāci and of Cūlikā-Paiśācikā. In Hēmacandra's Paiś., moreover, d > t. With one exception, all these are extremely frequent in the Modern Paisācī languages. We have instances of the retention of k, kh (disaspirated), q (only initial; no examples of non-initial), t, d (as p), t, d, dh, p, and b. We have also instances of the change of g > k, and b > p. I have not come across any instances of d > t, but there are good examples of the change of $\delta > \theta$. V., which more often agrees with C.-Paiś, than do the others, hardens dvto t in the word tar-ekh, a house. The various indexes to Part II. give the words of each language separately, and will enable the student to check these statements.

CHAPTER IV

NOMINAL SUFFIXES

k, kh, g, γ, ng, h

The termination k, which occurs both in Eranian and in Indian, is well known. It appears in the Ghalcah dialects under the forms of k or y and (in Yd.) (o)h, used both with substantives and with adjectives. It also occurs in the Wkh. infinitive, as well as in the Ormuri (Eranian) infinitive, in the original form of k, while in the Baloci infinitive it becomes q. It is frequent as a suffix added to Mod. Pais. nouns, and appears in several languages (viz., V., P., K., Kh., and Š.) as the suffix of the infinitive. In V., Š., and M. it is also (under the form q between vowels) used as a suffix of the past participle, while in P. the same participle retains the k. In one form of the present participle in B. it becomes q, but in the Kh. present participle it remains unchanged. It is not used as an infinitive suffix at the present day in any Indian language, though traces of it appear in the long \bar{a} of the Hindi infinitive and similar forms. As regards the infinitive, we may sum up the state of affairs by saying that the letter k survives in certain Eastern Eranian languages and in certain Modern Paisaci languages, but not in any Indian one.

It is a phonetic law of Ks. that when a word ends in a surd consonant, that consonant must be aspirated. It therefore follows that in this language the suffix k takes the form of kh. There are sporadic traces of the same law in other languages of the family, and it is applied with some consistency in V.

We have seen that in Eastern Eranian this suffix takes the forms k, g, and (o)h. In Modern Paiśācī I take the following terminations as derived from it—k, kh, g, γ , ng,¹ and h. The following are examples :

k.—This is frequent in K. There are also occasional instances in B., W., and P.

B. as-ke, he.

K. $gard\bar{o}$ -k, ass. Cf. $gurd\bar{o}$ - γ , below.

P. paš-k-in (double suffix), behind.

K. pachiy-ek, bird. Cf. n-suffix below.

K. phūš-ak, P. pīšō-nd-ik, pīšō-n-ak, cat (double suffix in P.).

K. ga-k, cow. Cf. th suffix below.

B. $j\bar{u}, ju-k$, daughter.

K. $p\bar{u}\check{s}$ -ik, flower.

W. coro-k, hair.

K. mastr-uk, P. maiy-ik, moon. Cf. kh below.

K. *u-k*, water. Cf. V. $\bar{a}v \cdot eh$, Kh. $\bar{u} \cdot \gamma$.

P. han-ik, struck, and so all past participles in P.

V. pesumti-n-ik, P. han-īk, K. ty-ek, Kh. d-ik, Ś. šid-oiki, to strike, and so all infinitives in these languages.

Kh. gan-ika, taking, and so all present participles in Kh.

kh.—This occurs only in V. and Kś. The pronunciation of V. *kh* is unknown. It may be the spirant χ . Besides V. and Kś., in one word Kh. has χ , the spirant, as an alternative for γ .

Kh. $gurd\bar{o}\cdot\chi$ or $gurd\bar{o}\cdot\gamma$, ass. Cf. K. $gard\bar{o}\cdot k$.

V. pši-kh, cat. Cf. K. phūš-ak, P. pīšō-µ-ak.

V. kiru-kh, keru-kh, dog.

V. an-ckh, fire.

V. war-ckh, tar-ekh, house.

V. mas-ekh, moon.

V. ištī-kh, Kś. tāru-kh, star.

V. isi-kh, sun.

V. luzu-kh, tongue.

In Ks. every final k becomes kh. See p. 31 of my *Essays* on $K\bar{a}cm\bar{i}r\bar{i}$ Grammar (also J. A. S. B., lxvi. [1897], Part I., p. 183).

 1 In GIP, $\rm J^2,$ 308, a termination ung is mentioned, which seems to have a different origin.

g.—Cf. GIP. I², 63. Only sporadic instances except in B., V., Š., and M. In every case the k was originally intervocalic, and in most cases is so at the present day.

M. da, da-g, back.

P. $g\bar{o}\dot{s}^{a}$ -g or $g\bar{o}\dot{s}i$ -ng, house.

V. but-og, share. Cf. ste-suffix, and n-suffix.

V. pesumti-ogo, Š. šid-ėgō, M. kut-ag-il (double suffix), struck. So for all past participles.

B. vīn-an or vīn-ag-an, striking, and so in all present participles in B.

In all these languages the termination is often dropped. γ .—This occurs only in Kh.

Kh. $gurd\delta$ - γ , or $gurd\delta$ - χ , ass. Cf. K. $gard\delta$ -k. Kh. \bar{a} - γ , water. Cf. K. u-k, V. $\bar{a}v$ -ch. Cf. also Mj. $yau \gamma \bar{a}$. Kh. hato- γo , to- γo , his. Cf. Ps. ha- γ ", he.

ng.—This is most frequent in P. There is also an example in Kh.

P. $g\bar{\sigma}$ - $l\bar{a}$ -ng, bull. Cf., however, Tibetan glang. P. $\bar{s}\bar{a}ri$ -ng, dog. Kh. $p\bar{\sigma}$ -ng, foot. P. $g\bar{\sigma}\bar{s}i$ -ng or $g\bar{\sigma}\bar{s}^{a}$ -g, house.

h.—This occurs only in B. and V., and is evidently a weakening of kh.

V. $\bar{a}v$ -ch, water; cf. K. u-k, Kh. \bar{a} - γ . V. ps-ch, what? B. wcz-ch, a she-goat.

ste, stai, stu, stha, st, sth, sa, s.

This termination is extremely common in a variety of functions. It is used—

To form nouns substantive, including infinitives. Thus, B. *bar-este*, a share; K., Kh. *au-us*, a day; Š. *ou-us*, a feast; B. *acān-asth*, *acān-asth*["], or *acān-aste*, to run; W. *viy-āsta*, Š. *kut-iste*, or *kut-istā*, to strike (the Š. form is peculiar to the dialect of Dāh Hanū).

To form adjectives, including past participles. In these cases the termination is usually dropped when the adjective or participle is employed attributively. Thus B. \tilde{i} , my,

 $\hat{\tau}$ -ste, mine; $l\bar{e} m \bar{o}c$, a good man; $am \bar{u} \ l\bar{e}$ -st ai, the house is good; W. $b\bar{o}$ -i, $b\bar{o}$ -sta, good. W. vin- \bar{a} , vin-asta, or vin-ista, Kh. pre-sta, struck.

As a sign of case. In B. it appears under the forms *stai*, *ste*, *st*, *s*, as the sign of the genitive and of the ablative, the two shorter forms being generally, but not exclusively, employed for the former. They are frequently dropped. Thus, *manci-ēst*, *mancī-s*, or *mancī*, of a man; *ušp-este*, of a horse; *pištrak-stai*, from to-day; *ništruk-ste*, from the first. In P., *stā* or *sā* (also frequently dropped) is a sign of the oblique form. Thus, *tāt-istā āntē*, to the father; *lāy-asā paškin*, after the brother. It is even used with plural nouns, as in *dōstān-ista-m miltin*, with my friends. So also in Š. the agent case ends in *-se*. The K. genitive in *as*, *cs* (*šā-as*, of a king; *mōc-cs*, of a man) perhaps belongs to this group.

As a verbal termination of the third person plural, it takes the form stai, sto, st, $ss\bar{\imath}$. This is a distinct group, with a different derivation, though similar in form. It will be considered under the head of verbs.

The origin of the nominal suffix is very obscure. We are tempted to compare the Prs. verbs ending in -istan, which Darmesteter and Horn consider to be the infinitive of the root as, be (GIP. I², 142), but which Salemann (ib. I¹, 308) maintains to be of unknown etymology. We may also compare the Prs. *durn-st*, which Horn (551) derives from Av. drra + sti- (cf. Av. $a\gamma \bar{o}sti$ -), or (especially for the past participle) forms like Skr. matta-, Prs. mast; Skr. rāddha-, Prs. rāst. It is possible that the st of the two last forms has been employed for other past participles by false analogy. The same participial termination is very common, both as st and as ss, in two of the Caspian Persian dialects (GIP. 12, 363, 364). Thus Gilaki, dānista, he knew; bi-šnavasta, he heard; ba-nmāsta, he showed; bafarmāsta, he ordered; būstch, he was; and Māzandarānī, fašanastīma, we spread out; ba-šnūssama, I heard, and so on.

It may be suggested that in these modern Paiśācī

languages this termination is possibly derived from sat, the present participle of the \sqrt{as} , be, with the very common syncope of the medial a. It will have been observed that in almost every case the suffix is joined very loosely to the nominal base, and can be omitted with little change of sense. Moreover, in more than one Indian language the present participle of the verb substantive is employed as a suffix of the ablative. A good example is the Bengali haïtē, which means 'from.' Similarly, in Kś. sand^u the same present participle is used as the suffix of the genitive.

št, šţ, ţh, ţ.

These may be connected with *ste*, or we may refer them to the Wkh. plural suffix *išt*, and the adjectival suffix *išt* found in Prs. dialects. See GIP. I², 314, 182, 211. The latter is probably connected with the Skr. -*isyut*-. Examples are:

Kh. pru-šţa, before; V. že-št, a bull.
V. gū-th, cow.; Gāc. bīra-th, a goat.
G. kham-ta, ear; čamu-ta, hair; šau-ta, head (but B. šei).

The distribution of these three suffixes will be noted. *The* occurs only in G. It and *th* may be identical with Skr. *-ta-*, Pr. *-da-*, and in that case these two should be grouped with the r, η , r, l suffixes below.

н, т.

The suffix *n* has many possible derivations. We may refer it to the Skr. *-ana-*, or we may compare it with O. Prs. *-aina-*, Av. *-aēna-*, Prs. *-īn*. I think it can most easily be connected with the Phl. $-(i)\check{s}n$, which becomes $-(i)\check{s}n$ or $-(i)\check{s}m$ in Prs. dialects (GIP. I², 182). In Ghalcah $\check{s}m > m$ (*ib.* 306). In Kurd, Av. $pa\check{s}na > p\bar{a}n\bar{i}$ (Gray, 923). This derivation enables us to group *n* and *m* together.

n.-P. paš-k-in, behind (double suffix); Gār. paši-n, bird; G. iči-n, eye; Kh. $\chi ata-n$, a house; W. mat-ini, a share; Kh. ligi-ni, tongue; V. ip-in, one (see numerals). The *n* of K. landan, house, is different. Cf. Prs. and aran. In the words for 'bird' and 'eye,' the *n* may be a

part of the original base, but this is hardly likely, when we compare the corresponding words in other cognate languages. See Vocabulary.

m.-G. puda-mi, before; Kh. sor-m, gold; V. let-em, tooth.

This may be compared with the Prakrit suffixes da, dla. The *l*-suffix appears in all M. past participles, and is evidently connected with this Prakrit termination, and does not seem to have anything to do with the *l* of the Paštō past participle. It is added *after* a *k*-suffix, and the whole double suffix may be dropped at pleasure. At the same time, in B. $v\bar{v}n$ -ag-an or $v\bar{v}n$ -an, striking, the *k*-suffix has been inserted between the root and the participial termination.

 r, r, μ .--G. $k\bar{o}\dot{s}$ -ar, shoe.

- Gār. $p\bar{\imath}s\bar{\imath}\cdot r$, P. $p\bar{\imath}s\bar{\imath}\cdot p\cdot ak$ or $p\bar{\imath}s\bar{\imath}\delta$ $ud\cdot ik$ (double suffix), a cat. (N and ud are interchangeable.)
- B. mach-ku-r (double suffix), a man.
- B. nazu-r, nasu-r, K. natcu-r, Kh. nas- $k\bar{a}$ r (double suffix), M. nath \bar{u} r, Gar. $n\bar{o}z\bar{o}$ -r, a nose.
- *l.*—P. gö·lā-ng (double suffix), Š. gō-lā, a bull. Here the *l*-suffix seems to indicate the masculine gender. Cf., however, Tibetan glang.

V. cs-le, he.

V. wezi-l, a shoe.

- M. gē-lā, singing (doubtful).
- M. kuța or kuța-gi-l, struck. So for all past participles.

Note how frequently this suffix is used in association with the k-suffix.

CHAPTER V

DECLENSION OF SUBSTANTIVES

Number.

In most of the Modern Paiśācī languages plurality is not expressed unless the context requires it. The following terminations have been noted :

> B., P., Kh., -āu, K. -an, -en, Gār. -āl. V. -ō, ā, K. -au.

These can all be referred to the Eranian Genitive Plural -ānām, Prs. -āu, Gīlakī -ān, -ōu, Kāsānī, -ōu.

K. -ai, Š, -ē, M. -a.

Cf. Phl. $-i\hbar a$, Prs. $-\hbar a$, Kāsānī -a. Or the M. -a may be compared with the Ps. $-^a$ (Eranian $-a\hbar$, Av. $-\bar{o}$, Skr. -as).

In Kś. the plural of masculine *a*-bases is the same as the singular. That of masculine *i*-bases ends in -i, and that of feminine bases generally in -e. With the last we may compare the Ps. -e (Eranian -yah, Av. $y\bar{v}$, Skr. -yas).

Besides the above terminations, nouns of multitude are often added to give the idea of plurality. Such are B. -kile. W. -kele, V. -kil, -kili, G. -gila, and (possibly) P. -lā, with all of which we may compare the Eranian Šg. -gala. Other similar words are: W. eccu- (prefixed), G. -nam, and K. -chik, all of which mean 'many.'

Case.

Cases are formed by the following suffixes and prefixes. There are also many others. THE PISACA LANGUAGES

CASE SUFFIXES AND PREFIXES.

NOTE. Suffixes are indicated by a hyphen preceding the word; thus, $-t\tilde{a}$. Prefixes are indicated by a hyphen following; thus, $b\tilde{a}$.

	Obl. Form, Sing.		To, for.	From.	Of.	In.
В.	- Ē		- $t\tilde{\tilde{a}}$, - $k\tilde{e}$	-tiĩ, -ste	-17 -ste, -s	bā-
W.	-77		-ka, -ketī	-kē,-kane, -bē	-ba	-ř

Kh,	-1)	2	-te	-sar	- 0	-ī, -ā
ŝ.	-ē	-80	-te	-jō, žō, -rō	-ai, ·s	-rō -rā, -žā
Kś.	-as,- ⁱ , -i	-an ⁱ , -i	-kunt ^u , -pučhy, -as	-peth ^a -andr ^a		-keth,
Gār	. ?	-	-ka	-mā	-/1	-mē
М.	-11	•)	-gai	-na	-či	-maz

General Remarks.—The case of the agent is almost always identical with the oblique form. It is the case of the subject of the past tenses of transitive verbs. In \check{S} , however, the agent case is used for the subject of a transitive verb in any tense (compare the neighbouring Tibetan), even the present. In some dialects of \check{S} , there are two terminations of the agent case. One, $-\bar{\imath}$, $-ay\bar{a}$, is used when the verb is in a tense formed from the past participle, and the other, $-s\bar{e}$ or $-s\bar{a}$, when the verb is in any other tense.

The ablative suffix is often a secondary form derived from some other case-suffix. Thus, in W. $-k\tilde{e}$ and -ka-ne are locatives of -ka, and $-b\tilde{e}$ is the locative of -ba. In V. -panea is derived from -panē. In Kś. -pe!h^a and -andr^a are derived from -pe!h and -andar respectively, and Gār. -mā and -mē are respectively the ablative and locative of the same base. Finally, we may compare G. -pere-na, which is evidently itself a genitive. As in Indian languages, some of the dative suffixes are also plainly locatives of genitive suffixes.

The Modern Paisaci noun shares with that of Indian languages and with that of the non-Prs. Eranian languages an oblique form. In P. and perhaps K. this is formed by the addition of the st-suffix (see nominal suffixes). The oblique form of Ks. is of purely Indian origin. The -as is derived from the old genitive of a-bases, and the $-^i$ of masculine -i-bases and the -i of feminine bases are of similar origin. All the other oblique forms given above are vocalic terminations. We have -a, $-\bar{e}$, or $-\phi$. which may be compared with the Indian oblique terminations, or with the -a, $-\tilde{i}$, -e, or $-\tilde{o}$ of Caspian Prs. Professor Geiger (GIP. I^2 , 358) derives the forms in -a from an old instrumental, those in $-\tilde{t}$ and -e from an old locative or genitive, and those in $-\bar{\sigma}$ from a substantival termination to which the post-position \bar{a} has been attached.

The oblique plural forms are not given in the above table, as they contain nothing distinctive. They are B. $-\bar{a}n$, $-\bar{o}n$; W. $-\hat{a}$; V. $-\bar{o}$; P. $-\bar{a}n$; G. $-\bar{a}$; K. -an, -cn; Kh. $-\bar{a}n$; Ś. -o; K[<], -n; Gār., and M. -a. All these may be either Eranian or Indian. There are numerous analogies in both branches of the Aryan tongue.

We may class the remaining suffixes as follows :

(a) Genitive—B. and Kh. -ō, Š. -ai, Gār. and M. -ā.
 (b) Locative—W. -ē, G. -c, K. -o(-na), Kh. -ī, -ā.
 (a) Agent—Š. -sē.
 (b) Ablative—B. -stc.
 (c) Genitive—B. -ste, -s, P. -s, K. -as, Š. -s.

These are each the same as some oblique form singular. The B., P., K., and Š. s-terminations are doubtful. They may be remains of old Aryan genitives in -sia, Av. -hya, Skr. -sya. The Kś. dative suffix -as has certainly this origin.

(a) Dative—B. -kē, W. -ka, -kc(-tī), G. -kc, Gār. -ka, M. -yai.
 (b) Ablative—W. -kē, -ka(-nc).
 (c) Genitive—V. (-wa)-k.

This is the well-known Indian suffix ($< k_T ta$ -). I do not know of its occurrence, as a case-sign, in Eranian.

(a) Dative—B. -tă, W. (-ke)-ti, V. tu-, P. (-in)-te, Kh. and S. -te.
 (b) Ablative—B. -ta.

We may compare this with the Ps. -ta, which Trumpp and Geiger (GIP. I², 215) consider to be of Indian origin (cf. Hindī -t \dot{e}), and which Darmesteter (*Chants Populaires* des Ajghaus, lxxiv.) identifies with the Prs. $t\bar{a}$. The fact that V. employs the word as a prefix is in favour of the latter derivation for V. at least.

- 4. (a) Dative—V. (-pa)-nč.
 - (b) Ablative-W. (-ka)-ne, V. (-pa)-nea, G. (-perc)-na, M. -na.
 - (c) Genitive—G. -na.
 - (*d*) Locative—K. (-*o*)-*na*.

We may compare this with the Ps. ablative suffix -na, or with the common Indian case-suffix $-n\bar{a}$, $-n\bar{a}$, etc.

- 5. (a) Dative—V. -pa, $-pa(-n\bar{e})$.
 - (b) Ablative—W. $-b\tilde{e}$, V. -pa, -pa(-nea), G. -pe(-re-na), K. -pi.
 - (c) Genitive—W. -ba.
 - (d) Locative-B. bū-,

We may compare these with the Ps. locative prefix pa-,

and with the Caspian dative prefix *ba*-, both corresponding to the Av. and Skr. *upa*.

With the V., Kś., and M. forms compare the Av. mailyana-, middle, Pś. miyan). The Gār. forms are Indian.

- 7. (a) Ablative—G. (-pe)-re(-na), Kh. (-s)-ar, S. -jö, -iö, -rö.
 - (b) Genitive—V. (-*u*)-ri.
 - (c) Locative—S. $-\xi \bar{a}$, $-r \bar{a}$.

The various Š. forms are dialectic variations. In this language, j, jr, \tilde{z} , and r are dialectically interchangeable. The original form in Š. is plainly $r\bar{o}$. (f. Prs. $r\bar{a}$, Old Prs. $r\bar{a}diy$. It survives in Ghalcah under the form -r. If we do not wish to connect $-\tilde{z}\bar{o}$, $-j\bar{o}$, with $-r\bar{o}$, as the phonetic change is an unexpected one, we can compare with the two former Av. *haca*, Prs. *az*-, Caspian Prs. $-j\bar{a}$. But in this case we shall have to assume that in the different Š. dialects different post-positions are employed for the same case. As to the phonetic change, compare Gilgit Š. ro, Drās Š. $\tilde{z}\bar{o}$, he, and B. $r\bar{a}r\bar{a}$ or $\tilde{z}arr$, noise. Lahndā, of the Western Pañjāb, shows many signs of Paiš. influence. We may therefore also compare the Mūltānī L. $dh\bar{i}$, daughter, pl. (quite irregular) $dh\bar{i}r\bar{r}$, with Š. $d\bar{i}$, obl. sing. $d\bar{i}j$ -.

8. The Kś. dative $-kynt^a$ (for $-kit^a$) and genitives $-squd^a$, $-uk^a$, $-un^a$, are purely Indian. Andar is, of course, Prs. Of -puxhy, -keth (or -kyath), and -peth (or -pyath), the origin is uncertain. So also the P. ablative -udai, and locative $-knc\bar{a}$. Kś. peth may be < Av. paxšti, Skr. prstha-(see Part II., § 188). K. dative $-h\bar{a}tia$ is probably connected with hasta. The Kś. $kyut^a$ is an adjective, and agrees in gender with the direct object. It and kyath (for kati) must ultimately be referred to some case or cases of krta.

^{6. (}a) Ablative-Gar. ma.

⁽b) Locative-V. -munj, K4. -manz, Gar. -me, M. -maz.

CHAPTER VI

ADJECTIVES

WITH the exception of the numerals, adjectives call for few remarks. Gender is very irregularly observed, the masculine being (except in Kś.) often used for the feminine. Indeed, the only adjectives which I have noted as ever taking feminine forms are those ending in \bar{a} or \bar{o} , and those ending in one of the liquids l, m, n, r. We have not, however, got sufficient materials for forming general rules. In Kāśmīrī, which, in this respect, is thoroughly under the influence of the neighbouring Sanskritic languages, the system of gender is in full swing. See my grammar. The feminine termination of adjectives is almost always \bar{i} .

Comparison is carried out in the Indian fashion, the object with which comparison is made being put in the ablative case.

The numerals are shown on p. 37.

General Remarks.—By a phonetic law of these languages which is constantly recurring, tr is interchangeable with c. A good example is S. $tr\bar{e}$ or $c\bar{e}$, three. A similar change occurs in the Ghalcah languages. Compare W. $p\bar{o}tr$, Sq. $p\bar{o}\check{c}$, a son. Tr in these cases represents an Avesta θr , as in $pu\theta ra$ -, a son. The numbers for 'fifty' and 'one hundred' are only given to show that these languages count on a vigesimal system, a system which is also employed by the Ghalcah Yüdyā. In a few instances words such as $panj\bar{a}$, sad, and šal, the words are borrowed from other languages, but in most the vigesimal system is self-evident. The employment by Yüdyā is probably not Eranian, as the

ADJECTIVES

other Ghalcah languages use a decimal system. Burušaski employs the vigesimal system.

It will be noticed that there is great uncertainty as to the use of dental and cerebral letters. See the remarks under the head of phonetics.

B. and W. change initial c into \check{s} . Thus B. $\check{s}to$, W. $\check{s}t\bar{a}$, Av. $ca\theta w\bar{a}r\bar{o}$, four. V. in the same word hardens θw to p. B. also represents Indian \check{s} by \check{c} when not initial. V. represents it by z. Thus, B. $di\check{c}$, V. leze, Skr. $da\check{s}a$ -, ten; B. $vi\check{e}i$, V. $(vi)z\bar{u}$, Skr. $vinis\acute{a}ti$ -, twenty.

W., like B., changes initial c to \dot{s} . On the other hand, it retains Indian \dot{s} under the form of \dot{s} .

V., in $ch\bar{i}$, three, changes tr to ch, not c. This language drops tr when medial, as in B. pitr, V. $pi\bar{c}$, a son. It also changes d to l, as in $l\bar{u}e$, two, leze, ten. Compare Munjānī (Ghalcah) $l\ddot{u}$, two, Yüd $\gamma\bar{a}$ los, ten. A similar change also occurs in Ps. I have already pointed out how θw is hardened to p in this dialect. An initial p is dropped in uc (? for wuc), five.

P. changes θr to *thl*, which G. closely follows. When *thl* is initial, the *t* is dropped. Examples are Avesta *pu\u03c8ra*-, P. *puthl\u03c8*, G. *pult* (with metathesis of θl , and loss of aspiration), a son; Av. $\theta r \bar{a} y \bar{o}$, P. *hl\u03c8*, G. $\theta l \bar{e}$, three. A final Indian *s* becomes *h*, and is then dropped, so that we have $d\bar{e}$, ten.

Regarding G. $\theta l\bar{e}$, see above. A *c* is hardened to *č* in $\check{c}\bar{u}r$ (Av. $ca\theta w\bar{a}r\bar{o}$, the *w* being preserved under the form of \bar{u}), four, and *pauč*, five. Kāśmīrī has nearly the same words for these numbers. An initial *v* has been dropped in $i\check{s}\bar{\imath}$, for $vi\check{s}\bar{\imath}$, twenty, compare V. $z\bar{u}$ for $viz\bar{u}$. An Indian \check{s} is retained under the form of \check{s} .

K. similarly retains Indian ś.

Kh. changes initial d to j in $j\bar{u}$, two, and $jo\bar{s}$, ten. With the former compare the Kāśmīrī z^ah , two, but dah, ten. The change to j is due to palatalization through a following palatal vowel. This is not in the Av. dra, but is in the Av. $ba\bar{c}$, the Shb. duri, and the B. diu. In $bi\bar{s}r$, twenty, t has become r. So also in \check{sor} , a hundred. This is a regular phonetic change in Kh. The form \check{sal} in M. shows that the course of development has been Skr. \check{sata} , thence $*\check{sada}$ (cf. Prs. \check{sad}), thence M. \check{sal} , Kh. \check{sor} .

Š. dii, like the Kh. $j\bar{u}$, two, shows the influence of the original following i. In pus, pus, five, a final c has become s, cf. the similar change of an initial c in B. and W. In poi, the *s* has been further weakened to *h*, and then elided. Š. and Ks. are the only languages which apparently follow the modern Indian fashion of aspirating the final t of the word for 'seven.' The aspiration is, however, due to the Ks. rule by which all final surds are aspirated. Compare the Shb. nataro (not nattaro) for *uaptāraķ*. The Skr. *asta-*, eight, has several representatives. Ath recalls the Shb. atha. If at on the other hand reminds one of the Paisāci kasatain for kastain. With as we may compare the Yüdyā ašco, remembering the liability of tr (*i.e.*, t) to become e. There is also the Shb. astan. In the two remaining forms, the final / has been dropped, and, in $a\tilde{c}h$, \tilde{s} has become $\tilde{c}h$, through ch. The most interesting point to note among these forms is that both the variants of this word which occur in Shb. are repeated in Š. The forms for 'ten' and 'twenty' show that a medial Indian \dot{s} is either weakened to h and then liable to be dropped, or may be represented by \dot{z} , as we have also seen in the case of the number 'eight.'

K's. always aspirates a final surd consonant. Hence, akh, one. \hat{S} is changed to h in dah, ten; wah, twenty; hath, a hundred. Sah, six, is only pandits' writing for sah.

Gār. represents Indian tr or the Av. θr by lh. As remarked above, the fact that the letter is cerebral is of small importance. Probably lh would be the representation of the sound as written by another scribe. At the same time, the cerebralization, if it exists, is evidently due to the influence of the following r. In Ks. ly regularly becomes c, so that this ly would be the immediate term in the equation try > c, a fact which may be the origin of the more general equation given above, that tr > c. In the

same way *thy* would become *ch* of the V. *chī*. We may, therefore, group this $ch\bar{i}$ as a form connected with Gār. *thā*. I have no explanation as to how the aspiration arose. Gār. represents the Indian *s* by *š*.

M. has the usual change of tr to c. As regards an original initial c, we have seen that B. and W. change it to \check{s} . M. goes a step farther, and dentalizes the s, so that the Avesta $ca\theta w \bar{a}r\bar{o}$ is represented by $sa\bar{a}r$. The letter j or c is zetacized to z in $p\hat{a}z$, five, after a nasal. The Kś. word is very similar. Indian \check{s} is as usual represented by \check{s} .

I now proceed to deal with each numeral separately.

One.—The forms \bar{e} , ev, $\bar{\imath}$, and \bar{a} must all be compared with Eranian. Compare Avesta $a\bar{e}v\bar{o}$, Ghalcah $\bar{\imath}v$, $\bar{\imath}$, etc. Yak, ak, akh, ek, may be either Eranian or Indian. I cannot certainly analyze the forms *ipin* and *attege* The *ip*- of the former is probably the same as the Ghalcah $\bar{\imath}v$. The other word seems to be *att-ege*. Compare *oc eg-zā*, five (-times) one-twenty, a hundred.

Two.—All the forms agree with Eranian. Compare Av. dra, $ba\bar{e}$. The varying forms have been dealt with above.

Three.—These also agree with Eranian. Av. $\theta r \bar{a} y \bar{o}$. Cf. Wkh. $tr \bar{u} i$, Mj. šarai, Yd. šur $\bar{o} i$.

Four.—Also Eranian. Av. $ca\theta w \bar{a}r \bar{o}$. Shb. cature, like B. and W., follows Paiśācī in preserving the medial t. So also, however, all other Asōka inscriptions. Ghalcah has čabür, čawur, etc. Hence forms like čor, etc. With V. eipu, cf. Ossetic čippar.

Fire.—Also Eranian. Av. panca, Ghaleah pānz, pinj, etc. Six.—Also Eranian. Av. χšvaš.

Seven.—This follows Indian. The Avesta has hapta. Skr. sapta. Regarding sat and sath, see above.

Eight.—Eranian or Indian; but the dialectic phonetic rules have come in, and the preservation of the conjunct s_t is distinctly Eranian.

Nine.--Eranian or Indian. Av. and Skr. nara. The forms of $G\bar{a}r$. and M. change v to m. The form num looks as if an ordinal was used instead of a cardinal. The

final h of B., V., G., K., Kh. points to Persian influence. See GIP. 1², 114.

Ten.—Indian. Skr. daśa. There are changes under dialectic phonetic rules.

Twenty.—Again Indian, except P. wöst, and Kh. bi\$r, which are Eranian, cf. Ghalcah $v\overline{\imath}st$. Kh. bi\$r is doubtful, owing to the presence of \$, which looks Indian. For the change of r < t, cf. Kh. \$or, hundred.

Hundred.—G. paišī is a contraction of panë išī, five twenties.

CHAPTER VII

PRONOUNS

$T_{\rm HE}$ first two personal pronouns are as follows :

	I.	My.	We.	Our.	Thou.	Thy.	You.	Your.
В.	onč or õč	ĩ	ета	стá	tiu, tu	tu	šû	šû

PRONOMINAL SUFFIXES.

FIRST PERSON.

Singular.—B. ouč or $\delta \check{c}$ and V.unz \bar{u} must be referred to Av. azom, Ghalcah wuz, etc. No other explanation seems possible, but these are the only examples of the insertion of n and of the change of z to \check{c} which I have noticed. The nmay be a mere nasalization of the vowel after which it is written. With \check{s} of V. end-e \check{s} , my, compare Wkh. ma- \check{z} , me, Sq. ma- \check{s} , Šg. mā- \check{s} , our. The nd of end-e \check{s} may be another representative of Av. z, but it may also be compared with the termination of Šg. mu-nd, my. In that case, in e-nd-e \check{s} , if $e\check{s}$ is also a sign of the genitive, we have a double genitive form. The origin of \check{s} is unknown. See GIP. I², 318, 319. Possibly it may be connected with the Aryan -sia, Skr. -sya. Regarding the initial e, see below.

If the above suggestions are accepted, the *e* of *e*-*ud*-*eš*, and, more certainly, B. \tilde{i} , my, W. $y\tilde{e}$, K.G.P. \tilde{a} , Kh. *awa*, and Gār. *ya*, are also to be connected with *azom*. Cf. Samnānī (Caspian Prs.) \tilde{a} , *u*, I. See GIP. I², 82, 352, 359, 360, 421.

Kś. boh, I, probably goes back to an Eranian *ahmā χam , like Sq. Šg. Yd. maš, māš, ma χ , we. Cf. K. ābi, M. bē, Š. beh, we. With V. um, W. ima, my, compare Pāzand and Jewish Prs. ēmā, we (GIP. 1², 411).

The remaining forms of the singular of the pronoun of the first person call for no remarks. Most of them are easily connected with Ghalcah.

Plural.—The forms B. emå, W. yema, K, homa (our), G. ama, P. hamā, Gār. mā, mö, require no further explanation. See the Pāzand and Jewish Prs. ēmā quoted above.

K. *ābi*, M. *bē*, Š. *beh*, we and Kś. *boh*, I, form one group, which may probably be referred to Eranian $*ahm\bar{a}\chi am$, as noted above. Cf. GIP. 1², 318.

There is an important group of which the typical letter is s. The following occur : V. asč, we; as, our.
Kh. ispa, we, our.
M. zã, our.
Š. asci, our.
Kś. asⁱ, we; sånⁿ, our.

These point distinctly to a connexion with the Skr. asmākam, through *assākam or *aspākam, but the occurrence in a language lkie V., which contains so many distinctively Eranian peculiarities, shows that these forms cannot have come from India. Some light is thrown by the purely Eranian Wkh., which has sak, we, žü, žüi (cf. M. $z\overline{a}$, our), my, $sp\overline{a}$, our. The only conclusion to be drawn (which is borne out by many other general considerations) is that these s-forms are Aryan, but not Indian, and, like other Modern Paisaci peculiarities) were the common property of the Aryan tribes of the Hindū Kush and the neighbourhood, representing a stage of the common Arvan language as it was before the Eranian change of sm to hm had taken place. The same forms also survived independently in Skr., and disappeared in the modern Indian vernaculars. On the other hand, one of the Paisaci peculiarities which has survived in North-Western India is this very s-pronoun. In Pañjābī and Sindhī, the word for 'we' is $as\hat{t}$. In Lahnda, it is $ass\tilde{a}$.

Suffixes.—The enclitic pronouns of the first person require but few remarks. There are three main sets, viz., $m: \bar{a}, \bar{i}$; and s, all of which have been dealt with above. There are also the following:

B. miš, by us.
W. miš, we, by us.
V. miš, we; mšo, by us.

As explained in regard to V. *e-nd-eš*, my, the origin of the termination \ddot{s} is obscure. We also have it in V. *iti-eš*, thy, and in the Ghalcah languages. Cf. Pś. $m\bar{u}\dot{z}$.

Second Person.

Singular.—The nominative singular presents very few difficulties. All forms can be referred to either Eranian or Indian, but the agreement with the Eranian Ghalcah is most direct. In B. tiu, we have the very common insertion of *i* before *u*, and this accounts for B. $c\bar{i}$ (suffix), Gār. $ch\bar{a}$ and Kś. $cyan^u$, thy. In V. $iy\bar{n}$, thou, \bar{i} , thy, the *t* of B. tiu has suffered aphæresis. Most of the forms go back to Av. $t\bar{n}$, but one or two, such as P. t^u , Kś. $\epsilon^u h$, to tara. In Kś. *t* becomes ϵ^v before *i*, so that $\tilde{\epsilon}^u h$ presupposes an intermediate form *tiah, which refers us to Av. $t\bar{e}$ rather than to tara. Cf. Caspian Prs. ti, thy.

The \check{s} of V. *i-ti-cš*, thy, has been already dealt with. The origin of the *ti* is doubtful when comparison is made with *e-nd-cš*. The $n\bar{a}$ of P. $t\bar{e}n\bar{a}$ and the n^u of K^{\dot{s}}. $cyan^u$ corresponds to the *nd* of *e-nd-eš*, which in Wkh. and Sq. takes the form *an* (GIP. I², 309, 319). Kh. *ta* is, of course, derived from *taca*.

Plural.—This presents greater difficulties. The origin of some forms is very doubtful. Many go back to Av. $\chi^{\check{s}m\bar{a}k\bar{a}m}$, your (Prs. $\check{s}mm\bar{a}$). For instance, B. $\check{s}\check{a}$, which reappears in the enclitic \check{s} of B.W., in \check{s} , $\check{s}o$ of V., s of G., and khof Kś. So V. $as\bar{e}n$, M. $s\bar{a}$, your. Cf. Wkh. saw, you, your.

Another group is V. $mi\bar{a}$, W. $c\bar{\imath}$, K. $\bar{a}b\bar{i}$ (the same in form as the word for 'we.' The same has occurred in the Pś. $m\bar{a}$), G. $m\bar{c}$, you, W. $r\bar{\imath}ma$, K. $m\bar{\imath}m\bar{\imath}$, G. $m\bar{e}$, your, all of which may be compared with the Kurdish enclitic re, and with Yd. $m\bar{a}\cdot f$. P. $h\bar{e}m\bar{a}$ may be compared with the Prs. $sum\bar{a}$ and the Tālišī $sim\bar{a}$. The Kh. pisa, you, your, is obscure. Cf., however, W. $c\bar{\imath}$, and the $e\bar{s}$ termination of the genitive. The remaining plural forms seem all to be secondary formations from the singular.

Suffixes.—The enclitic forms of the pronoun of the second person singular fall into three groups. These are ξ , ξ_0 , s, kh; o, $\bar{\imath}$, \bar{e} , u, \bar{a} , y; and G. Kś. (by thee) th, t. The first has been already explained. The second is connected with the Kurdish ve. The last requires no explanation.

As in the case of the full pronoun, the enclitic plural forms present many difficulties. They fall into the following groups:

(1) t. This requires no explanation. By origin it is a singular form.

(2) $u, y\bar{u}, y\bar{\iota}, o, w^{a}$. Compare Kurdish ve, and the Indo-European iu.

(3) mi. Compare Pś. mž (GIP. I², 217).

(4) r (B.), nc (V.), \hat{e} (W.), li (K.) In this set $\tilde{r}r$ points to an original n. I am unable to suggest any origin, either Eranian or Indian, for these forms. They are peculiar to the Kāfir languages. Compare, however, the Caspian Prs. terminations $in\bar{i}$, in, etc., of the second person plural (GIP. I², 365). V. nc may perhaps be a compound, n or nd + ti or \check{s} .

THIRD PERSON (AND DEMONSTRATIVE PRONOUNS).

Singular.—B. as-ke, V. $s\bar{u}$, es-le, W. se, G. se, P. $(\bar{u}$ -)s", Kh. hes, hasa, M. $s\bar{o}h$, Kś. suh, he, may be compared with Av. $a\bar{e}$ -ša, Skr. \bar{e} -sa, sa. The ke of as-ke, and the le of es-le are familiar suffixes. The V. su-m-iš, him, seems to be a double formation of this base and the plural forms with m.

The G. woi, P. $\bar{u}(-s^{a})$, Š. \bar{o} , Kś. huh, he that, may be compared with Prs. \bar{o} , $\bar{o}i$, that, as Kh. haiya, Gār. ai, Kś. yih, this, with Prs. \bar{e} . Cf. Horn, 129, 136, 137. Cf. also the corresponding forms in modern Indian vernaculars.

B. inā, anī, Š. anō. Cf. Prs. īn, ān. Horn, 142, 52.

The forms with t, —K. ata, ta(-ra), Gār. $at\tilde{a}$, require no explanation.

More difficult is the group B. *ize*, K. (ta)ra, S. $r\bar{o}$ (or dialectic $\check{z}\bar{o}$). In B. *s* becomes *z* between vowels, and in S. *r* and \check{z} are dialectically interchangeable, so that it is possible that the origin of these may be the same as that of the *s*- group. On the other hand compare Yd. $h\bar{u}roh$, that.

Few of the singular oblique forms require explanation. Most of them are old genitive. The termination ξ of

V. sumis and mis has been discussed under the heads of the first and second personal pronouns. With Kh. $hato-\gamma o$, $to-\gamma o$, compare Pš. $ha-\gamma^a$. See p. 27.

Plural.—The letter m is typical of several. Thus, B. am- $k\bar{\imath}$, $am-g\bar{\imath}$, $am-n\hat{a}$, V. $m\bar{u}$, G. eme, teme, Kh. hamit, Gär. am, tam, Kś. tim, yim, hum. The letter is not, however, confined to the plural, for we have V. su-m-iš, m-iš, his, Kh. hamn, his. With it we may compare Av. ima- (cf. Prs. im- $r\bar{o}z$), Wkh. yem, Sq. yam, this.

With the set that has a sibilant in the singular we may compare K. še-teh (a compound), še-li, M. saī. Li, as before, is a nominal suffix.

With Prs. \bar{o} , we may compare W. *a-ka*, P. \bar{v} -*t*", and with Prs. \bar{e} , Š. *ai*.

An *n*-form is Š. anch. T-forms are W. $t\bar{e}$, K. $(\check{s}e)tch$, tch, G. teme, P. $(\bar{u})t^a$, Gār. tam, Kś. tim. Most of these contain each two pronominal elements.

To the *r*- \tilde{z} -group belong Š. $r\tilde{e}$ or (dialectic) $\tilde{z}\tilde{e}$.

The K. $eledr\bar{a}s$ appears to be some compound word of which the first element is $e{-le}$. Cf. V. sing. $es{-le}$. The true origin of the $dr\bar{a}s$ is unknown to me. More than one will suggest themselves.

In the oblique plural, V. $mi\dot{s}$ -in is a secondary formation from the singular $mi\dot{s}$, just as from the Prs. $-a\dot{s}$, we have a plural $-(a)\dot{s}an$. The other oblique forms do not call for special comment.

Suffixes.—These fall into six groups:

(1) t. W. (they, by them), G. (they).

(2) s, z. B. W. G. K. Kś. (to him).

(3) u, ni. P. (by him), Kś. (by him), P. (by them),G. (by them), K. (by them), Kh. (they, by them).

(4) \bar{a} , \bar{e} , \bar{i} . P. (his, to him), Kh. (by him, his), B. (they, by them).

(5) š, kh, h. W. V. Kś.

(6) nc. P. (they).

(1) The t-forms require no explanation. It is, however, worth noting that they only occur in the plural. (2) The suffix z is peculiar to B. It is simply the form which s in that language often takes when between vowels. In Kś s is reserved for the suffix in the dative case. In the other languages (except W.) s is the only suffix of the third person singular. It is worth noting that it is used not only for the nominative, but also for the oblique cases. This points to a connection with the Prs. suffix a^x, with change of ^s to s, as in some of the Persian Central dialects (GIP. I², 386, 392). If this view is correct this group is identical with the fifth.

(3) Always employed in the sense of the agent, both singular and plural. Kh. also employs it for the nominative plural, but in this language the suffixes of the nominative and of the agent are always identical. We may compare the full pronouns $in\bar{a}$, etc., above. Or, remembering the restriction to the case of the agent, we can suggest the Indian $t\bar{e}ua$, by him.

(4) These vocalic terminations are all explained above under the full pronouns.

(5) Kś. h is the form which the hh takes between vowels. As in the case of the second person singular the hh is identical with the W. V. š. There has, however, been a change of number. The latter is the same as the Prs. aš (singular), which reappears in Bal. iš with a plural signification. In some of the Central Persian dialects š is employed for both numbers (GIP. I^2 , 392).

(6) Here P. nc is as puzzling as the V. nc of the second person. As there, I am inclined to look upon it as a compound, here n+ti.

I cannot hope that all the foregoing derivations will be deemed satisfactory. They are the best which I can suggest, but the subject is most obscure.

PRONOUNS

OTHER PRONOMINAL FORMS.

Regarding the words for 'what?' and 'self,' see the vocabulary. Except in the case of K^{\leq}., the relative pronoun has disappeared. Either its place is supplied by relative participles, as is the usual idiom in the Kāfir languages, even where other forms are shown, or else the interrogative pronoun is made to do duty as in Prs. That K^{\leq}. *yih* is borrowed from the neighbouring Indian is clearly shown by the fact that it is identical in form with the indigenous K^{\leq}. word for 'this.' The words for 'who?' call for no remarks.

CHAPTER VIII

CONJUGATION

The table on p. 53 shows the present and past tenses of the verb substantive. Derived from \checkmark as are B. azem, V. esmo, aso, P. hāim, K. āsam, Kh. asum, I am; B. azim, V. essem, P. haikim, K. asis, Kh. úsistam, M. as, Gar. āšā, Š. asus, Kś. asus, I was. The forms K. āsan, P. hāin, Kh. asuni, show that the third persons plural, B. ast, V. asto, are for *sati, *sato; cf. Skr. santi. O. See also the remarks below under the Prs. ha(n)tiy. finite verb. Syncope of a is very common in these languages. In B. s has become \dot{s} through the influence of the following *i*. These forms throw light on the Pš. *šta*, they are. See GIP. I^2 , 220. B. frequently changes intervocalic s to z: cf. naz-ur, nose. Before i, as above, it prefers to change it to s. Hence est, thou art; cf. sei (*siras*), a head. Gar. $a \dot{s} \bar{u}$ remains unchanged through all persons of both numbers. M. $\tilde{a}s$ becomes $\tilde{a}s\bar{u}$ in the plural, but is otherwise unchanged. This, as in Indian dialects, points to a participial origin. Yd. astet, he is, is similarly used. The other forms of the past are secondary derivations.

The W. vrem, I am, variem, I was, come from \sqrt{vrt} , vartatē. Cf. Bengali baļi, Bihārī bārī, I am. Connected with the same root are the dialectic Prs. \sqrt{girt} , gen, etc. (GIP. I², 399), which = Prs. gardīdan. See Horn, 886.

The Kś. chus, I am, is derived from the \sqrt{acch} (< *rcchati*, Pischel, § 480).

From the $\sqrt{\delta u}$ (cf. Prs. $\delta u dun$) we have K. δu , Kh. δer ,

isi, thu asi, thu ās, thủ ñsū, thủ ās, thā ās, thủ 1. thū $th\bar{n}$ thi $th\bar{h}$ thi thii Ы ļ usn uşu ušn Gār. thē $th\bar{n}$ $th\bar{n}$ thū thū thē (ISH <u>usn</u> ūšu 1 hanā chukh usukh $\bar{u}s_t m_{tt}$ Kś. hanus chus hanat chiw" hanō chuh hanas chih hane chih 1181181 "18" ils' $\bar{\alpha}s^i$ 115115 080 ásistami asat asimi ásistam asas (181) 080 1 ۶ż isistam แรนหน่ asnui úsistani úsistau úsistai asusi seni ((SUM asus 0301 ansn. osoni ser' Kh. insini āsta ūsili šiāta usis ušis 9anaïm āsam ūsāv usan sien 0anaïs – ūsas usil. $\bar{u}su$ *isi* sin .ч 0anaik панай) $\theta a ma$ 0anaït boem bacsbuabockboctI ł $\bar{q}q$. CONJUGATION

53

it is, and K. *šīen*, Kh. *šeni*, they are. These forms are only used when the subject is inanimate.

From the Eranian \sqrt{bar} , Indian $\sqrt{bh\bar{u}}$, we have Gar. boem, I was.

There remains the group G. $\theta ana \ddot{i} m$, M. Gār. $th \ddot{u}$, Š. hanus, I am; M. $th \ddot{u}$, I was. It is connected with the Eranian \sqrt{sta} , Indian \sqrt{stha} , past participle *sthita*. $Th \ddot{u}$ does not change for number or person. Cf. Hindōstānī $th \ddot{a}$. Eranian stbecomes th, and this is further weakened to h in Š. Cf. Gray, 864. The G. and Š. forms appear to be nasal presents. Cf. Gothic *standa*, stand.

The following are the leading forms of the finite verb :

	Present Participle.	Past Participle.	Future Participle.	Infinitive.
	Striking.	Struck.	About to strike.	To strike.
В.	vīn-an, vīn-agan, vīl	vīn-ū	vī-lā (for vīn-lā)	vĩ-ste, vĩ-sth
W .	(?) vi-la	vin-ā, vin-asta	vier	vi-yũsta
v.	(?)	pesumti-ogo	(?)	pesumti-nik
Р.	(?)	han-īk	(?)	han-īk
G.	θli-māu	θli-ta	(?) <i>θli-bā</i>	<i>ิ</i> θli-āwo
К.	tī-man nis-īm (I sit)	prau nis-au	(?)	ty-ek nis-īk
Kh.	(?) gan-ika (taking)	prai, pre-sta yani, gan-ista	(?)	d-ik gan-ik
š.	(?) šid-cto	šid-ō, šid-ēgō	(?)	šid-oiki
Kś.	mār-ān	mår-u	mār-ạn ^u	mār-un
Gār.	cand-ānt	eaṇḍ-ū	(?)	caṇḍ-ō
М.	kuț-ūnt	kuṭ-a, kuṭ-agil	(?)	kuț-ō

VERBAL NOUNS.

Participle Present.

The fullest and most ancient forms are those in -ant of Gar. and M., which are evidently due to Indian influence. -Ant survived in Old Hindī, and is still employed in poetry. It is softened to -and- or -ad- in modern Pañjābī and Sindhī. The t with syncope of the u, has been preserved in Š.

In Av. the termination of the present participle middle was $-\bar{a}na$, which became $-\bar{a}n$ in Phl. (GIP, 1¹, 279). In Prs. it is not confined to the middle voice (e.g., dih- $\bar{a}n$, Av. $da\theta$ - $\bar{a}na$ -), giving (ib. I², 146). This accounts for B. $v\bar{i}n$ -an, Ks. $m\bar{a}r$ - $\bar{a}n$. The k-suffix was prefixed to this $-\bar{a}n$ even in Phl., so that we may assume that the same has been the case in B. $v\bar{i}n$ -ag-an. In G. θli - $m\bar{a}n$, K. $t\bar{i}$ - $m\bar{a}n$, either the m is euphonic, or the old present participle terminations - $\bar{a}na$ - and -nt- have been confused with -mant- (Cf. GIP. I¹, 98, 280).

As for Kh. gan-ika, the termination is the k-suffix (vide nominal suffixes). In Phl. (GIP. I¹, 278) the termination $-\tilde{a}k$ was employed to make present participles. It was derived from an older *-avaka*, or *-ayaka*. The latter form would account for the *i* in gan-ika.

The origin of the B. $v\bar{\imath}l$ (for $v\bar{\imath}n-l$), and of W. $v\bar{\imath}-la$ is uncertain. The l may have been developed from n, or the future participle may be employed in the sense of the present, as in the finite tenses of Ghalcah.

Participle Past.

In all, except G. θli -ta, the original t of the termination has disappeared. P. takes the suffix $\overline{\imath}k$. Compare the Av. participle in $-t\overline{\imath}$ (GIP. I¹, 110) and the Phl. one in $-\overline{\imath}t$, -tak(ib. 282). The k-suffix also appears in V. pesumti-ogo, S. \overline{sid} - \overline{ego} , and M. kut-ug-il (with -illa-suffix added). There remain the W. vin-asta, Kh. pre-sta. The suffix -sta has been fully dealt with under the head of nominal suffixes. It is distinct from the similar suffix which denotes the third person plural. See p. 28 *ante*.

Participle Future.

The origin of the $-l\bar{a}$ of B. and the -r of W. is doubtful. It may be noted that in the Indian Rājasthānī, Marāṭhī, and Pahāṛī, $-l\bar{a}$ is also used to form the future. For this latter I have not seen any derivation that completely satisfies me. See, however, Hoernle, *Gaudian Grammar*, pp. 357, 341. Eranian t regularly becomes l in Pš., and often does so in Mod. Paiś. It is therefore possible that we have here a survival of the old Eranian future passive participle in -ata- (GIP. I¹, 110).

G. $\theta li \cdot b\bar{a}$ (if it is a true form. The word is the only example which I have seen, and its identification is doubtful) can be referred to the Eranian suffix $\cdot \theta wa$ - (Skr. $\cdot tra$ -, $\cdot tarya$ -), of the future passive participle (ib. 111).

The Ks. $m\bar{a}ran^{u}$ is a purely Indian form, corresponding to the Lahndā, etc., $m\bar{a}r^{a}n\bar{a}$.

Infinitive.

This is throughout a verbal noun, with the regular nominal suffixes. The st-forms (B. and W.) have already been fully dealt with. See pp. 27 ff. ante. We have the k-suffix in V., P., K., Kh., and Š. As in Pš. the infinitive is the same in form as the past participle in P. The G. θli -awo may have the same origin as the future participle (as is common in Indian languages), or may have as the original of its suffix the Phl. $-\bar{a}k$ of the present participle (cf. Phl. $s\bar{a}k$, Prs. $s\bar{a}r$). In these languages the present and future are frequently confounded. Kś. $m\bar{a}r$ -un is borrowed from Indian. The $-\bar{o}$ of Gār. and M. is the ordinary strong termination of masculine nouns.

CONJUGATION

	I strike.	Thou strikest.	He strikes.	We strike.	You strike.	They strike.

١r	Procent P	urticiple (ku	(t.ant) nee	d through	out withou	t change.

PRESENT TENSE.

M. Present Participle (kut-ant) used throughout, without change.

In the conjugation of this tense we see a mixture of the old Aryan present and of secondary periphrastic forms. This is plainest in W. Comparison with the corresponding Sanskrit forms gives us—

	Singula	ır.	Plural.			
	Skr. (I bear.)	W. (I strike.)	Skr. (We bear.)	W. (We strike.)		
1.	bharāmi	vi-am	bharā-mas, -masi	vi-àmis		
2.	bhara-si	vi-aš	bhara-tha, (dual) -thas	vi-dsě		
3.	bhara-ti	vi-ūs	bhara-nti	vi-ast		

If we bear in mind that in the modern vernaculars of India the second person plural is often derived from the old dual, we see that each of the first two persons in the above paradigm corresponds in the two languages. The correspondence disappears entirely in the third person. Τt would be very difficult to derive the \bar{as} of $vi-\bar{as}$ from the tiof bhara-ti, and it would, so far as my knowledge goes, be impossible to derive *-ast* from *-nti*. *-As* is plainly for asti (cf. P. hās, he is), and -ast for santi, cf. B. ast, V. asto, they The change of st to s is not uncommon in these are. languages, cf. Skr. hasta-, P. hās, a hand. As regards ašt, asto, for santi, see the verb substantive. The termination -st-, it should be remarked, occurs elsewhere as the sign of the third person plural. In B. the third plural pluperfect ends in -istai or -issi. In V. the universal termination of the third person plural is -sto, as in the above table, and as in the past and the future below. It will be observed that the suffix is different in origin from the nominal suffix -ste, -sta, etc., which is employed for forming infinitives and past participles.

In P. the $-\bar{\imath}k$ - which runs through this tense, is part of the base of this particular verb. It is not, like the $-\bar{\imath}k$ of the past participle, and of the infinitive, a verbal termination, but is probably a causal suffix. Compare $p\bar{a}y$ -im, I go, beside the infinitive $p\bar{a}$ - $\bar{\imath}k$, to go.

Taking the forms person by person, the first person singular calls for few remarks. Throughout, its connection with the Aryan $(bhar\bar{a})mi$ is manifest. In Kś. the final mhas been dropped as in Gabrī Prs. The V. and G. forms alone present difficulties. I am inclined to adopt as the most plausible explanation that the whole tense in these languages is periphrastic. The letter m is not confined to the first persons singular and plural, but in other persons, seems to form part of tense-base. It is probably a remnant of the present participle (cf. G. $\theta li \cdot m\bar{a}n$, striking, he strikes), to which the present tense of the verb substantive has been subjoined throughout. In the second person singular, the s of -si has been palatalized to j in B., and to \check{s} in W. (and V.). Cf. V. ji, B. $\check{s}ci$, for $\check{s}i(ras)$, a head, and the indefinite pronunciation of B. described in the preface to Colonel Davidson's Bašgalī Grammar (see above, p. 16). In Kš. this \check{s} has become kh. In Š. and P. the s has suffered syncope.

As for the third person singular in W. (and V.), see the remarks above. The *t* remains in B. The change of *t* to *n* in that language is obscure. It is not due to the preceding *n* of the root, as it occurs in all verbs. Cf. *acūna-n* (which Colonel Davidson writes *acūnann*), he runs. It may be a plural form, or it may have developed through *l*. Cf. K. *ti-el*. The change of *t* to *l* is common (cf. Pš.). In Kh. the *t* becomes *r*. This is a phonetic rule of the language. In P. it has been softened to *d*, while in Š. and Kś. it has suffered syncope. In G., θli -mān is simply the present participle without any suffix. See the remarks on the first person.

In the first person plural, the Aryan *-mas* or *-masi* is recognisable in B. $c\bar{i}$ - $mi\check{s}$, W. ri- $\bar{a}mi\check{s}$, and V. pesumti- $m\check{s}o$. In G. and K. \check{s} has become k, through kh. M has suffered syncope in P., K. and Kh., while it has been vocalized to av in Kś. Regarding Š. $-\bar{o}n$, cf. Balōcī $-\bar{u}n$.

In the second person plural, a comparison with the future shows that the B. suffix is \vec{r} . For it, and for V. *nc*, compare the remarks on pronominal suffixes of the second person. If the B. termination were simply $\cdot r$, we might compare the Kh. change of t to r. In discussing the pronominal suffixes I have suggested a connection with the Caspian Prs. $-in\bar{i}$, *in*.

Most of the terminations of the third person plural can easily be referred to *-anti*, Prs. *-and*, Gīhakī *-ada*, Yd. *-at*, Tālišī *-ēn*, Wkh. *-an*, etc. As explained above, the W. *-st*, V. *-sto*, \leq *santi*.

	I struck.	Thou struckest.	He struck.	We struck.	You struck.	They struck.			
в.	vīn-ā-m	ขาก-ล-ร้	ะเิท-นี	vīn-ā-miš	$v\bar{\imath}n$ - \tilde{a} - r	vĩn-ā

Kś.	mår-u-m	mâr-u-th	már-u-n	mâr-"	$m \hat{a} r$ - u - w^a	mår-u-kh			
Gār.	Past Participle $(eand \cdot a)$ without suffixes.								
М.	Past Participle (kut-agil) without suffixes.								

PAST TENSE.

The past tense is simply the past participle with or without pronominal suffixes of the subject or of the agent. Suffixes indicating the subject are used with intransitive verbs, and those indicating the agent with transitive ones construed passively. In W., transitive verbs take no suffixes, but intransitive ones do.

	I shall strike.	Thou wilt strike.	He will strike.	We shall strike,	You will strike.	They will strike.			
В.	vī(n)-l- om	$v\bar{\imath}(n)$ -l-oš	$v\tilde{\imath}(n)$ - $l\bar{a}$	$v\bar{\imath}(n)$ - $m\vartheta$	$v\bar{\imath}(n)$ -l- $\tilde{o}r$	$v\bar{\imath}(n)$ - $l\bar{a}$			
w.	vi-ēŗ-am	vi-eŗ-eš	vi-er	vī-karī	vi·ẽṛ-ĕ	vi-er-et			
V.	pesumte- mo				pescmti- ogasno				
Ρ.		han-āwāy	han-สี่เหลี่เ		han-ē-da, han-āwāē- da				
G.	θlē∙mo	θle-sū	eli-ba	θli - $k\bar{a}$	eli-wā	θle-ta			
К.	Same as the Present.								
Kh.	Same as the Present.								
s,	Same as the Present.								
Kś.	Same as the Present.								
Gār.	mār-miš for all persons and both numbers.								
λſ	but a gala sat or but a sat for all persons and both numbers.								

FUTURE TENSE.

M. *kuța-gala-šat* or *kuța-šat* for all persons and both numbers.

In most cases, as in Eranian (e.g., Ghalcah), the Future tense is the same as the Present. This is also the case in P., although the fact is obscured by the causal terminations added to the particular root shown in the table. From other roots we have ur-am, I shall arise; par-am, I shall go, and so on. In G. the third person singular appears to be the future participle, while the other persons are derived from the old present, which in this language has altogether lost its primitive meaning. This loss of proper meaning by the present tense is also nearly the case in K \leq ., in which the present is nearly always employed as a future. It is only employed as a present in old works and in poetry.

In B. and W. the future participle is used throughout,

pronominal suffixes being added to give the force of the different numbers and persons. B. takes no suffix in the third person singular or plural. In V. the future seems also to be participial, but the forms are very obscure. Some of them (as in M.) are based on what looks like the past participle.

Gār. and M. are also evidently participial forms. In Gār., the fact that the root is changed from cand to mar is due to the forms of the future tense having been received from a different source. From the first source I have received cand-am as meaning 'I shall strike,' but no forms for the other persons. Cand-am is clearly an old present. For Gār. -miš in mār-miš I can suggest no derivation. M. kuṭagala-šat, or kuṭa-šat looks like a past participle to which -šat is appended. -Sat may perhaps be connected with the Phl. šāyat, Prs. šāyað, it is possible, it can (a verb impersonal). The difficulty in this derivation is the short a.

62

CHAPTER IX

VOCABULARY

Arise, stand up.—B. \sqrt{ost} , \sqrt{ut} , \sqrt{uut} ; W. \sqrt{ost} ; K. \sqrt{ast} ; V. and G. \sqrt{ust} ; P. \sqrt{ur} ; M. \sqrt{uth} ; Ks. \sqrt{uoth} ; Cf. O. Prs. $ava + \sqrt{sta}$; Skr. $ud + \sqrt{sta}$, utisthati, he arises, past part. uthita. B., W., V., K., G., P., must be referred to Eranian. The other two are doubtful. Cf. Gipsy \sqrt{ust} . Regarding the reduplication of s, cf. GIP. P, 55.

V. $\sqrt{i\delta t}$; Gar. \sqrt{it} ; Cf. O. Prs. **adi* + \sqrt{sta} ; Prs. *ēstādau* (Horn, 84).

K. $\checkmark cišt$; P. $\checkmark töst$. Cf. Skr. tisthati; Mg. Pr. cisthadi(Pischel, § 483).

Kh. \sqrt{rup} , ruph. Cf. Skr. \sqrt{ruh} , causal passive, ropyatē.

Ask.—B. W. \sqrt{kud} ; G. \sqrt{khud} ; Š. \sqrt{koj} , (dial) khuž. Cf. H. $\sqrt{kh\bar{o}j}$; derivation uncertain, possibly Skr. $ksudyat\bar{e}$, he is agitated, or ksudhyati, he is hungry.

K. √aphūc; Kś. √pričh. Cf. Av. √p∂r∂s; Skr. √prach, prechati; Pr. puechai; Pš. √pu<u>x</u>.

Ass.—B. kur; V. $k\bar{o}ru$; P. $k\bar{a}r$; Kś. khar. Cf. Av. χara -; Wkh. χur ; Prs. χar ; Skr. khara-. Note the change of a > u, \bar{o} , as in Wkh.

W., G., Gār. $gad\bar{a}$; K. $gard\bar{o}\cdot k$; Kh. $gurd\bar{o}\cdot\gamma$, $gurd\bar{o}\cdot\chi$; M. $ghad\bar{a}$. Cf. Skr. $gardabh\bar{a}$. Tom. 896 assumes that K. $gard\bar{o}\cdot k$ is for Skr. *gardaha. This cannot be right. The *bh* of gardabha- survives in the \bar{o} . The *k* is a regular suffix of K.

Š. žakūn. Cf. Bur. jakun.

Back.—B. $p_i \bar{i}$; W. $y\bar{a}$ - $pa_i \bar{i}$; G. $pi\bar{s}_i \bar{i}$; Š. (dial.) $p\bar{a}t\bar{n}$; Kś. $pu\bar{s}t$. Cf. the following words for 'behind': B. di-kti; V. $k\bar{c}eh$; W. pat; K. $pi\bar{s}_i \bar{o}$; G. pata; P. $pa\bar{s}$ -k-in; M. $pat\bar{o}$; Går. $pat\bar{a}$; Š. $phat\bar{a}$; Kś. pat, $pa\bar{c}h$. Cf. Av. $par\bar{s}ti$ -; Prs. $pu\bar{s}t$; Wkh. part; Mj. $pi\bar{s}ke$; Yd. $pi\bar{s}co$; Skr. $pr\bar{s}tha$ -.

K. $d\bar{a}k$; M. $d\bar{a}$ (dial. $d\bar{a}g$); Š. $d\bar{a}k\bar{\imath}$. Cf. Wkh., Šg. dam, but the connection is doubtful. ? Cf. also Kś. trakh; Gir. $t\bar{a}ng$, see below.

V. $g\bar{i}ci$. This may be connected with $k\bar{c}eh$, above.

Gar. tang; Kś. trakh. ? Cf. Skr. trika-, the lower part of the spine.

Bad.—B. deger, daggar, digar; V. digar. ? deriv.

W. *abar*. Numerous derivations (*e.g.*, Skr. *a-rara-*) will suggest themselves, but none is certain.

K. χāce; G. χač; S. kācō. Cf. H. kaccā, unripe. Deriv. unknown.

Before, in front.—B. pa-mynk; V. ti-mikh; W. mynk-ne; Gär. $m\bar{u}ka$; Š. $m\bar{o}c\bar{o}$, (dial.) $m\bar{o}\xi\bar{e}$; M. $m\bar{u}h\bar{o}$; Gär. also mutho. Cf. Skr. mukha-, face.

G. puda-mi; P. pōrā; Kh. pru-šļa. Cf. Skr. pravat-(Horn, 825); Sq. prōd; Prs. firōd, firō.

Belly.-B. ktol, ktol.

V. *iul*, *omiln*; G. $w\bar{o}r$; M. *wair*; Gār. $d\bar{a}r$; Š. $d\bar{e}r$, (dial.) $\bar{u}ar$; Kś. $yad^{\bar{u}}$ (pron. $y\ddot{u}d$). Cf. Wkh. dur; Mj. *yiler*; Yd. *wnjud*; (?) Skr. *udara*-, $\bar{u}dara$ -. This grouping is very doubtful. If it is correct, *d* has been dropped in V. G., and M.; and, further, *r* has become *l* in V. Possibly it is *d* which has become *l* in V.—a regular change in this dialect—and the *r* is then dropped. In $d\bar{a}r$, $d\bar{e}r$, initial *n* has been lost and the remaining vowel lengthened. Š. $\bar{u}ar$ recalls the rare Skr. $\bar{u}dara$ (here also *d* has been dropped). Kś y $\bar{u}d$ recalls the Mj. *yiler*.

W. kiuč; K. P. kuc; P. also $k\bar{u}c$. Cf. Šg. $k\bar{i}c$; Sq. kec. Cf. Av. kuši-; Skr. kuksi- (Tom., p. 787).

Kh. khoyānu.

Bird.—B. marangač, mrenze; V. $n\tilde{i}ze$; W. $n\tilde{i}ge\check{e}e$; I take maran-gač, (?) going to death, as the original form from which

the others are derived by elision. Cf. Prs. $mur\gamma$; Av. $m\partial r\partial\gamma a$ -; Skr. mga-.

K. pachĩy-ek; G. pici-n; Gār. pašī-n; Kś. pākhī. Cf. Skr. pakșin-.

P. parhanikāle. Cf. Av. parant-; Prs. parand; Av. parəna-, feather; Skr. parya-, feather.

Kh. böik, büik. ? Der.

M. ming; Š. bing, bring. ? Cf. Skr. bhringa.

Gar. carör. ? Der.

Bring.—B. $\langle giač$; V. $\langle giz$; Gār. $\langle gi$; P. (?) $\langle ac$; Kh. $\langle angi$; ? der. B. (gi-ač) looks like a compound verb. In B. $\langle ač = come$.' In that case, so is V. giz. P. acrepresents the second member of the compound. Kh. an-gi, is also a compound (see below). $\langle gi = come'$ in Kh.

W. $\sqrt{av\bar{i}}$; Š. \sqrt{wal} . Aryan \sqrt{radh} (GIP. I², p. 417, § 209); Pś. $r\bar{a}$ -val-; Mj. \sqrt{a} -var; Yd. \sqrt{a} -wer. In W. the *a* is evidently a prefix > Av. \bar{a} .

K. \sqrt{on} ; G. \sqrt{an} ; Kh. an-gi (see above); Kś. \sqrt{an} . Cf. Skr. $\sqrt{n\tilde{i}}$, \tilde{a} -nayati; H. \sqrt{an} .

Brother.—B. brōh, brå; V. way-eh; W. brā; K. bāya; G. bliaia; P. lāī; Kh. brār; Kś. bâya; M. žā; Gār. jā; Š. jrā, žā. Cf. Av. brātar-; Prs. birādar; Mj. werāī; Yd. wrāī; Pś. wrōr; Skr. bhrātar-.

This word developed after Aryan bh had become Eranian b. Li is liable to change to j, cf. Kś. mal'', for malu, father, $maj\bar{u}$, for $maj\bar{i}$, mother. The M., Gar., and Š. forms have therefore come through forms like bliaia, $l\bar{a}i$.

Bull.—B. $a \bar{z}e$, $a \bar{s}u$; V. $\bar{z}e \cdot \bar{s}t$; G. $e \bar{c} \bar{\iota}$ (cow). G.M. $g \bar{v}$; P. $g \bar{o} \cdot l \bar{a}ng$; Š. (dial.) $g \bar{o} l \bar{o}$. Cf. Av. $g \bar{d} \bar{v} \cdot ;$ Ps. $\gamma v \bar{a}$; Bal. $g \bar{o} \cdot \chi$; Wkh. $\gamma \ddot{u}$; Šg. $\bar{z} \bar{a} v$; Sq. $\bar{z}a o$ (GIP. I², 300); Skr. $g a v \cdot , g \bar{o} \cdot ,$ an ox, cow. Here B., V., and G. follow Šg., Sq. P. $g \bar{o} \cdot l \bar{a}ng$ is possibly a corruption of Tibetan g lang, ox.

W. $tr\tilde{a}$? Can the *tr* represent a *c*?

K. dōn; Š. dōnō; Kś. dǎd. Cf. Skr. dauda-, a staff, power, (lexicons) a horse: Guj. dåd, lusty, sturdy; L. dåd, dåd, a bull; S. ddàd", a bull. Kh. rešū, (a cow) lešū. Cf. Skr. ŗṣabha-. See Cow.

Camel.—B. *štyur*; V. *ištiur*; W. $\bar{u}k$; G., M. $\bar{u}\chi$. Cf. Av. *uštra*-; Wkh. *üštür* (with *ü*, cf. the *yu* and *iu* of B. and V.); Sq. $\chi t \bar{u}r$; Yd. *išcuro*, cf. the common change of *tr* to *c*; Pš. $\bar{u}\chi$.

K., Kh., Š. ut; Gar. ūth; Kś. wûth. Cf. Skr. ustra-.

Cat.—B. pišaš, pšīaš; V. pši-kh; W. pišā; K. phūša-k; G. psāsi; P. pīšō-ņd-ik, pīšō-ņ-ak; Kh. puši; Gār. pīšī-r. Cf. Wkh. piš; Mj. piške; Pš. pišō; Prs. pušak.

Kś. $br\bar{q}r^{\bar{u}}$ (pron. brör). Cf. Skr. $bid\bar{a}la$ -.

Š. $b\bar{u}\check{s}\bar{\iota}$. Cf. Bur. *buš*. Possibly this is connected with the first series, but I have met no instance of initial p > b. Bur. *buš* may be the original of the whole series.

Child.—B. parmn; G. pola. ? Cf. Av. $ap \partial r \partial n \bar{a} yu$ -, a boy; Prs. burna. The elision of initial a is regular in Eranian before a single consonant. G. pola can hardly be from $putr\bar{a}$, which becomes pult in that language, see 'Son.'

V. kiur, a child; Kś. $k\bar{u}r^{\bar{u}}$, a girl, a daughter; ? Skr. kumāra-; H. kŭar.

S. šudar, $š\bar{u}\bar{o}$. This can hardly be from suta-, considering the regular preservation of a medial t in these languages. Can it be connected with Skr. ksudra-?

Other words for 'child' are W. tana-munch (apparently 'small man'); K. čhātak; P. $kit^{a}l\bar{a}$; Kh. $a\check{z}\bar{e}li$; M. māsām (? dim. of māš, man); Gār. $lak\bar{u}t\bar{o}r$; Kś. nyaciv^u (pron. necyuv).

Clothe, put on clothes.—B. V. \sqrt{amj} ; G. $\sqrt{an\check{e}}$; Kh. \sqrt{anj} . ? Cf. Av. paitiš-mu χ ta-; Phl. pat-m $\check{o}\chi$ tan; Wkh. $\sqrt{pam\check{e}ts}$; Prs. $m\check{o}za$, a shoe (Horn, 994, 160).

Come.—B. $\sqrt{a\epsilon}$, $\sqrt{pre\epsilon}$; V. $\sqrt{jo\epsilon}$; W. $\sqrt{a\epsilon}h$. Cf. Šg. Sq. \sqrt{yet} ; Mj. \sqrt{as} ; Yd. \sqrt{es} . The derivation of this is unknown, see GIP. 1², 323. *Pre* ϵ presupposes the prefix *pra*. It also means 'go.' See 'go.' I prefer to connect with *pragaechati*. Cf. B. $\sqrt{gi}a\epsilon$, V. $\sqrt{gi}z$; P. \sqrt{ac} , bring. K. $\sqrt{\tau}(h)$; P. $\sqrt{y\bar{e}}$; Š. \bar{e} ; M. \sqrt{ai} ; Kś. \sqrt{yi} . Cf. Av. \sqrt{i} , ay, go; Skr. \sqrt{i} , go; Av. $\overline{a} + \sqrt{ay}$; Prs. \overline{a} -yam, I come.

G. $\langle j\bar{a} ;$ Gar. $\sqrt{ya} ;$ Š. $\sqrt{w\bar{a}}$. Cf. Skr. $\sqrt{y\bar{a}}$, go; Av. $\bar{a} + \sqrt{ay}$, as above.

Kh. \sqrt{gi} . ? Cf. Av., Skr. \sqrt{gam} , go; H. $gay\bar{a}$, gone. But cf. also B. $\sqrt{gi}ai^{*}$; V. $\sqrt{gi}z$; Gār. \sqrt{gi} ; Kh. $\sqrt{an}gi$, all meaning 'bring,' q.v.

The following examples for 'came' are instructive :

B. oze, ozz, ess, aja, afziā; V. ač-nkso; W. a!-o.

K. au; G. aya; P. $a\overline{i}\cdot k$; Kh. $ha\overline{i}$, $ya\circ$; M. $\overline{i}\cdot g\overline{a}$; Gar. $y\overline{a}$, $y\overline{a}-g$; B. $aiy\circ$; W. \overline{a} ; Kś. $\overline{a}v$.

Š. *wā-tō*.

The irregularities are great, but the roots can all be traced. Š. $w\bar{a}t\bar{o}$ may be compared with the Skr. $\bar{a}y\bar{a}ta$. So, also, possibly many of the second set. The forms are so abraded that it is impossible to be certain. Or we may compare Skr. \bar{a} -gata-.

Country.—B. gol; V. gal; W. $g\bar{o}l$; Š. gai. The word is probably the same as that which is found in '*Bašqal*,' and other Kāfiristān proper names. It is there explained to mean 'valley.' Cf. the term $gal\bar{i}$, applied to the valleys in the N.-W. Panjāb.

Cow.—B. *gōh*, *gåo*; V. *gū-țh*; W. P., and M. *gā*; K. *ga-k*; G. *cčī*; Gār. *gāē*; Š. *gō*; Kś. *gāo*. See 'Bull.' Kh. *lešā*. See 'Bull.'

Dance.—B. $n\bar{a}t$; P. $\langle n\bar{a}t;$ B. also $\langle n\bar{a}t;$ V., W., K., and G. \sqrt{nat} ; M. and Gār. $\sqrt{n\bar{e}t}$; Š. \sqrt{nath} , nat; Kś. $\sqrt{na\epsilon}$. Cf. Skr. \sqrt{ngt} , ngtyati.

Kh. \sqrt{phon} , \sqrt{pon} . ? Derivation.

Daughter.—V. luštu; Kh. $j\bar{a}r$; $\bar{b}. j\bar{a}$, $ju\cdot k$; W. $j\bar{a}$; G. $z\bar{a}$; K. chu; M. $dh\bar{i}$; Š. $\delta\bar{i}$; Gār. $d\bar{u}\bar{i}$; Š. also $d\bar{i}$ (plur. $d\bar{\imath}j\bar{a}r\cdot\bar{e}$). Cf. Av. $du\gamma\delta ar$ -; Mj. $le\gamma da$; Pš. $l\bar{a}r$. Cf. Skr. duhitar-; Pr. $dh\bar{\imath}d\bar{a}$, $dh\bar{\imath}a$ (for $*duh\bar{\imath}t\bar{a}$, with transferred aspiration, see Pischel, Pr. Gram., § 148). The Av. $\gamma\delta$ is elided in Pš. See GIP. I², 209. Elision of final r is common in these dialects. We may take the basis of most of these forms as $*d\bar{a}r$ or *diur, i being commonly inserted 5-2 before u. The j in Š. $d\bar{\imath}j\bar{a}r$ - may represent $\gamma\delta$, through a d. For the V. change of $\gamma\delta > \check{s}t$, cf. Armenian dustr. In L., $dh\bar{\imath}$, a daughter, makes its plural $dh\bar{\imath}r\bar{\imath}$. Remembering the frequent interchange between r and j, this may be compared with Š $d\bar{\imath}j\bar{a}r$ -.

P. wēya. ? Cf. V. way-eh, a brother. Wēya may be a secondary feminine.

Kś. $k\bar{u}r^{\bar{u}}$. Cf. Skr. $kum\bar{a}r\bar{\iota}$; V. kiur, a child. The Kś. base is * $k\bar{v}r\bar{\iota}$.

Day.—B. gujr. ? Cf. Prs. √guðar, pass by; H. √guzar. V. ves; W. wās; K. and Kh. bas; G. bā; P. dawās, dwās; M. dis; Gār. dōs; Š. dēs; Kś. dwah (pron. doh). Cf. Skr. divasa.

K. and Kh. anus. ? Cf. Av. azan-; Skr. ahan-, with elision of h, or ? Skr. dina-, with elision of d.

Die.—B. \sqrt{mr} (imperat. mr-ev), die; V. $m\bar{o}$ (dead); W. \sqrt{mr} (imperat. $mr\bar{i}$)); G. \sqrt{mi} (also = dead); Kh. \sqrt{bri} ; M. Gār., and Kś. \sqrt{mar} ; Gār. $m\bar{u}r$ š (dead); Š. \sqrt{mir} , die; $m\bar{u}$ (dead). In B. and W. r is the cerebral consonant, not the vowel r. Aryan \sqrt{mar} . Cf. Sq. $m\bar{i}r$ -d, he dies; Prs. $m\bar{i}r$ -ad; Av. $mairy\bar{a}t$; Šg. $m\bar{u}d$ -, dead; Prs. murd-an, to die. Skr. marati, $mriyat\bar{e}$. M., Gār. and Kś. agree more closely with Skr. The rest are distinctly Eranian. The presence of r indicates an original rt (GIP. I², 208).

K. \sqrt{na} š. Cf. Skr. \sqrt{na} s, naśyati.

P. $\sqrt{l\tilde{e}}$ (infin. *l-īk*), *lē-im* or *lē-gā-kum*, I am dying. ? Derivation.

Do, make.—B. \sqrt{kor} , (I do) $k\bar{u}nam$, kotam, $kar\bar{o}nam$, $k\bar{s}\bar{a}m$); W. chêr-am, I shall do, $c\bar{a}st$, he does; K. $k\bar{a}r$ -em, I do; G. \sqrt{ker} ; P. kar-am, ka-m, I do; Kh. \sqrt{kor} (we shall do, $k\bar{o}$ -si); M., Gār., and Kś. \sqrt{kar} . Av. \sqrt{kar} , $k\bar{s}r\bar{o}naoiti$; Prs. \sqrt{kar} (I do, kun-am); Ghaleah \sqrt{kar} , \sqrt{car} (Tom., 879); Pš. $kaw^{a}l$, $kr^{a}l$ (infinitive); Skr. \sqrt{kar} , $kar\bar{o}ti$; Pr. \sqrt{kar} , karai or kunai.

V. \sqrt{le} ; Š. θa -m, ta-m, I do. Av. $\sqrt{d\bar{a}}$, $da\delta\bar{a}iti$, make; Skr. $\sqrt{dh\bar{a}}$, $dadh\bar{a}ti$ (Horn, 521).

The following instances of the past tense and past participle are instructive : B. kara, pp.; W. kũr, kra, he made; K. āro, he made; G. ker-us, he did; P. ka-kin, he made; Kh. ar-er, he made; M. kara-g-il, he made; Gār. kēr, he made.

V. $l\bar{e}$ -go, he made; S. $\theta\bar{e}$ -g \bar{o} , $t\bar{e}$ -g \bar{o} , he made.

Dog.—B. *kuŗi*, *krũī*; V. *kiru-kh*, *keru-kh*; M. *kūsar*; Gār. *kūcur*. Cf. Sq. *küd*; Kurd. *kūcik*; Skr. *kukkura-*; H. *kuttā*. The derivation of this widely-spread word is unknown. See Tom. 761, GIP. I², 8. ? Cf. Bur. *huk*.

W. $\check{c}\check{a}$; K. $\check{s}\check{c}r$; G. $\check{s}un\bar{a}$; P. $\check{s}\check{a}ri-ng$; Š. $\check{s}\check{a}$; K \acute{s} . $h\bar{u}u^{u}$. Cf. Mede (Herodotus), $\sigma\pi\check{a}\kappa a$; Av. span-; Skr. $\check{s}un$ -; P \check{s} . spai; Arm. $\check{s}un$.

Kh. rēni. ? Derivation.

Duck.—I quote the following. The other languages employ loan-words.

B. ar; W., K., and Kh. āri; G. ari; Gār. ār. ? Cf. Vedic Skr. ādi- or āti-.

V. želai. Cf, Mj. yelke ; Yd. yeško.

Ear.—B. kōr; W. and Kh. kār; P. kār; K. kurð, krð; G. kham-ţa; M. kāņ; Gār. kyan; Š. kūn, kön; Kś. kan. Cf. Av. karðna- (Horn, 845); Skr. karņa-.

V. imu.

Eat.—B. $\sqrt{y\bar{u}}$ (past 3, $iy\bar{a}$); V. \sqrt{oyu} ; W. $\sqrt{y\bar{u}}$; K. \sqrt{zu} ; G. \sqrt{zo} ; P. \sqrt{e} , \sqrt{a} ; Kh. \sqrt{zu} (past oyo-stam, I ate). Cf. Prs. $j\bar{a}v$ - $\bar{u}dau$, to chew (origin uncertain, Horn, 415); Wkh. \sqrt{yav} ($y\bar{\iota}t$, he eats); Pš. $z\bar{o}w$ - ^{a}l , to chew; Bal. $j\bar{a}y$ -ag, ditto. The prefix o probably represents $ara = Prs. \bar{o}$. Tom. (852) connects Wkh. yav with Skr. \sqrt{av} . The above examples show that this is wrong.

M. \sqrt{kha} ; Gār. $\sqrt{kh\bar{o}}$; Š. \sqrt{ka} ; Kś. \sqrt{khi} . Cf. Skr. $\sqrt{kh\bar{a}d}$, $kh\bar{a}dati$; H. $\sqrt{kh\bar{a}}$; Prs. $\chi\bar{a}y\bar{a}dan$. With Kś. khi, cf. Hindī khi-l- $\bar{a}n\bar{a}$, to cause to eat.

Eye.—B. and W. $ac\bar{c}$; V. $i \leq i$; K. and Kh. ec; G. $i \leq i-n$; (?) P. anc. Cf. Av. $a \leq i$ -.

Kh. γee ; M. ainch; Gār. ițh; Š. achī, āčhē; Kś. qch^i . Cf. Skr. aksi-.

The Kh. γee is doubtful. The derivation offered suggests

the forms $aksi > akisi > akec > kec > \gamma ec$, or the γ may be prosthetic.

Famine, dearness (of food, etc.).—K. $draga\check{z}$; Kh. $dr\bar{a}\gamma\bar{a}nj$; Kś. $dr\bar{a}g$. Derivation unknown. Tom. (899), compares the Kś. word $drag^{u}$, dear, with Slavonic dragz. One is reminded of the last syllable of the Skr. $mah\bar{a}ryha$.

Far, distant.—B. dyur, dyor; W. ? sudu; K. dē-ša; G. durae; P., M., Š., and Kś. dūr; Kh. do-dēri (locative?); Gār. dēōr. Cf. Av. Skr. dūra-; Av. loc. dūir-e (ELA. 99); Wkh. δīr; Pš. lire.

V. tikkė. ? Derivation.

Father.—B. töt, tött; W. tata, tā; P. tātī; Kh. tat. Cf. Skr. tata-, tāta-; Greek τέττα; Latin tata; Wkh., Mj. tāt. K. dāda. Cf. Šg. dād.

M. mhala; Š. malo; Kś. mal^a . Cf. Š. mala, mother. The word for 'father' is a corresponding masculine. It can hardly be here a nursery word.

V. $y\bar{a}$. Numerous derivations are possible for this, but none are certain.

Finger.—B. angyur; V. igi; W. ägùr; K. angurya-k; Gār. angir; Š. agui; Kś. anguj^ā (for angulī). Cf. Skr. anguli-, anguri-; Prs. (Kāšānī) angulī.

Kh. camut. ? Derivation.

Finger-ring.—B. angušti; V. $w \bar{v} g i \chi$; W. $\tilde{a} g u \bar{s} t \bar{\tilde{o}}$; K. angušt-ar; P. ang $\bar{o} e^{-a}k$; Kh. pulungušt; Gār. angusir. Cf. Av. angušta-, toe; Prs. angušt-ar, a ring; Sq. inga χt , a finger; Wkh. pulangušt, a ring.

Š. barõnō. Cf. Bur. burundo.

Fire.—B. $ag\tilde{\delta}$, $ang\bar{a}$; V. an-ekh; K., G., P., and Kh. $aug\bar{a}r$; $G\bar{a}r$. $\bar{a}g\bar{a}r$; M., Š. $ag\bar{a}r$; M. (also), Kś, $n\bar{a}r$; Š. (also), $hag\bar{a}r$. Cf. Skr. $ang\bar{a}ra$ -, agni-; Prs. angišt.

W. $\tilde{e}r$. Cf. Av. $a\theta r$ -; Mj. $y\bar{a}r$; Yd. $y\bar{a}r$; Pś. $\bar{o}r$.

In the word for son $\theta r > tr$ in W., see 'son.' The Šg. for 'fire' is $y\bar{a}i$, like pui, son (cf. GIP. I², 303). In these dialects rt, tr, can become r, r. Cf. Pš. mur for *murta dead. See 'die.'

Š. (dial.) phu. Cf. Bur. phū.

70

Foot.—B. kyur, kũr; K., G., Gār., and M. khur; Kš. khōr; Š. (dial.) küti. Cf. Skr. khura-.

W. pā-pō; P. pā, pai; Š. pā; Kh. po-ug. Cf. Av. pāδa-: Prs. pā.

V. thitě, tě. ? cf. Skr. sthita-.

Fowl.—B. kakak; V. kakokā; K. kakawak. Cf. Skr. krkavāku-*.

The survival of this Vedic word almost letter for letter in K. is remarkable.

W. kiukiu; G. kukuŗ*; P. kukūr*; Kh. kukū; M. kukõt: Gār. kūkur*, kugū*; Š. kankörō-cō*; Kś. kwakur (pr. kokur*). Cf. Skr. kukkuta-*.

Although classed under 'fowl,' those marked with an asterisk mean 'cock.'

Give.—B. $\sqrt{pr\tilde{e}}$ (past part. $pt\tilde{a}$); V. \sqrt{aphle} (pp. $aphl\tilde{e}$ -go, polo-go); W. $pr\tilde{e}$ (pratā); K. prau, he gave; Kh. prai, he gave. ? Cf. Av. $\sqrt{d\tilde{a}}$, $da\delta \tilde{a}iti$, he gives, with prefix fra (pra); Wkh. $\sqrt{ra}\delta \delta a$ (pp. ratt-, δett -); Mj. lia, he gave. The prefix in V. may be $\tilde{a} + pra$.

G. *J*θla (pp. θlit-). Cf. Av. *J*dā, dabāiti, he puts: Śg. *J*δed (pp. δād-); Skr. *J*dhā, dadhāti.

K. \sqrt{de} ; P. and Š. $\sqrt{d\bar{e}}$; Kh. $\sqrt{d\bar{i}}$; M. \sqrt{dai} (pp. dit); Gār. $\sqrt{d\bar{a}}$; Kš. \sqrt{di} (pp. dit^{o}). Note the change of \bar{a} to i, e, as in Prs. dih-am; Pāli, $d\bar{e}ti$; H. $d\bar{e}$ -n \bar{a} . Av. Skr. $\sqrt{d\bar{a}}$.

W. \sqrt{ao} . ? Cf. Bur. $\sqrt{y\bar{a}}$, or possibly $\bar{a} + \sqrt{d\bar{a}}$.

Go.—B. $\sqrt{pre\xi}$; V. \sqrt{pez} . See 'come.' Derivation doubtful. Several suggest themselves—*e.g.*, $pra + \sqrt{yat}$ (see 'come'), or Skr. $pr\bar{e}sita$ -; Prs. $\beta irista$. I am inclined to suggest Av. $\beta ra-jasaiti$; Skr. pra-gacchati.

B. $\sqrt{r\bar{i}}$; W. \sqrt{i} ; K., and P. $\sqrt{p\bar{a}r}$ -i. See 'come.'

W. $\sqrt{c\bar{u}}$; Gar. $c\bar{o}$. Cf. Wkh. cau-am, I go. O. Prs. \sqrt{siyar} , Av. \sqrt{sar} .

P. \sqrt{pa} (pres. pak-am, I go; $pa\gamma$ -a, he goes) Kś. \sqrt{pak} ; K. pai, having gone. Derivation doubtful. ? Cf. Skr. prakramatē.

Kh. $b\bar{\imath}$ (both 'become' and 'go'); M. \sqrt{ba} ; S. \sqrt{bo} . Cf. Av. \sqrt{bar} , become; Skr. $\sqrt{bh\bar{a}}$, become. Compare Prs. Sudan, 'to go,' hence 'to become.' So in the Pamīr dialects. Here the order of change of ideas is reversed. It is noteworthy that Kh. has $bo\gamma a$ - for its imperfect base. Cf. Š. bojam, I go.

G. dī. ? Derivation.

The past participle of this verb is as follows :

B. go; W. $go\bar{a}$; G. $g\bar{a}$; P. $g\bar{\imath}$ -k; Gār. $g\bar{a}$; S. $ga\bar{o}$; Ks. gauv. The others are regular; V. pez-ekso; K. $p\bar{a}r$ -au; Kh. $ba\gamma ai$; M. $ba\bar{\imath}$ - $g\bar{a}$. Go, etc., are of course to be referred to Skr. gata-.

Goat (male).—B. gaš (pl. šere); V. geš (pl. $š\bar{e}$); W. $gro \tilde{s}$. (?)

K. $b\bar{i}ra$; Gār. $b\bar{i}r$, $b\bar{i}r\bar{a}$ -th; V. beir (a she-goat). (?)

G. lauša. (?)

P. $p\bar{a}j^a_{l'}\bar{a}$; K. and Kh. pai (she-goat). (?) $p\bar{a}j^a_{l'}\bar{a}$ for $p\bar{a}j + la$. With $p\bar{a}j$, cf. wereh, etc., she-goat.

P. $\delta \bar{o} t \bar{a}$; M. $\delta a tilo$. (?)

Kh. *tic*. (?)

M. müngur; Š. mügar. (?)

Kś. čawul^u. Cf. Skr. chagala-.

Goat (female). (When not merely feminine of, or identical with, the preceding.)—B. wez-eh; W. wasei. Cf. Av. $b\bar{u}za$ -; Mj. wuz.

G. heni.

M. sāil; Gār. chēl. Cf. Skr. chēla-.

Š. ai.

Gold.—B. $s\bar{\alpha}n$, $s\bar{o}n$; V. $\check{s}iu$; W. and G. son; K. $s\bar{\tilde{u}}ra$; P. $s\bar{o}n\bar{a}$; Kh. $s\bar{o}r$ -m; Š. $s\bar{o}n$; Kś. svan (pron. son). Cf. Skr. $svar\eta a$ -.

Graze, lead to pasture.—W.; K., and Gār. \sqrt{car} ; Kh. \sqrt{roch} ; M. $\sqrt{s\bar{a}r}$; Š. \sqrt{cer} . Not noted elsewhere. Kh. has metathesis. Cf. Av. Skr. \sqrt{car} ; Mj. \sqrt{car} .

Great, large.—B. $\hat{a}l$; Kh. *lott.* (?) derivation. Cf. Pš. $l\bar{o}\bar{e}$; Wkh. *lup*; Turkī *ulup* (Tom. 816). But this is explaining obscurity by obscurity.

V. wištar. Cf. Pš. star. Cf. Av. stawra-, firm, compact; Skr. sthūra-, sthūla- (Geiger, ELA. 204). K. γona ; P. gan; M. $\gamma \tilde{o}$; Gar. gian. Cf. Skr. ghana-; Prs. agin, full (Horn, 41).

Hair.—B. dru, zu; V. zui; Kh. dro; (?) G. zumu-ta; (?) Ś. camoye.

W. coro-k; K. cūri. Cf. Skr. cūdikā; cūlikā.

G. khēs. Cf. Skr. kēśa-.

M. bāla; Gār. bāl; Š. bālī; Kś. wāl. Cf. Skr. vāla-.

Hand.—B. dušt, dui; V. lust; W. došt; (?) Gār. thair. Cf. Av. zasta-; O. Prs. dasta-; Wkh. δast; Mj. lāst; Yd. last; Pš. lās.

K. hāst; G. hast; P. hāst, hās; Kh. host; M. hā: S. hatth, hath; Kś. hath. Cf. Skr. hasta-; Pj. hatth; H. hāth.

The Gar. word is doubtful. The suggested derivation supposes a change of δ to th, and elision of st as in B. and M. But this does not account for the r. Cf. however Gar. thos, head.

Head.—B. šei, pšai; V. ji; W. šei; G. šau-ta; Kh. sor; P. šīr; Kš. hīr. Cf. Av. sarah-; Mj. pūser; Yd. pūsr; Skr. širas-.

K., M., and S. šiš, šīš; (?) Gār. thos. Cf. Skr. šīrşa-.

The B. $p \le ai$, compared with Mj. and Yd., suggest an Eranian and not an Indian connection for the first five words. As for Gār. $th \overline{os}$, cf. Gār. thair, hand.

Hear.—He heard,—B. san-gāya; V. nusi-ogo; K. sangyes; M. šun-gil. Gāya in B. san-gāya, gyes in K. san-gyes, probably mean 'went.' Cf. H. sun-jānā, to hear. V. has metathesis. Cf. Av. \sqrt{srac} ; Skr. \sqrt{sru} ; Prs. $\frac{sunādan}{s}$.

P. *\lar*; (?) Av. *\srav*.

Š. $p\bar{a}rud\bar{u}$, he heard. (?) deriv.

Heart.—B. zare; W. zō. Cf. Av. zərəd-.

G. hera; P. harā; Kh. herdi. Cf. Skr. hydaya-.

The preservation of rd in *herdi* also occurs in Ghalcah. Cf. GIP. I², 304.

Horse.—B. usp; K. has; Š. $asp\bar{o}$, (dial.) aps. Cf. Av. aspa-; Prs. asp; Mj. $y\bar{a}sp$; Wkh. $y\bar{a}s$; Ps. $\bar{a}s$; Bal. aps: Skr. asra.

V. $\bar{\imath}ri$. (?) derivation. Possibly connected with \sqrt{bar} , through Sg. rorj, etc.

Kh. istör. Cf. Av. staora-; Prs. ustör; Šg. stör.

W. gur; G. gora; M. $gh\bar{o}$; Gār. $g\bar{o}r$; P. $g\bar{o}r\bar{a}$; Ks. gur^u . Cf. Skr. $gh\bar{o}ta$ -ka-.

House.—B. ama, amu; W. ama; G. āma. (?)

V. war-ckh, tar-ckh (spelt tareq); K. and Kh. där; Kś. lär. Cf. Av. drar-; Prs. dar; Kurd. bar; Pš. var; Wkh. bār; Mj. labra; Skr. drār-, a door.

K. hāndān. Cf. Av. antaro; Phl., Prs. andarān. It is unnecessary to connect this directly with Skr. anta-, as suggested by Tom. 896.

Kh. xata-n. (?) cf. Av. kata-; Phl. kata-k; Mj. kei.

P. $g\bar{\sigma}s^{a}$ - $g, g\bar{\sigma}si$ -ng; M.Š. $g\bar{\sigma}t$; Š (dial.), $g\bar{\sigma}s$, $g\bar{\sigma}s$. (?) cf. Skr. $g\bar{\sigma}siha$ - or $g\bar{\sigma}tra$ -.

M. bhā. (?) cf. Skr. bharana-.

Gar. šit, šīr. (?)

Hunger.—B. ot, at; V. $\bar{u}t$; W. arot; G. hawat (hunger, famine); P. $hawata giy\bar{a}r\bar{\imath}$, $wata-tiy\bar{a}r\bar{\imath}$. Cf. Ar. qaht. There is little doubt about this derivation. The usual word for 'famine' is a compound such as 'hunger-year'; cf. H., Prs. qaht-sāl.

K. $n\bar{o}ra$; Š. $\bar{u}nai$; Š. dial., $uni\bar{a}l$ or $nir\bar{o}nu$, hungry. Tom. 897, derives this from Skr. $an\bar{a}h\bar{a}ra$. It is not impossible.

Kh. chuī; M. būcha; Gār. būthō (hungry); Kś. bōchī. Cf. Skr. bubhukṣā.

Inside, within.—B. $at\bar{e}$, $at\tilde{e}r$; W. attar; K. $u\delta r\bar{i}$ -man; G. atra-n; Kh. andr- $\bar{e}n\bar{i}$; Kś. andar. Cf. Av. $antar\bar{e}$; Skr. antar; Prs. andar.

V. *tibzi*. (?) deriv. (probably *ti-bzi*, to-within, a dative of motion).

Iron.—B. cimr, cimeh; V. žema; W. cima; K. cīmbar; G. čimar; P., Gār., Š. cimar; P. cumar; Kh. cumr, cumūr; M. sē̃war; Š (dial.) cingār. Cf. Bur. chomar.

Kś. šistar. Cf. Skr. šastra-, a weapon, iron, steel.

Kid.—B. $c\tilde{o}$; V. $i\check{s}a$; W. $c\tilde{u}$. Cf. Wkh. $c\bar{o}\gamma$, which Tom. 765 connects with Av. garawa-, Skr. garbha-.

Live, be alive.—B, $\bar{s}\bar{a}w\bar{a}$, alive; $\bar{s}\bar{a}$, life; V. $\bar{s}o$ - $\bar{o}kzo$, he is alive; W. $\bar{s}\bar{a}da$, alive; K., Kh, junu, alive; G. zien, alive; Kh, also $\bar{z}an\bar{a}$, alive; Gār. $j\bar{a}nd\bar{o}$, living: Š. $j\bar{i}no$, alive. Others borrow from Prs. Cf. Av. Skr. $\sqrt{j\bar{v}}r$; Av. *jvaiti* (for $j\bar{c}vaiti$), he lives; $j(\bar{i})vant$ -, living; Skr. $j\bar{v}ati$, he lives.

Lose.—B. *psē-stai*, he was lost; V. *psā-ogo*, he lost; W. *pus*, he was lost; *pius* (ppp.), lost; G. *phus-a-us*, he was lost, *phuz-di*, lost. (?) Deriv.

Make (see 'do').

Man. — B. manje; S. manujrō, manužō. Cf. Skr. manuja.

W. manaš; B. mancī, mach-kur; K. möc; V. muš; Š. mūš; Kh. mōš; M. māš; Gār. mēš; Kś. mahan-ivu. Cf. Skr. mānusa-, mānusya-. In Kś. there has been metathesis of h(for s) and n.

V. warjemi.

G. lauri.

Moon, month.—B. mös; V. mas-ekh; W., Kh. mäs; G. mäsoi. Cf. Skr. mäsa-; Av., O. Prs. mäh-.

K. mastr-uk. Cf. Ps. myāšt; Šg. mēst.

P. mai(y)-ik. Cf. Av., O. Prs. $m\bar{a}h$ -; Pš. - $ma\bar{i}$; Dig. Oss. $m\ddot{a}y\ddot{a}$; Tag. $m\ddot{a}i$; Wkh. $m\bar{n}i$.

M. yā; Gār. yasān; Š. yān, gyün; Kś. zūn. (?) Cf. Skr. jyötsnā; Pr. jöyhā, moonlight. Cf. also, Wkh. jümāk; Mj. yumega, yomya; Yd. imoyo.

Mother.—B. $n\bar{u}$, $n\bar{o}n$; V., Kh. nan. Cf. Skr. nan \bar{a} ; Wkh. n $\hat{a}n$; Mj. n $\bar{e}n\bar{a}$; Sq. an \hat{a} ; Prs. nana; Albanian, nan ϵ (see Horn, 1,044).

W. oie; K. $\bar{a}ya$; G. jai; P. $\bar{a}i$; Gār. $ya\bar{i}$; Š. (dial.) $\bar{a}\check{z}\bar{e}$. ? Cf. Skr. $j\bar{a}yat\bar{e}$, he is born.

M. $mha\bar{i}$; Š. $m\bar{a}l\bar{i}$; Kś. $m\bar{q}j^{\bar{u}}$ (pron. $m\bar{o}j$). Cf. Prs. $m\bar{a}dar$; Sq. $m\bar{a}d$; Ps. $m\bar{o}r$.

Mouth.—B. $a\check{z}i$; B., K. $a\check{s}i$; V. $i\check{s}$; W. $a\check{s}j$; G. $h\hat{u}si$; M., Gār. $a\tilde{a}$: Š. $a\check{t}$, (dial.) $az\bar{i}$; Kś. $a\check{s}^i$ (pron. $\ddot{o}s^i$). Cf. Skr. $a\check{s}$ -, $a\check{s}ya$ -.

Kh. apak. Cf. Yd. pkor.

P. $d\bar{o}r$.

Nose. — B. nazu-r, nasu- r^1 ; V. nes^1 ; W. $nas\bar{u}^1$; K. $n\bar{a}tcn$ - r^3 ; G. $nasi^1$; P. $n\bar{a}st^3$; Kh. nas- $k\bar{a}$ - r^2 ; M. $nath\bar{u}$ - r^3 ; Gar. $n\bar{o}z\bar{o}$ - r^1 ; Š. $n\bar{a}t\bar{o}$, $nnt\bar{o}^3$: Ks. $nast^3$. Cf. Av. $n\bar{a}onh\bar{a}$ -; Old Prs. $n\bar{a}h$ -; Šg. nef; Sq. $nast^2$, Skr. $n\bar{a}s\bar{a}^1$, $n\bar{a}sik\bar{a}^2$, nasta-³. Cf. Brugmann, Grundriss, i., 416. The original form is $n\bar{a}s$ -, to which various suffixes (? diminutives) have been added.

Out, outside.—B. bar, ber \dot{u} ; V. be; W. ber; K. b \bar{i} -en; G. ber \ddot{a} -ta; P. $d\bar{o}r\bar{e}$; Kh. b $\bar{e}ri$; Š. $dar\bar{u}$; Kś. nyabar (pr. nebar). Cf. Av. drar-, a door; Skr. drar; Prs. b $\bar{e}r$ - $\bar{u}n$, dar, outside. The affiliation of Kś. is doubtful (see Horn, 252, 545, 546). The change of dr > b is East Eranian. GIP.I², 76, 414. The \bar{e} is due to epenthesis of i (see GIP.I², 34). Cf. 'House.'

Ring (see 'finger-ring').

See.—B. \sqrt{war} ; W. \sqrt{rer} . Cf. Av. vaen-ami, I see; Prs. $b\bar{n}$, seeing; Wkh. $w\bar{n}-am$, I see.

K. $\sqrt{a}wes$; Ks. \sqrt{wuch} . Deriv. to me doubtful. Several suggest themselves. Cf. (e.g.) Ghalcah \sqrt{vis} (Tom. 857), or Skr. $v\bar{v}ks$.

P. \sqrt{las} ; Gar. \sqrt{lith} . Cf. Skr. \sqrt{ds} , ppp. dsta.

Kh. \sqrt{pos} ; M. \sqrt{pas} ; Š. \sqrt{pac} , (dial.) \sqrt{pas} . Cf. Skr. \sqrt{pas} , pasyati.

V. uskō-zi, having seen (? deriv.).

K. *jag-a*, he saw (? deriv.).

G. $t\bar{a}$ -ns, he saw (? deriv.).

Self.—V. š \tilde{o} ; W. š \tilde{u} . Cf. Av. $\chi^{v}a$ -t \tilde{o} ; Skr. sra-; Prs. χ^{u} -d; Šg. χ^{u} .

W., G. tanu (own); P. tāni-k; Kh. tan; M. tǎ; Gār. tanī (own); Š. tomō; Kś. pāna. Cf. Skr. ātman-; Shb. ata-; Pr. appa-.

G. phu-ka (?).

Send.—V. \sqrt{es} ; G. \sqrt{sa} ; Kh. \sqrt{wes} . Cf. Skr. \sqrt{is} , *esati.*

W. prešya, he was sent. Cf. Skr. prēsita-.

Share, division.—B. bar-este; V. but-og; W. mat-ini;

K. baš; P. wanțe; G. *Jbenț*, divide; M. baţ-ha. Cf. Skr. *Vvaț*, vațati; *Jvanț*, vanțati.

Shoe.—B. wača; V. wezil; W. wačai (? deriv.).

G. kōš-aṛ; Kh. kauš; M., Gār. kōš; Kś. kūš. Cf. Prs. kajš.
Silver.—B. aru, ariu; V. iuri; W. ārei; K. rāwā;
G. rup; Š. rāp; Ks. rvap (pron. rop). Cf. Skr. rāpa-

Kh. $dru\chi m$. Cf. Greek $\delta \rho a \chi \mu \eta$ (Tom. p. 895).

Singing, a song.—B. lālu; V. lol. (?) Cf. Skr. āhlāda-, rejoicing, or *lal*, sport.

K. gũro; P. gē; M. gēla. Cf. Skr. gāna-.

Kh. baše-ik. Cf. Skr. vādya-.

Sister.—B. sus; V. siusu; W. sōs; G. sase; P. sāi; Kh. ispusār; Tirhai, spaz; Gār. išpō, (dial.) šū; Š. sah. Cf. Skr. srasār-; Av. $\chi^{vaihhar-}$; Wkh. $\chi \ddot{u}i$. This word, therefore, branched from the Aryan stock before the development of the Eranian χ . The preservation of the long \bar{a} in Kh. ispusār is remarkable.

M. bhē; Kś. byaña (pron. benye). Cf. Skr. bhaginī; H. bahin or bhain.

Sit.—B. $\langle ni\tilde{z}; W. G. Kh. \langle ni\tilde{s}; K. \langle nis; P. \langle n\bar{\imath}. Cf. Av. nišhidaiti, he sits; Prs. <math>ni\tilde{s}\bar{\imath}$ -n, seated; Skr. $ni-\sqrt{sad}$, $nis\tilde{\imath}dati$.

V. $\sqrt{bi\delta l}$, $\sqrt{a\delta l}$. Cf. Skr. upa- (or ava-) $s\bar{\imath}dat\bar{\imath}$. The final l, however, points rather to an Av. δ .

M. √bhai; Gār. √bai; Š. √bē; Kś. √byah (pron. beh). Cf. Skr. upa-viśati; H. √bais.

Slave.—B. $lon\bar{e}$; W. lar er; G. law and; P. law ant. Cf. Prs. lar and, a volunteer. Probably confused with H. $laund\bar{a}$.

Son.—B. *pitr*, *putr*; V. *piè*; W. *piutr*; K. *pātr*; G. *pult*; P. *puțhlē*; M. *pāțh*; Gar. *puț*, (dial.) *pāc*; Š. *puc*, (dial.) *puš*. Cf. Av. *puθra*-; Wkh, *pötr*; Šg. *puč*; Sq. *pöč* (GIP, I², 303; Gray, 567); Prs. *pus*, *pusar* (GIP, I², 86); Skr. *putra*-: S. *puțu*.

Kh. *žau*, *au*. Cf. Prs. *zeh*, a child; Av. \sqrt{zan} ; Skr. \sqrt{jan} . Not likely to be derived from Skr. *jāta*, as *t* is rarely elided.

Kś. gwabur (pron. gobur). Cf. Bengali, gābhur, a youth. Star.—B. rašta; V. ištī-kh; Kh. istāri; P. sitāra (loanword). Cf. Av. star-; Wkh. står; Yd. stāre; Prs. sitāra.

W. tarã; K. tāri; G. tāre; P. tārā; M. tāra; Š. tārū; Kš. tāru-kh. Cf. Skr. tārā.

In B. there has been metathesis of r. In V. there has been elision of r.

Sun.—B. $s\bar{u}$; V. isi-kh; W. $s\bar{o}i$; K. $s\bar{u}ri$; G. suri; P. sur; M. $su\bar{v}r$; Gār. $s\bar{v}r$; Š. $s\bar{u}r\bar{v}$; Kś. $sir\bar{v}$. Cf. Skr. $s\bar{u}rya$ -.

Kh. yör. Cf. Av. ayara-; Wkh. yīr.

Tongue.-B. dič; V. luzu-kh; Kh. ligi-ni.

W. jip; K., Š., P. jib; P. also jub; Gār. $j\overline{i}bh$. Cf. Skr. $jihr\overline{a}$.

G. zib; M. zēb; Kś. zēo. Cf. Av. hizū-; Šg. zēv; Sq. ziv.

The Kś. $z\bar{e}o$ can hardly come direct from $jihv\bar{a}$, as that language preserves j unchanged before i or e in Indian derived words.

Tooth.—B. dutt; V. let-em; W. dñt; K. dand-ōria-k; G. dàt; P. dānd, dānt; Kh. don; M. dān; Gār., Kś. dand; Š. dōn. Cf. Av. dantan-; Prs. dandān; Yd. lad; Mj. lādi; Skr. danta-.

Water.—B. $\bar{o}r$, $a\bar{o}$; V. $\bar{a}v$ -eh; W. ao; K. u-k; G. $a\bar{n}$; Kh. \bar{u} - γ ; M. $w\bar{\imath}$; Găr. \bar{u} ; Š. wei, $w\bar{o}\bar{\imath}$, $w\bar{e}$; Kś. $\bar{a}b$. Cf. Av. $\bar{a}p$ -; Wkh. $v\bar{\imath}$ -k; Mj. yau- $\gamma\bar{a}$; Pš. $\bar{o}ba$; Kurd (Kurmanji), $\bar{a}we$; Skr. ap-.

P. war-k. Cf. Av. vāra-, rain; Prs. bārān; Wkh. wür; Skr. vār-, water.

What?—B. $k\bar{e}$, kai; W. kas; G. ki; K. $k\bar{\imath}a$; P. $k\bar{o}$; Kh. kya; Gār. kai; M. $g\bar{\imath}$; Š. keh (why?); Kś. $ky\bar{a}h$. Cf. Av. Skr. ka-.

V. pseh. (?) Cf. Av. crant-, with metathesis of cv, vc > ps. Cf. V. pche, why?, which is apparently another form of the same word.

Š. *jek*, (dial.) *žok* (? deriv.). Can it be connected with Av. *ca*-, or possibly M. $g\bar{i}$ (see above) > Š. *je*-?

Woman, wife.—B. W. $i\delta tr\bar{\iota}$; V. westi; K. istri; G. δi - $g\bar{a}l\bar{\iota}$; P. $\delta l\bar{\iota}-k\bar{a}$, $hl\bar{\iota}-k\bar{a}$; Gār. is; S. cei, (dial.) $\delta hr\bar{\iota}$ -ga, $\delta ha\bar{\iota}$; Ks. $tr\bar{e}\bar{\iota}$, trai. Cf. Wkh. $str\bar{e}i$; Sq. stir; Skr. $str\bar{\iota}$. The preservation of tr is typical.

B. jugûr.

W. $m\bar{e}\check{s}i$; G. $ma\check{s}i$; P. $m\bar{a}\check{s}\bar{i}$. These are feminines of the corresponding word for 'man.'

Kh. kimēri. (?) Cf. Skr. kumārī, a virgin.

PART II

PHONOLOGICAL DETAILS

I. $\mathbf{a} = \mathbf{a}$.—Skr. aiguli-, aiguri-, Prs. augulī ; B. augyur, W. āgūr, K. augurya-k, Gār. augir, Š. agui, Kś. auguj^ā, a finger ; but V. igi.

Prs. angušt-ar; B. angušti, W. agušto, K. angušt-ar, P. angoc-^ak, Gār. angusir, a finger-ring; but V. $wogi\chi$.

Skr. aingāra-, agni-, Prs. angišt; B. angā, $ag\overline{o}$, V. an-ekh, K., G., P., Kh. angār, Gār. $\partial gār$, M., Š. agār, M., Kś. $n\overline{a}r$, Š. $hag\overline{a}r$, fire.

Av. aspa-, Prs. asp ; S. $a \not s p \overline{o}$, $a p \not s$, a horse.

Av. antar, Skr. antar, Prs. andar; B. atē, atēr, W. attar, G. atra-n, Kh. andr-ēnī, Kś. andar, within; but K. uδrī-man.

Av. χara-, Skr. khara-; Kś. khar, an ass; but B. kur; V. kōru; P. kār.

Skr. gardabha- ; W. G. Gār, gadā, K. gardō-k, M. ghadā, an ass ; but Kh. gurdō- γ .

Av. Skr. \sqrt{kar} ; M. Gār. P. Kś. \sqrt{kar} , do; but others \sqrt{kar} , ker, kör.

Av. karəna-, Skr. karya-; Kś. kan; but others kār, kör, etc., an ear.

Skr. tata-; W. tata, Kh. tat, a father; but others tāt, tot. Skr. manuja-; B. manje, Š. manužō, a man; Skr. mānuša-; B. mancī, W. manaš, G. manuš, Kś. mahan-ivu, a man.

Skr. \sqrt{rat} , B. \sqrt{bar} , W. \sqrt{mat} , P. \sqrt{want} , M. \sqrt{bat} , share; K. baš, a share; but V. \sqrt{but} .

81

Av. dantan-, Prs. dandān, Skr. danta-; K. dand-ōria-k, G. dāt, Gār. Kś. dand, a tooth; but V. let-em, W. dằt, Kh. don, P. dānd.

2. a>ä.—P. kār, ass. See No. 1.

Skr. dirasa-; W. wās, G. bā, P. dawās, dwās, a day; but K., Kh. bas, Kś. dwah.

K. \sqrt{kar} , do. See No. 1.

Skr. \sqrt{nas} , nasyati ; K. \sqrt{nas} (compensatory lengthening), die.

W. P. Kh. $k\bar{a}r$, M. $k\bar{a}n$ (compensatory lengthening), an ear. See No. 1.

K. $h\bar{a}\check{s}$ (through $a\check{s}p$, $*a\check{s}\check{s}$; compensatory lengthening), a horse. See No. 1.

M. mas (through manusa-, *mausa) (really u + u > a). See No. 1.

P. dānd; M. dān, tooth. See No. 1.

Skr. nasta-; P. nāst, Š. nātō (compensatory lengthening), K. nātc-ur, but M. nath-ūr. Š. also nutō, Kś. nast, nose.

Skr. \sqrt{pas} , pasyati; Š. (dial.) \sqrt{pas} (compensatory lengthening); but Kh. \sqrt{pos} , M. \sqrt{pas} , Š. \sqrt{pac} , see.

3. $\tilde{\mathbf{a}} = \tilde{\mathbf{a}}$.—Av. $\tilde{a}p$ -; V. $\tilde{a}v$ -ch, water. Others, $\hat{a}v$, $\tilde{o}c$, etc.

Av. brātar-, Prs. birādar, Skr. bhrātar-; W. brā, K. bāya, P. lāī, Kh. brār, M., Š. žā, Gār. jā, brother; others, bröh, brå, way-eh, etc.

P. $tat\bar{i}$, father. See No. 1.

Šg. dād; K. dādā, father.

Skr. angāra-; B. angā, K., G., P., Kh. angār, Gār. agār, M., Š. agār, Kś. nār, fire; others agā, an-ekh, etc.

Skr. vāla-; M. bāla, Gār. bāl, Š. bālī, Kś. wāl, hair.

Skr. māsa-; W. Kh. mās, G. māsoi, moon; others mōs, mas, etc.

Skr. as-, asya-; W. aš, M., Gar. $a\tilde{i}$, Š. $a\tilde{i}$, $az\tilde{i}$, Kś. as^i , mouth; for others see Nos. 4 and 5.

Av. star-, Yd. stāre, Prs. sitāra; Kh. istāri; but B. rašta, V. ištī-kh, a star.

Skr. tārā ; K. tāri, G. tāre, P. tārā, M. tāra, Š. tārā, Kš. tāru-kh ; but W. tarā, a star.

4. $\tilde{\mathbf{a}} > \mathbf{a}$.—Skr. $\tilde{a} + \sqrt{n\tilde{\iota}}$; G. Kh. Kś. \sqrt{an} , bring; but K. \sqrt{an} .

V. way-ch, a brother. See No. 3.

Skr. \sqrt{khad} ; M. \sqrt{kha} , Š. \sqrt{ka} , eat; but Gar. \sqrt{kho} , Kś. \sqrt{khi} .

V. mas-ekh, moon. See No. 3.

B. aži; B., K. aši, G. hāsi, mouth. See No. 3.

Skr. nāsā, nāsikā; B. naz-ur, W. nasū, G. nāsi, Kh.

nas-kā-r, nose; V. has nes, and Gār. has nōz-ōr, Cf. No. 2. W. tarā, a star. See No. 3.

5. $\mathbf{\ddot{a}} > \mathbf{\ddot{i}}$.—In many cases this is due to the influence of a neighbouring sibilant, h, y, or palatal, GIP. I², 24.

Av. paršti-, Prs. pušt; G. pišți, K. pišțo, back. The *a* is preserved in W., Gār., Š., Kš., and others, and as in Prs. becomes *u* in Š (dial.), Kš. (also). In B. $pt\bar{i}$, $kt\bar{i}$, V. $k\check{c}ch$, it is syncopated.

Kś. "khi, eat. See No. 4. (Probably through khāda., khāa., khāya, khya.)

Av. $a\dot{s}i$ -; V. $i\dot{z}i$, G. $i\dot{c}i$ -n: Skr. akgi-; Gār. ith, eye. All due to epenthesis. Other forms depending on epenthesis are Kh. γec , K., Kh. ec, M. ainch, Kś. geh^i . Original *a* preserved in B., W. $ac\tilde{e}$, P. anc, Š. $ach\bar{\iota}$, $\bar{a}ch\bar{e}$.

V. *igi*, finger. See No. 1.
Kh. √dī; Kś. √di, give. See No. 6.
B. *dič*, ten. See numerals.
Compare Skr. *ghana-*; Gār. *giān*, great. See No. 8.

6. $\mathbf{\check{a}} > \mathbf{\check{e}}$.—Skr. divasa-; V. ves, Š. dēs; cf. M. dis, a day (due to influence of preceding *i*).

K. Kh., cc, eye (due to epenthesis). See No. 5. 6-2

Av. \sqrt{kar} ; Pāmir dialects, \sqrt{kar} , \sqrt{ear} ; W. \sqrt{eher} , G. \sqrt{ker} , do (through $\sqrt[*]{kyar}$).

Av. $\bar{a}\theta r$ -, Mj. $y\bar{a}r$, Yd. $y\bar{a}r$; W. $\tilde{e}r$ (through influence of preceding y), fire.

Av. $\sqrt{d\tilde{a}}$; K. \sqrt{de} , P., Š. $\sqrt{d\tilde{e}}$; cf. Kh. $\sqrt{d\tilde{\iota}}$, Kś. \sqrt{di} , M. \sqrt{dai} , give. But Gãr. \sqrt{da} .

Gār. $m\bar{e}\check{s}$, man (Skr. manuṣya- > ma(n)yṣa). See No. 1. V. nes, nose (epenthesis of *i* in $n\bar{a}sik\bar{a}$). See No. 4. Cf. Šg. nej (Eranian).

Av. dvar-, Skr. drār, Prs. bēr- $\overline{n}n$; B. ber- $\overline{\tilde{u}}$ or bar, V. be, W. ber, G. berā, Kh. bēri, out. But P. d $\overline{o}r$ ē, Š. dar \overline{u} . Due to epenthesis. See vocab.

G. \sqrt{bent} , share. See No. 1.

S. deii or $da\bar{\imath}$, ten. See numerals.

7. $\hat{a} > a\tilde{i}$.—M, *ainch*, eye (epenthesis). See No. 5. M. \sqrt{dai} , give. See No. 5. Š. $d\bar{a}\bar{i}$, ten. See numerals.

8. $\check{\mathbf{a}} > \hat{\mathbf{a}}$, $\check{\mathbf{u}}$, o.—The change of a to o, and of \bar{a} to \mathring{a} is common in East Eranian. (Cf. GIP. I², p. 295.) In Afrīdī Pś. the change of \bar{a} to \check{a} is universal. The further change of \mathring{a} or o to $\bar{\sigma}$, and thence to \check{a} is easy. In Wazīrī Pš. every a becomes \bar{o} . In Shb. there are several instances of a > u.

B. kur, V. koru, ass. See No. 1.

Kh. $gurd\bar{o}$ - γ , ass. See No. 1.

Š. (dial) pūtū, Kś. pušt, back. See No. 5.

K. $\sqrt{\sigma}n$, bring. See No. 4.

B. bra, broh, Kś. bay^{u} , brother. See No. 3.

Skr. daņda-; S. ddād^u, K. dōn, Š. dōnō, but Kś. dād, a bull.

Skr. divasa-; Gār. dōs, Kś. dwah, doh (vocalization of w). Other forms, V. ves, M. dis, Š dēs, W. wās, K., Kh. bas, G. bā, P. dawās, dwās.

B., Kh. \sqrt{kor} , do. See No. 6. B. $k\bar{o}r$, K. $kug\bar{o}$, $kr\bar{o}$, Š. $k\bar{u}n$, $k\bar{o}n$, ear. See No. 1. Gār. $kh\bar{o}$, eat. See No. 4. B. tot, tott, father. See No. 1.

Skr. ghana-; K. yona, M. yö, but P. gan, Gar. gian, great.

Av. zasta-, O. Prs. dasta-; B. dušt, dui, V. lust, W. došt; Skr. hasta-; Kh. host, but K., P. hāst, G. hast, P. hās, M. hā, Š. hatth, Š., Kś. hath, hand.
B., W. ošt, Kh. ošt, eight. See numerals.
W. dōš, Kh. još, ten. See numerals.
B. ušp, horse. See No. 1.

K. uδrī-man, inside. See No. 1.

V. muš, Š. mūš, K. mõc, Kh. mõš, man (contraction of au \sim

< anu). See No. 1.

B. $m\bar{o}s$, moon. See No. 3.

Gār. $n\bar{o}z\bar{o}$ -r (cf. Sq. naz), nose. See No. 4.

V. *\but*, share. See No. 1.

Skr. gana-; K. guyo, a song.

Av. ayara-, Wkh. yīr; Kh. yār, sun.

Kh. don, S. don, B. dutt, W. $d\tilde{a}t$, tooth. See No. 1.

Av. $\tilde{a}p$ -, Kurd. $\bar{a}we$, Pš. $\bar{o}ba$; B. $\tilde{a}o$, $\bar{o}v$, W. ao, K. u-k, G. $a\bar{u}$, Kh. \bar{u} - γ , Gār. \bar{u} , Š. $w\delta\bar{i}$, but V. $\bar{a}v$ -eh, M. $w\bar{i}$ (cf. Wkh. $v\bar{i}$ -k). S. (also) wei, $w\bar{c}$, Kś. $\bar{a}h$, water.

Skr. karman-; Š. krom, work.

Skr. grāma- ; K. grōm, village.

9. Aphæresis of a.—Aphæresis of a is not uncommon in Indo-Aryan. In modern Persian it is regular before a single consonant (GIP. I², p. 20).

Av. apərənāyu-; B. parmy, child.

M. Kś. $n\bar{a}r$, fire. See No. 1.

10. Aphæresis of \bar{a} .—Aphæresis of \bar{a} is not uncommon in Eranian (GIP, I², p. 22).

Skr. ātman-, Shb. ata-, Pr. appa-; W., G. tanu, P. tāni-k, Kh. tan, M. tā, Gār. tanī, Š. tomō, Kś. pān^a, self.

Av. $d\bar{p}$ -, Wkh. $v\bar{i}$ -k, Mj. yau- $\gamma \bar{a}$; M. $w\bar{i}$, S. wei, $w\bar{o}\bar{i}$, $w\bar{e}$. See No. 8.

B. $ag\delta$, fire. See No. 1.

II. Prothesis of \check{a} .—Av. $\sqrt{p}\partial r\partial s$, Skr. \sqrt{prach} , Pr. \sqrt{pucch} ; K. $\sqrt{aph\bar{u}c}$, ask, but Kś. \sqrt{prich} .

Av. gār-, Šg. žār, Sq. žao (GIP. 1², 300); B. aže, ašu, but V. že-št, bull.

S. $a \check{z} \check{e}$, as compared with *jai*, etc., mother.

Skr. rūpa-; B. aru, ariu, but V. iuri, W. ūrci, K. rūwā, G. rup, Š. rūp, Kś. rvap, rop, silver.

12. Syncope of a.—This is very common in B. Examples are: B. *ptī*, *ktī*, V. *křeh*, back. See No. 5.

Av. mərəγa- ; B. maran-gač, or mŗenze, a bird.

13. $\check{i} = 1$.—Av. \sqrt{i} , ay, go, $\bar{a} + \sqrt{ay}$, come, Skr. \sqrt{i} , go; K. \sqrt{i} (h), Kś. \sqrt{yi} , come, but P. $\sqrt{y\bar{e}}$, M. \sqrt{ai} .

Skr. śīrṣa-; K., M., Š. šīš, šiš, head.

Av. nišhidaiti, Skr. nisīdati, he sits; B. $\sqrt{ni\tilde{z}}$, W., G., Kh. $\sqrt{ni\tilde{s}}$, K. \sqrt{nis} , but P. $\sqrt{n\tilde{i}}$, sit.

Skr. $jihr\bar{a}$; W. jip, K., S., P., jib, but P. also jub, Gar. $j\bar{\imath}bh$, tongue.

Skr. strī, Wkh. strī, Sq. stir; B., W., ištrī, P. šlī-kā, V. westi, K. istri, Gār. īs, Š. čhri-ga, but Š. also cei, čhaī, Kš. trī, trai, a woman.

14. i > I.—Skr. *śiras-*; P. *šīr*, K*ś*. *hīr*, head. P. $\sqrt{n\overline{i}}$, sit. See No. 13. Gār. *jībh*, tongue. See No. 13.

15. $\tilde{i} > \tilde{e}$, ai, $\tilde{e}\tilde{i}$.—In Š. *ai* and $\tilde{e}\tilde{i}$ are convertible.

P. $\sqrt{y\bar{e}}$, M. \sqrt{ai} , come. Doubtful. These probably represent the Skr. $\bar{a} + \bar{e}ti$.

S. cei, čhaī, Kś. trēī, trai, a woman. See No. 13.

16. i > u.—V. *luzu-kh*, as compared with B. *dié*, Kh. *ligi-ni*, a tongue.

P. jub, a tongue. See No. 13.

17. Insertion of i, y, or e.—Cf. the English dialectic

pronunciation of u as yu, as in 'Lyucy' for 'Lucy.' Cf. also the pronunciation of such words as 'duty.' This is common before \tilde{a} or \tilde{o} . V. *iul*, belly. See Vocab. Av. uštra-, Wkh. üštür; B. štyur, V. ištiur, a camel. Kś. $k\bar{u}r^{\bar{u}}$, but V. kiur, a child. Skr. mukha-; B., W. myuk, but Gar. mūka, a face (see 'before' in Vocab.). Av., Skr., dūra-; B. dyur, dyor, Gār. dēor, far. B. angyur, finger. See No. 20. B. kyur, a foot. See No. 20. Skr. kukkuta- ; W. kiukiu, a fowl. V. $\delta i \tilde{u}$, as compared with B. $s \bar{u} u$, gold. Skr. $r\bar{u}pa$ -; B. aru or ariu, V. iuri (with metathesis of u), silver. Av. $pu\theta ra$ -, Skr. putra-; W. piutr, a son. B. dia, Kh. $j\bar{a}$, two. See numerals. Cf. No. 81. 18. Prothesis of i.—Common in Eranian. Gray, 34.

Av. uštra-, Wkh. $\ddot{u}st\ddot{u}r$; V. $\dot{s}t\dot{u}r$ (with metathesis of u), but B. styur, a camel.

Av. stawra-; V. wistar (prothesis of wi), great.

Av. staora-, Prs. ustor; Kh. istor, a horse.

Wkh. $c\bar{o}\gamma$; V. iša, but B. $c\bar{o}$, W. $c\bar{u}$, a kid.

Skr. srasār-; Kk. ispusār, Gār. išpō, a sister, but Tirhai, spaz.

Av. stār-, Prs. sitāra; V. ištī-kh, Kh. istāri, but B. rašta, a star.

Skr. sārya-; V. isi-kh, but B. sā, W. sōi, the sun.

Skr. $str\bar{i}$; V. westi (for wisti, as in wistar above), K. istri,

Gār. $\overline{\imath}s$ (this may be metathesis), a woman.

With the last example, cf. Shb. istri.

19. Syncope of i.—(Gray, § 32, notes this as rare, and gives only one example,—from Eranian.)

Wkh. piš, Prs. pušak; B. pišaš, or pšīaš, V. pši-kh (these are rather instances of metathesis), G. psasi, cat.

Skr. bidala- ; Kś. $brar^{\tilde{u}}$, cat.

Shr. divasa-, day. This became *dvas, from which all the following are derived: V. ves, W. wās, K., Kh. bas, G. bā, P. dwās (also dawās), Gār. dōs, Š. dēs, Kś. dwah, dōh. In ves, dēs, the *i* has influenced the following vowel before apocope. In M. dis it has survived.

Skr. nasika; Kh. naska-r, a nose. See No. 4.

20. $\mathbf{\tilde{u}} = \mathbf{\tilde{u}}$ (or w).—O. Prs. **ava* + $\sqrt{st\bar{a}}$; B. \sqrt{ut} , \sqrt{wut} , G. $\sqrt{us't}$, K. $\sqrt{us't}$, P. \sqrt{ur} , M. \sqrt{uth} . But also B. W. $\sqrt{os't}$, Ks. \sqrt{woth} , arise. Cf. Horn, 84.

Skr. mukha-, face; B. pa-myuk, W. myuk-ne, Gār. mūka, muthõ, M. mūţhõ, but V. ti-mikh, Š. mōcõ, mỗžē, before.

Av. uštra-, Pš. $\bar{u}\chi$; B., štyur (metathesis of u), V. ištiur (ditto), W. $\bar{u}k$, G., M. $\bar{u}\chi$, camel.

Skr. uștra-; K., Kh., Ś., uț, Kś. wùțh, Găr. ūțh, a camel. Av., Skr., dūra-; P., M., Š., Kś. dūr, G. durae, but B. dyur, dyor, K. dē-ša, Kh. do-dēri, Gār. dēōr, far.

Skr. anguli-, anguri-, Prs. angulī; B. angyur, W. ãgur, K. angurya-k, Š. agui, Kš. anguj^a, but V. igi, Gār. angir, a finger.

Skr. khura-; B. kãr, kyur, K., G., Gār., M. khur, but Kś. khōr, Š. küti, a foot.

Skr. kukkuţa-; W. kiukiu, G. kukuŗ, P. kukūr, Kh. kūkū, M. kūkõ, Gār. kūkur, kugū, Kś. kwakur, kokur, but Š. kankōrō-cō, a fowl, a cock.

Skr. cūdikā; K. cūri, but W. coro-k, hair.

Skr. bubhukṣā; Kh. chuī (with metathesis of u), M. būcha, Gār. būțhō, hunger.

Skr. rāpa-; W. ārei, K. rāwā, Š. rāp, B. aru, ariu, V. iuri, G. rup, but Kś. rvap, rop, silver.

Av. $pu\theta ra$ -, Skr. putra-; B. putr, W. piutr, G. pult, P. $puthl\bar{e}$, Gār. put, $p\bar{u}c$, Š. puc, $pu\bar{s}$, K. $p\bar{u}tr$, M. $p\bar{u}th$, but B., also pitr (probably from *piutr), V. $pi\bar{e}$, a son.

Skr. sārya-; B. sā, K. sāri, Š. sārī, G. suri, P. sur, but V. isi-kh, W. sōi, M. suīr, Gār. sīr, Kś. sirī, the sun.

21. Initial u, sometimes > wu, wo.—Common in East Eranian (GIP. I², 298). The universal rule in K[≤]. B. √wut, K[≤]. √woth, arise. See No. 20. K[≤]. wũțh, a camel. See No. 20. Cf. No. 263.
22. u > ū.—K. √ūšț, arise. See No. 20. M., G. ūχ, Gār. ūțh, camel. Here we have compensatory lengthening, but not in K., Kh., Š. ũț, K[≤]. wũțh. See No. 20. Skr. puṣpa-; K. pūš-ik, a flower. Compensatory lengthening. P. kukūr, Kh. kūkū, Gār. kūkur, kuyū. See No. 20. Here there is only compensatory lengthening in kūkur. K. pūtr, M. pūțh, Gār. pūc, son. See No. 20.

23. $\mathbf{\check{u}} > \mathbf{\check{o}}$.—Cf. Wkh. $u > \ddot{o}$ (GIP. I², 294). B. W. $\sqrt{o} \dot{s} t$, arise. See No. 20. Ks. $kh\bar{o}r$, foot. See No. 20. S. $kank\bar{o}r\bar{o}\cdot c\bar{o}$, fowl. See No. 20. Kh. $dr\bar{o}$, hair, as compared with B. dru, $\dot{z}u$, V. $\dot{z}ui$. Ks. $b\bar{o}ch\bar{a}$, hunger. See No. 20. Ks. rop, silver. See No. 20.

24. $\mathbf{u} > \mathbf{\ddot{u}}$.—So in Sq. (GIP. I², 294). Š. *küti*, foot. See No. 20. Š. $d\bar{u}$ or $d\bar{u}$. See numerals. In both cases due to a following *i*.

25. $\breve{\mathbf{u}} > \mathbf{a}$.—Š. $kank\bar{o}r\bar{o}$ - $c\bar{o}$, a fowl. See No. 20. Av. $b\bar{u}za$ -; W. wasei, but B. wez-eh, a she-goat. This change also occurs in Shb. In Pš. $\bar{u} > a$ before nasals and r, GIP. I², 208.

26. $\check{u} > \check{i}$, \check{e} .—In Wazīrī Ps., \bar{u} is regularly changed to $\bar{\iota}$.

V. \sqrt{i} , Gar. \sqrt{i} , arise. Doubtful. See Vocab.

-26]

V. *ti-mikh*, in front. See No. 20.

Kh. do-dēri, K. dē-śa, far. See No. 20. These are doubtful.

V. igi, Gar. angir, finger. See No. 20.

V. $w \bar{o} g i \chi$, a finger-ring. See No. 1.

B. wez-eh, a she-goat. See No. 25.

B. pitr, V. pie, a son. See No. 20. Cf. Prs. pisar.

M. swīr, Gār. sīr, Kś. sirī, sun. See No. 20.

Due to the influence of the following y of $s\bar{a}rya$.

27. Aphæresis of u.—Skr. upa-viśati, he sits down; M. √bhai, Gār. √bai, Š. bē, Kś. byah, beh, sit.

28. Metathesis of \check{u} .—B. *štyur*, V. *ištiur*, camel. See No. 20.

V. iuri, W. ārei, silver. See No. 20.

29. Prothesis of u.—V. $u \pm \bar{u}$, six. See numerals.

30. Syncope of ū.—This is most common in B.
K. kurö or krö, ear. See No. 47.
Mj. pāser, Yd. pāsr; B. pšai or šei, a head.
B. √psē, V. √psā, as compared with W. √pus, lose.
B. kuri or krūī, a dog.

31.— $\mathbf{r} > \mathbf{\check{a}}$.—Common in India. Rare in Eranian. Skr. $\sqrt{n_{i}t}$, $n_{i}tyati$; B. $\sqrt{n\bar{a}t}$, P. $\sqrt{n\bar{a}t}$, V., W., K., G. \sqrt{nat} , $\mathbf{\check{S}}$. \sqrt{nath} or nat, Ks. \sqrt{nac} , but B. also $\sqrt{n\bar{o}t}$, M., Gār. $\sqrt{n\bar{e}t}$, dance.

Skr. $k_{\bar{v}}kav\bar{a}ku$ -, a cock; B. kakak, V. $kakok\bar{u}$, K. kakawak, a fowl.

Skr. \sqrt{drs} , ppp. drsta-; P. \sqrt{las} , but Gar. \sqrt{lith} , see.

32. r > i.—Gār. \sqrt{lith} , see. See No. 31. In Pais. r becomes i; drsta > tittha.

33. $r > \bar{e}$.--M., Gar. $\sqrt{n\bar{e}t}$, dance. See No. 31.

[27-

34. $r > \bar{o}$.—B. $\sqrt{n\bar{o}t}$, dance. See No. 21.

35. r > or.-Skr. *rksa-*; Kh. *orč*, a bear. See Tom. p. 894.

36. r > re, le.—Skr. rsabha-; Kh. resä, a bull, but lesä, a cow. The distinction is interesting. In C. Pais. r may optionally be changed to l.

37. $\mathbf{\tilde{e}} = \mathbf{\check{e}} > \mathbf{ya}, \mathbf{\check{a}}$.—Skr. kēśa- ; G. khēs, hair.

Skr. $\bar{e}sati$, he sends; V. $\checkmark es$, Kh. $\checkmark wes$, but G. $\checkmark sa$, send.

Skr. prēsita- ; W. prešya, sent.

Skr. ē-ka-, Phl. ēv-ak, Prs. yak; W., K., S. ek, G. yak, Kś. akh, Gār., M. ak, one. See numerals.

Av. aēra-; B. ē, er, Gār. ā, one. See numerals.

38. $\bar{\mathbf{e}} > \bar{\mathbf{i}}$.—Possibly K. $u\delta r\bar{\imath}$ - for Av. antarə is an example. See No. 1.

Av. aēra-; W., P., Kh. i, V. ip-ia, one. See numerals.

39. Aphæresis of \tilde{e} .—G. \sqrt{sa} , send. See No. 37.

40. Metathesis of e.—Av. antaro; B. ater, inside. See No. 1.

41. Prothesis of $\bar{\mathbf{e}}$.—Av. $g\bar{a}v$ -, Sq. $\bar{z}ao$ (GIP. I², 300); G. $e\bar{c}\bar{i}$, but B. $a\bar{z}e$, V. $\bar{z}e$ - $\bar{s}t$, a bull.

42. ai > ei.—So in Sq. (GIP. 1², 296).

In Š *ai* and *ei* are convertible. Thus: S. *cei*, *čhaī* or *čhrī-ga*, Kś. *trēī*, *trai*, a woman. Cf. Wkh. *strēi*. See No. 13.

43. ai > oi.—(?) Skr. *jāyatē*, he is born, *jāyā*, a wife; W. *oie*, but G. *jai*, Š. *āžē*, K. *āya*, P. *āī*, a mother.

-43]

44. $\bar{\mathbf{o}} = \check{\mathbf{o}}, \, \mathbf{a}$.—Skr. króda- ; K. gro, breast.

Av. $g\bar{a}v$ -, Śg. $z\bar{a}v$, Sq. zao (GIP. I², 300), Bal. $g\bar{o}$ -, Skr. gav-, $g\bar{o}$ -; G. $g\bar{a}$, M. $g\bar{o}$, P. $g\bar{o}$ - $l\bar{a}ng$, Š. $g\bar{o}$ - $l\bar{o}$, but B. aze, azu, V. ze-zt, a bull; B. $g\bar{o}h$, gao, Š. $g\bar{o}$, but V. $g\bar{a}$ -th, W., P., M. $g\bar{a}$, K. ga-k, Gar. $ga\bar{e}$, Ks. $ga\bar{o}$, G. $e\bar{c}\bar{i}$, a cow.

Skr. $gh\bar{o}ta$ -ka-; G. gora, M. $gh\bar{o}$, Gār. $g\bar{o}r$, P. $g\bar{o}r\bar{a}$, but W. gur, Kś. gur^{u} , a horse.

P. $g\tilde{o}\check{s}^{a}$ -g, $g\tilde{o}\check{s}i$ -ng, M., Š. $g\bar{o}t$, Š. $g\bar{o}\check{s}$, $g\bar{o}\check{z}$, a house. See Vocab.

45. $\bar{o} > \check{i}$, e.—In Wazīrī Pš. \bar{o} is regularly changed to \bar{e} . Cf. also Av. gaoša-, Wkh. $\gamma i\check{s}$, ear.

B. aže, V. že-št, a bull, G. ečī, a cow. See No. 44.

46. $\bar{\mathbf{o}} > \ddot{\mathbf{u}}$.—Cf. Av. gaoša-, Yagnōbī, guš, Yd. $\gamma \bar{u}$, ear. W. gur, Kś. gur^u, a horse. See No. 44.

47. $\mathbf{k} = \mathbf{k}$.—As in Paiš. k is preserved whether initial or medial, but examples of the latter are not decisive. Thus:

Av. Skr. \sqrt{kar} , do; B., Kh. \sqrt{kor} , K. \sqrt{kar} , G. \sqrt{ker} , P., M., Gār., Kś. \sqrt{kar} , but W. \sqrt{cher} , do.

B. kuri, krūi, V. kiru-kh, keru-kh, M. kūsar, Gār. kūcur, dog. See Vocab.

Skr. karņa-; B. kör, W., Kh., kār, P. kār, K. kurŏ, krŏ, M. kāņ, Š. kūn, kōn, Kś. kan, but G. kham-ţa, Gār. kyan, ear.

Skr. k_rkavāku-, a cock; B. kakak, V. kakokū, K. kakawak, fowl.

Av. Skr. ka-; B. kē, kai, W. kas, G. ki, K. kīa, P. kō, Kh. kya, Š. keh, Kś. kyāh, Gār. kai, but M. gī, what?

Skr. \bar{e} -ka-, Phl. $\bar{e}v$ -ak; W., K., Š. ek, G. yak, Gär., M. ak, but Kś. akh, one See numerals.

48. k > kh, $\chi > \gamma$.—This occurs frequently in V. where the termination k is commonly represented by kh, as in V. war-ekh, a house, mas-ekh, moon, *ištī-kh*, star. See No. 3. In K's. every final k must become kh, as in $t\bar{a}ru$ -kh, a star. See No. 3.

Initial k regularly becomes kh in some East Eranian languages, and the change also occurs in the following:

Skr. kēśa-; G. khès, hair.

Av. kata-; Kh. χ ata-n, a house.

G. kham-ta, an ear. See No. 47. This is doubtful. Cf. No. 51.

In Kh. $gurd\bar{o}\cdot\chi$ or $gurd\bar{o}\cdot\gamma$, an ass, a k has first become χ , and then become γ . So Kh. $\bar{u}\cdot\gamma$, water, $hato\cdot\gamma o$, his. Cf. Ps. $ha\cdot\gamma^a$, he. See nominal suffixes.

49. $\mathbf{k} > \mathbf{g}$.—This has only been noticed initially in M. $g\bar{\imath}$, what? See No. 47. Compare Tūr Kurd, $g\bar{\wp}$. It will be observed that the k is initial. As in Paiś. medial k is apparently preserved. See, however, Nos. 53 and 54. Another example is in V. *att-ege*, one. See numerals. In the V. k-suffix regularly becomes g when final, or between two vowels, and there are also one or two other examples of this in other languages. See nominal suffixes. So also in the k-suffix in Š. and M., and in B. present participles.

50. $\mathbf{k} > \mathbf{k}\mathbf{y} > \mathbf{c}$, \mathbf{ch} .—Gār. kyan, ear.

Av. \sqrt{kar} , Pāmir dialects \sqrt{kar} , \sqrt{car} , do; W. *cher-am*, I will do; *cā-st*, he does.

This is common in Eranian. See GIP. I², 419. It does not occur in Pais. In Ks. grammar k > c when followed by \tilde{a} ($< \tilde{i}$) or y. Thus \sqrt{thak} , be weary; past part. fem. $thac\tilde{a}$, Aorist thacy δv .

51. k > h, aphæresis of k.—The Arabic word qahh appears as follows: G. hawat, P. hawata-, wata, B. ot, at, V. $\bar{a}t$, W. arot, hunger.

Av. Skr. \sqrt{kar} , do make; K. $\bar{a}ro$, Kh. ar-er, he made. But W. $c\bar{a}$ -st, see above. Others retain the k. See No. 47.

-51]

52. $\mathbf{kk} > \mathbf{k}$.—Skr. kukkuţa-; W. kiukiu, G. kukuŗ, Gār. kūkur, P. kūkūr, Kh. kūkū, M. kūkō, Kš. kwakur, kokur. But Š. kankōrō-cō, Gār. also kugū, a cock. Only in the semi-Indian Gār. is the preceding vowel lengthened in compensation.

53. kk>g, kk>nk.—See No. 52.

54. kr > kr, gr.—Two examples have been noted :

Skr. kraya-, K. kre, purchase.

Skr. krōda-, K. gro, breast.

The r is preserved. Compare Hc. iv, 398, and Shb. parakramati, etc.

55. k s > (k)kh.—Only in Skr. paksin-, Kś. påkhī, for pakkhī, with compensatory lengthening and nasalization. A purely Indian form. Other forms are K. pachiy-ek, G. pici-n, Gār. pašī-n. In none of these is there any compensatory lengthening.

56. kş > c, ch, č.—Skr. akşi-, Av. aši-; B. W. ac \tilde{e} , K., Kh. ec, G. iči-n, P.³ anc, Kh. γec , M. ainch, Š. achī, āčhē, Kś. achⁱ, but V. izī, Gār. ițh, an eye.

G. pici-n, K. pachiy-ck, a bird. See No. 55.

Kh. chuī, M. būcha, Kś. bōchī, Gār. būṭhō, hunger. See No. 20.

Skr. *rksa*-, Kh. *ori*, a bear (Tom. 894).

57. $k \ge ch \ge th$.—Cf. No. 66. See Gār. *ith*, eye, and $b\bar{a}th\bar{o}$, hunger, above. The change from $ch \ge th$ is common in Š. Cf. also No. 118.

58. ks > nch.—M. ainch, an eye (from aich < acchi). See above.

59. $k s > \tilde{s}$.—This is the usual change in Eranian (Gray, 488).

Gār. pašī-n, a bird. See No. 55.

60. ks > š > ž.—Cf. No. 67.
V. *ižī*, an eye. See No. 56. Cf. No 270.

61. $\mathbf{kh} = \mathbf{kh}$.---(a) Initial. Skr. khara- ; Kś. khar. But Av. χara -, Wkh. χar ; B. kur, V. köru, P. kär, an ass.

Skr. khura-; K.G.M. khur, Kś. khör, but B. kyur, kũr, Š. küti, a foot.

Skr. $\sqrt{kh\bar{a}d}$; M. \sqrt{kha} , Gār. $\sqrt{kh\bar{o}}$, Kś. \sqrt{khi} , but Š. \sqrt{ka} , eat.

(b) Medial. Only one doubtful example. Skr. mukha-, face; V. ti-mikh, before, but B. pa-myuk, W. myuk-ne, Gār. mūka, muthò, Š. mōcō, mōžē, M. mūthō.

The V. termination kh (for k) may also be mentioned here. It is very common, as in *mas-ekh*, moon, and many others. See No. 48.

The retention of medial *kha* is typical of Paiś.

The kh in V. ti-mikh is probably secondary. kh > k, and then final k > kh, according to the V. general rule.

62. kh > k.—This change is not uncommon in Eranian (see Gray, 132). It is very rare in Indian, but occurs in the Shb. ku for khu. Examples are :

B. kur, V. kōru, P. kār, ass. See No. 61.

B. *pa-myuk*, W. *myuk-ne*, Gār. *mūka*, before. See No. 61.

B. kyur, kũr, Š. küti, foot. See ditto.

Š. \sqrt{ka} , eat. See ditto.

63. kh > k > c.

- 64. kh > ch > th, th.
- 65. kh > ch > \dot{s} > \dot{z} .

Cf. No. 96.

Š. $m\bar{o}c\bar{o}$, before. See No. 61.

M. $m\bar{u}th\bar{o}$, Gār. $muth\tilde{o}$, before. See ditto.

-65]

Av. $\chi^v a$ -tō, Skr. sva- ; V. šō, W. šā, self.

Š. $m\tilde{\tilde{o}}\check{z}\tilde{e}$, before. See No. 61.

In Kś. kh always becomes ch before i (< i) or y. Thus $hwakh^{u}$, dry; fem. $hwach^{\tilde{u}}$, fem. plur. hwache (for $hwakhy^{a}$).

66. $\chi \dot{s} > ch.$ —Cf. Nos. 56, 57. Kh. *choi*, six. See No. 67.

67. $\chi \check{s} > \check{s}$.—Cf. Nos. 59, 60.

Av. $\chi \& va\&$, Wkh. & a & b; B. & o, V. u& & u, W. & u, P. & a, χe , G., M. & oh, K. & oh, Gar. & o, Š. & ah, but Kh. choi, six. See numerals. K& has & sah, which is only a pandits' way of writing & ah.

68. g = g.—In Paiś. medial g is retained. In C. Paiś. it > k. So also in Shb. maka-.

(a) Initial. Skr. gardabha-; W., G., Gār. gadā, K. gard \bar{o} -k, Kh. gurd \bar{o} - γ , gurd \bar{o} - χ , M. (with transfer of aspiration) ghadā, an ass.

Av. $m \partial r \partial \gamma a$ -, Skr. $m_{r}ga$ -; B. maran- ga^{r} , W. $n\tilde{i}$ - $ge\check{e}e$, a bird, but V. $n\tilde{i}ze$.

B. $\sqrt{gi}-a\check{c}$, V. \sqrt{giz} , Gār. \sqrt{gi} , Kh. $\sqrt{an}-gi$, bring. See Vocab.

Av. $g\bar{a}v$ -, Šg. zav, Sq. zao, Skr. gav-, $g\bar{o}$ -; G. $g\bar{a}$, M. $g\bar{o}$, P. $g\bar{o}$ -, Š. $g\bar{o}$ - $l\bar{o}$, but B. aze, asu, V. ze-st, a bull; B. $g\bar{o}h$, gao, V. $g\bar{a}$ -th, W., P., M. $g\bar{a}$, K. ga-k, Gar. $ga\bar{e}$, Š. $g\bar{o}$, Ks. $ga\bar{o}$, but G. $e\bar{c}\bar{i}$, cow.

P. $g\bar{o}s^{a}$ -g, $g\bar{o}s\bar{i}$ -ng, M., Š. $g\bar{o}t$, Š. $g\bar{o}s$, $g\bar{o}z$. See Vocab.

Skr. gāna-; K. gùro, P. gē, M. gēla, singing.

(b) Medial. No good examples occur. We may quote the termination $g (\langle k, ka, cf. GIP. I^2, p. 63)$ in M. $d\bar{a}$, $d\bar{a}$ -g, back, and V. but-og, share.

In one instance (see syncope of g) the half-Indian Ks. drops a medial g in the Indian fashion. In the V. $n\overline{i}ze$ (cf. W. $ni\cdot gee$), the initial g of the second member of a compound has also been dropped.

69. g > k.—Cf. Shb. maka-. This is the rule in C. Paiś. So Prs. layām ; Kś. lākam, a bridle.

70. g > gh.—This, which is common in East Eranian, only occurs in M. *ghadā*, an ass, where it is simply due to transfer of aspiration. See No. 68.

71. g > j.—In Kś. g > j before \overline{i} ($< \overline{i}$) or y. Thus $srwag^{u}$, cheap; fem. $srwag^{\overline{u}}$, fem. plur. $srwag^{u}$ (for $srwagy^{a}$).

72. g>ž>š.

-77]

73. $\mathbf{g} > \check{\mathbf{z}} > \check{\mathbf{c}}$.—B. $a\check{z}e$, $a\check{s}u$, V. $\check{z}e$ - $\check{s}t$, a bull; G. $e\check{c}\iota$, a cow. See No. 68. Regarding this palatalization compare Nos. 50, 63, 65, and 80. (GIP, I², pp. 300, 419.)

This change only occurs in Eranian.

74. Syncope of g.—Skr. chagalah; Kś. čawul", a he-goat, V. nize, a bird. See No. 68.

This is the regular Indian rule.

75. gr = gr.—Skr. grāma- ; B. grom, K. grām, a village. The retention of r is sanctioned by Hc. for Apabhraniśa Pr. (iv. 398). Cf. Shb. agrabhuti-.

76. gr > gl > l.—According to Tom. 899 this change has taken place in M. $l\bar{a}m$ ($\langle gr\bar{a}ma \rangle$), a fortified place. In the compounds dr and br there is a similar change. See Nos. 158, 153, and 206. In C. Paiś. r > l optionally.

Cf. Eranian $\gamma r > (r)r$, as in Av. ti γri -; Prs. tir, arrow.

77. gh, $\gamma = gh$, γ .—All soft aspirated consonants are disaspirated in modern Paiśācī. The rare exceptions to this rule are borrowings from India. There are, therefore, only sporadic examples to quote. These are :

M. $gh\bar{o}$, a horse. See No. 78.

K. γona , M. $\gamma \tilde{o}$, great. See ditto.

The latter has been changed to the corresponding spirant.

In two instances the termination $g \ll k \ll ka$ has been changed to γ . Both are in Kh., and the change is due to the influence of the neighbouring Munjānī-Yüdyā. They are $gurd\bar{\sigma}$ - γ , an ass (see No. 68), and \bar{u} - γ , water. Cf. Mj, yau- $\gamma\bar{a}$. It is probable that in M. $gh\bar{\sigma}$ the gh is also a spirant, but no information is available.

In Paiś. gh = gh, and in C. Paiś., gh > kh. The disaspiration must, therefore be a product of modern times. It is carrying on the Paiś. system of retaining the soft guttural sound, instead of weakening it to h as in India.

78. gh > g.—This is the regular change. It is rare both in Indian and Eranian (Gray, 151).

Skr. ghōtaka-; W. gur, G. gora, Gār. $g\bar{o}r$, P. $g\bar{o}r\bar{a}$, Kś. gur^{u} , but M. $gh\bar{o}$, a horse.

Skr. ghana-; P. gan, Gār. giān, but K. γona , M. $\gamma \tilde{o}$, great.

Skr. dīrgha- ; K. drīga, M. līga (through *drīga), Š. žīgō long.

79. Prothesis of γ .—Kh. γec , eye. See Nos. 5 and 56. Compare prothesis of χ in Eranian (GIP. I², 67).

80. $\gamma \delta > \chi t > \dot{s} t$.—Av. $du\gamma \delta ar$ -, Armenian dustr, Mj. $le\gamma da$; V. $lu\check{s}tu$, daughter. This must be for $lu\check{z}t\bar{u}$. Compare change of No. 72. See No. 81.

81. Syncope of $\gamma\delta$ ($<\chi t$).—This is the rule also in Pš. (ELA., §16).

Av. $du\gamma\delta ar$ -, Prs. $du\chi tar$, Pš. $l\bar{u}r$; Gār. $d\bar{u}\bar{i}$, Kh. $j\bar{u}r$, $\hat{z}\bar{u}r$, B. $j\bar{u}$, ju-k, W. $j\bar{u}$, G. $z\bar{u}$, K. chu; but Skr. duhitar-, Pr. $dh\bar{i}d\bar{u}$, $dh\bar{\iota}\bar{u}$; M. $dh\bar{i}$, Š. $\delta\bar{\imath}$, a daughter.

The forms derived from $du\gamma\delta ur$ - must have passed through an intermediate form $*d\bar{u}r$. The change of d > j, etc., can be explained by the insertion of *i* before \bar{u} —thus $*di\bar{u}r$.¹ This is common. See No. 17. Apocope of *r* is frequent. If Pr. $dh\bar{u}d\bar{a}$ is really derived from duhitar- (see Vocab.), then

¹ Compare Kh. $j\bar{u}$, two; $jo\bar{s}$, ten.

98

the M. and Š. words are Indian, but it is quite easy to suppose an Eranian origin for this word. In the Pāmir dialects initial d regularly becomes δ (GIP. I², 300). As for the *i* instead of *u*, cf. Kurd $du\chi t$ or ditt, a daughter. In Modern Paiśācī the change of $\ddot{u} > \check{t}$ is common. See No. 26.

82. $\dot{n}g = ng$, \tilde{g} .—Skr. *anguli-*, *anguri-*; B. *angyur*, W. *agur*, K. *angurya-k*, Gār. *angir*, Kś. *anguj^ū*, but V. *igi*, Š. *agui*, a finger.

Av. angušta-, toe, Prs. angušt-ar, ring; B. angušti, W. $agušt\delta$, K. angušt-ar, P. ang δc -ak, Kh. pulungušt, Gār. angusir, but V. $w\delta g$ -i χ , a finger-ring.

Skr. angāra-, agni-; B. angā, K. G. P. Kh. angār, Gār. āgār, but B. also agō, V. an-ekh, M., Š. agār, Š. hagār, M., Kś. nār, fire.

83. ng > g.—V. igi, Ś. agui, a finger. See No, 82.
V. wög-i_X, a finger-ring. See ditto.
B. agö, M., Š. agar, Š. hagār, fire. See ditto.

84. ng > n.—V. an-ekh, M., Kś. nār, fire. See No. 82.

85. $\mathbf{c} = \mathbf{c}$.—This is the usual rule, as in Pais. Only V. offers real exceptions; c, however, occasionally changes to \check{c} or s in the others. The preservation of intervocalic c in Eranian is typical of non-Prs. dialects. (GIP. I²., 415.)

Sg. kīc, Sq. kec; K., P. kuc, P. kūc; but W. kiuč, belly.

V. eipā, P., Š. cār, Kh., Gār. cōr, Š. corr, K. eau, four.

Av. Skr. \sqrt{car} , Mj. \sqrt{car} ; W., K., Gār. \sqrt{car} ; Š. \sqrt{cer} , but M. \sqrt{sar} , and (?) Kh. \sqrt{roch} , to graze.

Skr. cūdikā; W. coro-k, K. cūri, hair.

Wkh. $c\ddot{v}\gamma$; B. $e\ddot{v}$, W. $c\hat{u}$, but V. $i\check{s}a$, a kid.

Compare Burušaski, eomar, or chomar; B. cimr, cimeh, W. cima, K. cīmbar, P., Gār., Š. cimar, P. cumar, Kh. cumr, cumār, Š. cingār, but, V. žema, G. čimar, M. sčwar, iron. 86. c > c.-In Eranian this change is typical of Ps. and the Ghalcah dialects. (GIP.I², 417, 419.)

W. kiuč, belly. See No. 85.

G. čimar, iron. See ditto.

G. \tilde{cur} , Kś. \tilde{cor} , four; G. panč, Kś. pānč, five. See numerals.

87. c > j > z.—This change occurs regularly in Prs. between vowels and after r. (GIP.I², 91.)

Av. panca-, Ghalcah, pinj, pānz; P., Gār. panj, K., Kh. $p\bar{o}nj$, M. $p\bar{d}z$, five. See numerals.

88. $c > \check{s} > \check{z}$.—See No. 141. This change also occurs in Prs. dialects. (GIP.I², 90.) Cf. No. 269.

V. iša, kid. See No. 85.

B. *što*, W. *štā*, four. See numerals.

S. *puš*, *puš*, five. See numerals.

V. žema, iron. See No. 85.

89. c > s.—Only when initial in M.

M. $\sqrt{s\bar{a}r}$, graze. See No. 85.

M. sē̃war, iron. See ditto.

M. $sa\bar{u}r$, four. See numerals.

90. cv > ps.—Av. cvant- ; V. pseh, what? Cf. No. 249.

91. $\dot{c} > g$.—Only one very doubtful example. Kh. *ligi-ni*, B. *dič*, V. *luzu-kh*, tongue.

92. $\dot{c} > c$.—Only one doubtful example P. \sqrt{ac} , bring. See Vocab. under ' bring ' and ' come.'

93. č > z.—B. maran-gač, V. nĩze, a bird. See Vocab.
B. √gi-ač, V. √giz, bring.
V. luzu-kh, tongue. See No. 91.

94. ch = ch.—This letter is confined to words of Indian

origin, and is rare, except in the semi-Indian M., Gār., and Kś. The only examples of its occurrence in other languages are K. *chu*, a daughter, Kh. *chuī*, hunger, *choi*, six, V. *chī*, three, W. \sqrt{cher} , do. Elsewhere it is generally weakened to *c*. See No. 56.

Skr. chēla-; Gār. chēl; but M. sāil, a she-goat.

95. ch > č.—Skr. chagala- ; Kś. čawul^u.

96. ch > th (th).—Cf. Nos. 64, 118. This change is common in the semi-Indian Gar. and M. when using words of Š. or Kś. origin. Cf. Gray, 175.

Skr. mukha-, face; Š. mōcō, Gar. muthõ, M. mūthō, before. Skr. akṣi-; Š. achī, Gār. ith, eye.

Skr. bubhukṣā; Kś. bōchī, Gār. bāthō, hunger. See No. 20.

97. ch > s.—M. sāil, a she-goat. See No. 94.

98. j = j.—This is also the rule in Pais. In the modern dialects all the examples are initials.

Av. Skr. $\sqrt{j\bar{v}c}$, live; K., Kh. *junu*, Gār. *jāndō*, Š. *jīnō*, alive, but B. *šāwā*, alive, *šā*, life, V. \sqrt{s} , live, W. *šāda*, Kh. (also), *žanā*, G. *zien*, alive.

Skr. (?) jāyatē, he is born; G. jai, but Š. āžē, W. oie, K. āya, P. āī, Gār. yaī, a mother.

Skr. *jihrā*; W. *jip*, K., Š., P. *jib*, P. *jub*, Gār. *jībh*, tongue.

The Thalī Lahndā $\sqrt{marīc}$ for marīj, be struck, is an example of the influence of C.-Pais.

99. j > z.—Frequent in Eranian. (Gray, 185.) Only in G. *zien*, alive. See No. 98.

100. $j > \check{z}$.—Frequent in Eranian. (Gray, 186.) Only in Kh. $\check{z}an\bar{a}$, alive; Š. $\bar{a}\check{z}\bar{e}$, mother. See No. 98.

101. j > y.—This change is occasionally found in Prs. dialects. (GIP.I², 385.) Only in Gar. $ya\bar{i}$, mother (very doubtful). See No. 98. Cf. j > y in Shb.

ES [102-

102. $j > \check{s}$.—Only in B. $\check{s}\bar{u}w\tilde{a}$, alive, $\check{s}\bar{u}$, life, V. $\checkmark\check{s}\check{o}$, live, W. $\check{s}\tilde{u}da$, alive. See No. 98.

103. Aphæresis of j.—Only in W. *oie*, K. $\bar{a}ya$, P. $\bar{a}\bar{\iota}$, mother. See No. 98.

104. jr $> \check{z}$, or $\check{z} > jr$, or $jr = \check{z}$.—This is the regular rule in Š, in which *jr* and \check{z} seem to be convertible. In fact, the two transcriptions represent the same sound, which seems to be that of a rough \check{z} , with a half-heard *r*-sound after it.

Š. $jr\bar{a}$, $\check{z}\bar{a}$, Gār. $j\bar{a}$, M. $\check{z}\bar{a}$, a brother. See Vocab.

Š. manujro or manužō, a man. Cf. Nos. 141, 152, 157, 204, 228.

105. z = z.—In Eranian this is typical of non-Prs. dialects. (GIP.I², 414.)

Av. būza-, Mj. wuz; B. wez-eh, but W. wasei, a shegoat.

Av. zərəd-; B. zare, W. zō, heart.

Av. $hiz\bar{u}$ -; G. zib, M. $z\bar{e}b$, Kś. $z\bar{e}o$, tongue. See Vocab. Av. azom; V. unzu; but B. $on\check{e}$, I. See pronouns.

106. $z > \check{c}$.—B. *onč*, *õč*, I. See No. 105.

107. z > s.—W. wasei, a she-goat. See No. 105.

108. Syncope of z.—Av. $az \partial m$, Samnānī \bar{a} , u, I; B. \bar{i} , V. *e-nd-eš*, my; W. $y\bar{e}$, K., G., P. \bar{a} , Kh. *awa*, Gār. ya, I. See pronouns.

109. $\dot{z} = \text{or} > jr.$ —See No. 104.

110. ñ inserted.—Av. aši-, Skr. akși-; P. anc, M. ainch, eye. See No. 56. Cf. Hindī *ăkh*. See No. 328.

III. Syncope of \tilde{n} .—B. *puc*, V. *ue*, W. *pūc*, Š. *puš*, *poĩ* (also *pũš*), five. See numerals.

112. Syncope of nc.—Av. pañca-; Ś. poĩ, five. See numerals.

113. t=t.—This follows Pais.

Skr. \sqrt{rat} , rant, divide; V. but-og, W. mat-ini, M. bat-ha, P. want-e, a share; G. \sqrt{beut} , divide; but B. bar-este, K. bas, a share.

114. t > c.—In Kś t always becomes c when followed by i or y. Thus *pat*, a tablet, Ag. sing. *paci*, nom. plur. *pace* (for *paty^a*). Cf. No. 141.

115. $\mathbf{t} > \mathbf{r} > \mathbf{r}$ --Skr. kukkuļā-, a cock; G. kukuļ, P. kukūr, Gār. kūkur, Š. kankōrō-cō, Kś. kwakur, kokur, but W. kiukiu, Kh. kūkā, M. kūkō, Gár. kugū, a fowl.

Skr. ghōta-ka-; W. gur, G. gora, Gār. $g\bar{o}r$, P. $g\bar{o}r\bar{a}$, Kś. gur^{u} , but M. $gh\bar{o}$, a horse.

B. bay-este, a share. See No. 113.

It will be observed that in all these cases the t is a final syllable. Compare such as G. *kham-ta*, ear, G. *čumu-ta*, hair, G. *šau-ta*, head, with B. *mach-ku-r*, man, G. *kōš-ar*, shoe, Gār. *pīšī-r*, cat, B. *naz-ur*, K. *nātc-ur*, Kh. *naskā-r*, M. *nath-ār*, Gār. *nāz-ār*, nose. Similarly in Indian languages all but one of the examples of t > r, l, or l given by Gray (§§ 196, 197, 198) are final syllables of a base.

116. $t > \dot{s}$.—Only one doubtful case, viz., K. *baš*, a share. See No. 113. If the change has really occurred it is probably through e.

117. Apocope of t.—This apparently occurs in W. kiukiu, Kh. kūkū, M. kūkō, Gār. kugū, a fowl. See No. 115. M. ghō, a horse. See ditto.

I doubt if there has been any real apocope. The t in each case is a termination, which need not necessarily have been used in these dialects.

103

At the same time t may have become r, which was then dropped. Apocope of r is common. See No. 229.

118. th > ch.—In Kś. every th > ch when followed by *i* or *y*. Thus $k\bar{a}th$, a stalk, agent sing. $k\bar{a}chi$, nom. plur. $k\bar{a}che$ (for $k\bar{a}thy^{a}$).

119. d > j.—Similarly, in Kś. under the same circumstances d > j. Thus $bad^{\overline{n}}$ (fem.), great, agent sing. baji, nom. plur. baje (for $bady^{e}$).

120. $\mathbf{d} > \mathbf{r} > \mathbf{r}$.—Skr. *bidāla*-; Kś. *brår"*, a cat. Skr. *cādi-kā*; W. *coro-k*, K. *cāri*, hair. Note that d does not become l. So Paiś.

121. Apocope of d.—Skr. $kr\bar{o}da$ -; K. gro, breast. Here d > r. There was then apocope of r. Cf. No. 229.

122. nt = nt.—P. want-e, share, G. \sqrt{bent} , divide. See No. 113.

123. $nd > \tilde{d}$ —With compensatory lengthening of preceding vowel, as in India. Only in Kś. $d\tilde{a}d$, a bull. See No. 8. Compare Shb. ndy > ind.

124. nd > n —K. $d\bar{o}u$, Š. $d\bar{o}u\bar{o}$, a bull. See No. 8.

125. t = t.—Here Paiś. is again followed. In Eranian the preservation of intervocalic t is typical of non-Prs. dialects. GIP. I², 416.

Skr. tata-, tāta-; B. tōt, tōtt, W. tata, tā, P. tātī, Kh. tat, a father.

Skr. tārā; W. tarā, K. tāri, G. tāre, P. tārā, M. tāra, Š. tārā, Kś. tāru-kh, a star.

Av. kata-, a grave; Phl. kat-ak, a house; Kh. $\chi ata-n$, a house.

Ar. qaht; B. ot, åt, V. ūt, W. avot, G. hawat, P. hawatawata-, hunger. **126.** $\mathbf{t} > \check{\mathbf{c}}$, $\check{\mathbf{ch}}$.—This change is the rule in Kś. when t is followed by y or \bar{v} ($\langle \bar{\imath} \rangle$). Thus tat^{y} , hot, $tat^{z}ar$ for *tatyar, heat; $r\bar{a}t$ -, night, oblique $r\bar{a}t^{v}$. Cf. Šg., Sq. $\langle yet ;$ B. $\langle at^{x}, V, \langle jot^{x}, W, \langle at^{x}h, \text{ come.} \rangle$

B. *di-ktī*, V. *kčeh*, Kś. *pat*, *pačh*, behind. In Kś. all final surds are aspirated. See p. 17.

127. t > d.—This only occurs in one instance, and the change also occurs in Eranian.

Skr. pravat-, Sq. pröd, Prs. /iröd; G. puda-mi, before.

128. t > d > l > r.—The change to r is characteristic of Kh.

Kh. bisr, twenty; M. Š. sal, Kh. $s\bar{o}r$, a hundred. See numerals. So Kh. posir (pasyati), he sees; asur (asti), he is. In. Ps. t regularly > l.

129. Aphæresis of t.—Very rare. Only in B. tiu, V $iy\bar{u}$, thou. See pronouns.

130. Apocope of t.—W. tā, a father. See No. 125.
Skr. pravat-; P. pōṛā, Kh. pru-šṭa, before. See No. 127.
B. vičī, V. zū, W. višī, G. išī, K. bišī, Gār. M. bīš. Š. bēh,
Kś. wuh, etc., twenty. See numerals.

131. tm > t.—So in Shb.

Skr. ātman-; W. tann, P. tāni-k, Kh. tan, M. tā, Gār. tanī, but Š, tomo, Kš. pān^a, self.

132. tm > p.—Only in the semi-Indian Kś. $p\bar{a}n''$, self. See above.

133. ty>č.

134. ty > t.

135. ty > t.—This change does not occur in Indian. The examples quoted by Gray (565) are not to the point. The Bihārī $nit^i < nitya$ - is a semi-tatsama, being contracted from niti. Sindhī nit^u is due to the influence of the local Pais.

Skr. $n_{t}tya$ -ti; B. P. $\sqrt{na_{t}}$, Š. \sqrt{nat} , dance. In V., W., K., G., we have $\sqrt{na_{t}}$, and in Gār. $\sqrt{n\bar{e}_{t}}$, the cerebralization (if real) being due to the preceding r. Š. has also \sqrt{nath} . Kš. has alone $\sqrt{na_{t}}$, according to the rule that t followed by $y > \epsilon$. See No. 126.

136. ty > th.—Š. \sqrt{nath} , dance. See No. 135.

137. (*a*) **tr**, θ **r** = **tr**.

- **138.** (b) tr, $\theta r > tr > t(h)$.
- 139. (c) tr, $\theta r > th > lt$.
- 140. (d) tr, $\theta r > \theta l > thl > hl$.
 - (a) Skr. putra-, Av. puθra-; W. piutr, K. pūtr, a son.
 - B. K. Kś. treh, W. trē, Š. trē, trā, Kh. troi; but V. chī, P. hlē, G. θlē, Gār. thā, M. cā, Š. cē, three. See numerals.
 - (b) B. putr, pitr, Gar. put, a son.
 - Gar. $th\bar{a}$, three.
 - Skr. $g\bar{o}tra$ -; M. Š. $g\bar{o}t$ or $g\bar{o}t$, a house.
 - (c) M. $p\bar{u}_{!}^{t}h$, G. pult, a son.
 - (d) P. puthle, a son.
 - G. *θlē*, P. *hlē*, three.

With reference to the above it should be remembered that it is probable that, in Mod. Paiś., both dentals and cerebrals are really semi-cerebrals. Regarding the treatment of θr in Ghalcah see GIP. I², 419. The Indian change of tr > (t)t has not been anywhere noted. In Shb. tr = tr.

Note.—The preservation of tr is typical of these languages. The change of tr to tr also occurs in Sindhī, which language is in other respects also affected by Pais. Cf. No. 135.

141.—tr, $\theta r > c(h) > \check{s} > \check{z}$.—Cf. Nos. 88, 228. This change is typical of Š. Cf. Av. *uštra*-, Wkh. *üštür*, Yd. *išcuro*, a camel. Cf. also Š. change of $jr > \check{z}$ (104) and $dr > \check{z}$ (157), and Kś. change of l > c (114) and lh > ch (118).

Skr. putra-, Av. pu θ ra-, Wkh. pötr, Šg. puč, Sq. pöč (GIP. I², 303; Gray, 567); Gār. pūc, Š. puc, puš, a son.

Skr. strī, Wkh. strēi ; Kś. trēī, trai, Š. čhrīga, čhaī, cei, a woman.

Skr. $g\bar{o}tra$ -; Š. $g\bar{o}\check{s}, g\bar{o}\check{z}, P. g\bar{o}\check{s}^{a}$ -g, a house.

Av. *θrāyō*, Mj. *šarai*; V. *chī*, Š. *cē*, *trē*, M. *cā*, three. See numerals.

Š. \sqrt{cak} or trak, see.

142. tr, $\theta r > r > r$.—Kh. brār, a brother. See No. 144.

Av. $\bar{a}\theta r$ -; W. $\tilde{e}r$, fire. See Vocab.

143. tr > h.—B. $br\bar{o}h$, bra, a brother. See No. 144. The *h* may be a euphonic addition.

144. Apocope of tr.—Av. $br\bar{a}tar$ -; B. bra, $br\bar{o}h$, V. wayeh, W. $br\bar{a}$, K. $b\bar{a}ya$, G. bliaia, P. $l\bar{a}i$, Kś. bay^{u} , M. $\dot{z}\bar{a}$, Gār. $j\bar{a}$, Š. $jr\bar{a}$, $\dot{z}\bar{a}$, but Kh. $br\bar{a}r$, brother. With the above, compare the next.

145. Syncope of tr, θ r.---Only in V. $pi\tilde{e}$, a son. Cf. Nos. 141, 143, 144.

146. th > čh.—This is the universal rule in Kś. when th is followed by y or \overline{u} ($<\overline{\iota}$). Thus kwath, a hank, oblique $kwa^{z}h^{\overline{u}}$, for $*kwath\overline{\iota}$; with open, wathar, for *wathyar, openness.

147. $\theta w > t$.—B. *što*, W. *štā*, four. See numerals.

148. $\theta \mathbf{w} > \mathbf{p}$.—Av. $ca\theta w \bar{a}r \bar{o}$, Wkh. $\check{c}ab\ddot{u}r$; V. $cip\bar{u}$, four. See numerals. Cf. Oss. $\check{c}uppar$, $\check{c}\check{u}ppar$, four.

149. Syncope of θw .—P. Š. $c\bar{a}r$, G. $c\bar{a}r$, K. cau, Kh. Gar. $c\bar{o}r$, Kś. $c\bar{o}r$, M. $sa\bar{a}r$, Š. corr, four. See numerals. In most of these the w has been preserved in the vowel. Cf. Yd. $c\bar{c}r$.

150. d = d.—This is the usual rule for initial d, which is different from that of H.-c's Paiś, in which d > t (see below). In Vararuci's Paiś, and in the second variety of H.-c's C. Paiś., an initial d is retained. Vide ante, p. 8. The only exception to the general Mod. Paiś. rule is V., in which d regularly > l. Under the influence of a neighbouring c, initial d becomes j in Kh.

Skr. daņda- ; K. don, Š. dono, Kś. dad, a bull.

Skr. duhitar, Pr. $dh\bar{\iota}d\bar{a}$, $dh\bar{\iota}\bar{a}$; Gar. $d\bar{\iota}\bar{\iota}$, S. $d\bar{\iota}$, but M. $dh\bar{\iota}$; V. luštu; Kh. $j\bar{\iota}r$, $\check{z}\bar{\iota}r$, B. $j\bar{\iota}$, ju-k, W. $j\bar{\iota}$, G. $z\bar{\iota}$, K. chu, a daughter.

Av. Skr. dūra-, Wkh. δīr; B. dyur, dyor, W. (?) sudu, K. dē-ša, G. durae, P. M. Š. Kś. dūr, Kh. du-dēr-i, Gār. dēōr, far.

Šg. dād; K. dāda, father.

Av. Skr. $\sqrt{d\bar{a}}$; K. \sqrt{de} , P. Š. $\sqrt{d\bar{e}}$, Kh. $\sqrt{d\bar{\iota}}$, M. \sqrt{dai} ; Gār. \sqrt{da} , Kś. \sqrt{di} , give.

O. Prs. dasta-; B. dušt, dui, W. došt, but V. lust, Gār. (?) thair, hand.

Av. dantan-, Skr. danta-; B. dntt, W. dut, K. dand-oria-k, G. dat, P. dand, dant, Kh. don, M. dan, Gar. Ks. dand, Š don, but V. let-em, a tooth.

B. du, diu, W. du, G. K. Gār. M. Š. $d\bar{u}$, P. $d\bar{o}$, Š. $d\ddot{u}$, but V. $l\bar{u}e$, Kh. $j\bar{u}$, Kś. z^ah , two. See Numerals.

B. dič, W. dōš, P. dē, G. K. Gār. M. daš, Š. dāš, dāī, deii, Kš. dah, but V. leze, Kh. još, ten. See numerals.

151. d > ch.—See No. 152.

152. d, dr > j > z > ž.—Cf. Nos. 88, 104, 114, 118, 141, 157, 228.

K. chu, daughter. See No. 150.

Kh. $j\bar{u}r$, $z\bar{u}r$, B. $j\bar{u}$, ju-k, W. $j\bar{u}$, G. $z\bar{u}$, a daughter. See No. 150.

B. dru, žu, V. žui, Kh. drō, hair.

Skr. $d\bar{\imath}rgha$ -, Š. $\check{z}\bar{\imath}g\bar{\sigma}$ (through $*dr\bar{\imath}gha$). long. With these last two, cf. No. 141. See No. 153.

Kh. $j\bar{u}$, Kś. $z^{a}h$, two; Kh. $jo\bar{s}$, ten. See numerals. But Kś. dah, ten.

In Ks. *d* always becomes *z* when followed by " (< *) or *y*. Thus grand, a counting, oblique granz^{*i*}, for *grand*ī*; thad^{*v*}, high, thazar, for *thadyar, height.

153. d, dr ($>\delta$) > 1.—Cf. Nos. 163, 166.

This is typical of East Eranian (GIP. I², 417, 419), and is very common in V. It also occurs elsewhere.

V. luštu, daughter. See No. 150.

Av. $fra + \sqrt{d\bar{a}}$, give; V. $\sqrt{aph-le}$, give. See No. 155.

V. lust, hand. See No. 150.

Skr. dīrgha-; M. līga, long. See No. 152.

Prs. $m\bar{a}dar$; Š. $m\bar{a}l\bar{\imath}$, Kś. $m\bar{a}j^{u}$ (for $m\bar{a}l\bar{\imath}$), mother.

Skr. Alis'; P. Alas, Gar. Alith (drsta-), see.

Skr. daśa-, Yd. los, Pš. las; V. leze, ten. See numerals.

B. dić, V. luzu-kh, Kh. ligi-ni, tongue.

V. let-em, tooth. See No. 150.

154. Apocope of d.—Skr. *\khād*, Prs. *χāyīdan*; M. *\khā*, Gār. *\khō*, Š. *\ka*, Kś. *\khi*, eat. Cf. H. *\khā*. Ay. zərəd-; B. zare, W. zö, heart.

155. Syncope of d.—See Vocab. s. v. Belly.

Prs. mādar, Šg. mād; M. mhāī, but Š. mālī, Kś. mājⁱ, mother. M. mhāī is probably $< math{\bar{a}i} < math{\bar{a}i} < math{\bar{a}i}$. See No. 153.

-155

Av. $fra + \sqrt{d\tilde{a}}$; B. W. $\sqrt{pr\tilde{e}}$, give, K. prau, Kh. prai, he gave, but V. $\sqrt{aph-le}$, give. See No. 153.

156. dy > s.—Skr. $v\bar{a}dya$ -; Kh. base-ik, singing. In Shb. dy > j. Cf. No. 102.

157. dr > ž.—Skr. $d\bar{\imath}rgha$ -; K. $dr\bar{\imath}ga$, Š. ž $\bar{\imath}g\bar{o}$, long. Cf. M. $l\bar{\imath}ga$.

B. dru, žu, Kh. $dr\bar{o}$, but V. žui, hair. See No. 141.

158. dr (> δ) > 1.—See No. 153.

159. dv = dw.—P. $dw\bar{a}s$, Kś. dwah (pronounced doh), a day. See No. 19.

160. dv > t.- Cf. Paiś. Skr. dvār-, Av. dvar- ; V. tār-ekh, a house. See Vocab.

161. dv > d.—In Eranian, this change is peculiar to Prs. In non-Prs. dv > b (GIP. I², 414). Cf. Shb. diyadha.

M. dis, Gār. dōs, Š. dēs, a day. See No. 19. Skr. drār-, Av. drar- ; K. Kh. dắr, house. See Vocab. P. dōrē, Š. darā, outside. See Vocab.

162. dv > v, b.—In Eranian, this change is typical of non-Persian dialects. GIP. I², 414.

V. ves, W. wās, K. Kh. bas, G. bā, a day. See Vocab.

B. bar, ber- \hat{a} , V. be, W. bēr, K. bī-en, G. berā-ta, Kh. bēri, Kś. nya-bar, outside. See Vocab., and No. 161.

163. dv > 1. — Kś. $l\bar{u}r$, a house. See Vocab., and No. 153.

Av. dra-, Mj. lü; V. lūe, two. See numerals.

164. dh = dh. — This occurs only in one Indian word employed in the semi-Indian M.

Pr. $dh\bar{\iota}d\bar{a}$, $dh\bar{\iota}\bar{a}$; M. $dh\bar{\iota}$, a daughter. See No. 150. In Shb. dh > d.

165. $\delta > \theta$, t.—Cf. C. Paiś. This change is typical of these dialects.

Av. $\sqrt{d\bar{a}}$, $da\delta\bar{a}iti$, put, Skr. $\sqrt{dh\bar{a}}$, $dadh\bar{a}ti$; S. θ -am, t-am, I do, but V. \sqrt{le} .

166. $\delta > \theta \mathbf{l}, \mathbf{l}$.—Cf. No. 153.

Av. \sqrt{da} , $da\delta \bar{a}iti$, give, Skr. \sqrt{da} , $dad \bar{a}ti$; G. $\sqrt{\theta la}$.

Aryan \sqrt{vadh} ; Š. \sqrt{wal} , but W. \sqrt{a} - $v\bar{\imath}$, bring. Cf. Pš. $vast^{a}l$, GIP. I², 417.

Av. $\sqrt{d\bar{a}}$, $da\delta\bar{a}iti$, put, Skr. $\sqrt{dh\bar{a}}$, $dadh\bar{a}ti$; V. \sqrt{le} , but Š. θ -am, t-am, I do.

The G. θla is an interesting form.

167. Apocope of δ .—W. \sqrt{a} - $v\bar{\imath}$, bring, see above. Av. $p\bar{a}\delta a$ -, Prs. $p\bar{a}$; W. $p\bar{a}$ - $p\bar{o}$, P. $p\bar{a}$, pai, Š. $p\bar{a}$, Kh. po-ng, a foot.

168. δ**y** > **sth**.—Av. *maiδya*- ; K. *mosthe*, in. See Tom., p. 897.

169. $\mathbf{n} = \mathbf{n}$. — Skr. $\sqrt{n_{i}t}$; B. P. $\sqrt{n_{i}t}$, B. $\sqrt{n_{i}t}$, V. W. K. G. $\sqrt{n_{i}t}$, M. $\sqrt{n_{i}t}$, Š. $\sqrt{n_{i}t}$, Kś. $\sqrt{n_{i}t}$, dance. Skr. $\sqrt{n_{i}t}$; K. $\sqrt{n_{i}t}$, die.

Skr. nanā, Wkh. nån, Mj. nēnā, Sq. anå, Prs. nana; B. nū, nōn, V. Kh. nan, mother.

B. noh, and all the other words for 'nine.' See numerals.
Skr. nāsā, nāsikā, nasta-; B. naz-ur, nas-ur, V. nes,
W. nasū, K. nātc-ur, G. nāsi, P. nāst, Kh. nas-kā-r, M. nath-ūr,
Gār. nōz-ör, Š. nātō, nutō, Kś. nast, nose.

Av. nišhidaiti, Skr. niṣīdati, he sits; B. $\sqrt{ni\tilde{z}}$, W. G. Kh. $\sqrt{ni\tilde{s}}$, K. \sqrt{nis} , P. $\sqrt{n\bar{i}}$, sit.

B. maran-gač, myenze, V. nīze, W. ni-geče, a bird. Skr. manuja-; B. manje, Š. manujrō, manužō, a man. Skr. mešnuşa-, manuşya-; W. manaš, G. manuš, B. maneī,

-169]

Kś. mahan-ivu, but B. mach-ku-ŗ, K. mŏc, V. muš, Š. mūš, Kh. mōš, M. māš, Gār. mēš, a man.

Skr. $\bar{a} + \sqrt{n\bar{\iota}}$; K. \sqrt{on} , G. Kš. \sqrt{an} , Kh. \sqrt{an} -gi, bring.

Av. span-, Skr. śan-; G. šanā, Kś. hān^a, but W. čā, K. šēŗ, P. šāŗi-ng, Š. šā, dog.

Skr. ghana-; K. γona, Gār. giān, but P. gaņ. M. γο, great.

Av. √srar, surunaoiti, Skr. √śru, śrūōti; B. K. √sau, V. √nus, M. √šun, hear.

W. tanu, P. tāni-k, Kh. tan, Gār. tānī, own, self. See No. 131.

170. n >`.—Only when final. W. $\check{c}\tilde{u}$, Š. $\check{s}\tilde{d}$, a dog. See No. 169. M. $\gamma \tilde{o}$, great. See No. 169. M. $t\tilde{d}$, self. See No. 131. Skr. bhaginī; M. bhē, but Kś. byañ^a, benye, sister.

171. $n > \hat{n}$.—Under influence of neighbouring *i*. Kś. *byañ*^a, *benye*, sister. See above.

172. n > n > r > r > r.—The pronunciation of n and r is practically identical. This change is not uncommon.

Av. apərənāyu-; B. parmņ, but G. pola, a child.

P. gan, great. See No. 169.

K. šer, P. šūri-ng, dog. See No. 169.

Av. vaēn-āmi, I see; W. Nrer, B. Nway, see.

Skr. gāna-; K. gùro, but P. gē, M. gēla, singing.

173. n > m.—This sometimes occurs in Eranian finals (Gray, 279).

Skr. $\bar{a}tman$ -; Š. $tom\bar{o}$, self. Others tanu, etc. See No. 131.

Av. dantan-; V. let-em, a tooth. See No. 150.

Compare the nominal termination n or m.

174. n > 1.—Only one, doubtful, example—viz., M. gēla, singing. See No. 172. The la may be a termination.

113

175. Apocope of n.—Common in Eranian after a long vowel (GIP. I^2 , 58).

B. $n\bar{u}$, mother. See No. 169. P. $g\bar{e}$, singing. See No. 172, etc.

176. Insertion of n.—B. one or $\tilde{o}e$, V. unzu, I, my. See pronouns.

177. Syncope of n.—B. mach-ku-r, K. mőc, V. muš, S. műš, Kh. mőš, M. műš, Går. měš, a man. See No. 169.

178. nt = nt.—P. *dānt* or *dānd*, tooth. See No. 179.

Gar. cand- $\bar{a}nt$, M. kut- $\bar{a}nt$, striking, and so all present participles in these languages.

179. nt > nd.

180. ntr > ndr.—Av. dantan., Skr. danta., Prs. dandān; K. dand-öria.k, P. dānd or dānt, Gār. Kś. dand, but B. dutt, V. let-em, W. dūt, G. dāt, Kh. don, M. dān, Š. dön, a tooth. P. dānd, dānt, should probably be dād, dāt.

Av. antar², Skr. antar, Prs. audar; Kh. andr-ēnī, Kś. andar, but B. atē, atēr, W. attar, K. uðrī-man, G. atra-n, inside, within.

Av. antaro, K. hāndā-n, house.

Skr. mantra- ; K. mondr, a word (Tom., 897). Cf. Sindhī mantr^u or mandr^u.

Cf. Nos. 185, 186.

181. nt > t > tt > tt = W. $d\tilde{a}t$, G. $d\tilde{a}t$, B. dutt, V. let-em, a tooth. See No. 179.

W. attar, B. atē, atēr, G. atra-n, inside. See No. 179. Š. šid-etō, striking. See verbs.

182. nt > d > n.—The change of \tilde{d} to n is quite common in Bihārī. The two are, in fact. convertible. Thus $c\tilde{a}d$ or $c\bar{a}n$, moon. See No. 184.

P. *dānd*, (?) *dād*, Kh. *don*, M. *dān*, Š. *dōn*, a tooth. See No. 179. See Gray, 636.

B. $v\bar{v}n$ -an, G. θli -man, K. ti-man, Kś. $m\bar{a}r$ - $\bar{a}n$, striking, and so all present participles in these languages.

183. nt > δ .—Only in K. $u\delta r\bar{i}$ -man, inside (?). See No. 179.

184. nth (> $\tilde{}$ dh > nh) > n.—The change of $\tilde{}$ dh to nh is regular in Bihāri. They are, in fact, convertible. Thus $b\tilde{a}dh$ or $\sqrt{b\bar{a}nh}$, bend. See No. 182.

Skr. panthan-; Kh. pon, a path (Tom., 894).

185. nd = nd.

186. ndr = ndr.—Cf. Nos. 179, 180.

Prs. larand; G. lawand, but B. louē, W. lavēr, P. lawant, a slave.

Skr. *andra- > and a-; K. ondra-k, an egg (Tom., 896).

187. nd > n > r > nt—B. lou \bar{e} , W. lav $\tilde{e}r$, P. lawant, a slave. See above.

188. $\mathbf{p} = \mathbf{p}$.—This is rare, except when initial. In Pais. even medial p is retained.

Av. Jpərəs, Skr. Jprach, prechati, Pr. puechai; Kś. Jpričh, but K. Japhūc, ask.

Av. paršti-, Skr. pystha-; B. ptī, W. yā-patī, G. pišti, Š. pātā, Kś. pušt, back. Cf. W. Kś. pat, K. pištō, G. Gār. pata, P. paš-k-in, M. patō, Š. phatā, but B. di-ktī, V. kčeh, behind.

Skr. pakșin-; K. pachiy-ek, G. pici-n, Gār. paši-n, Kś. $p\hat{a}kh\bar{i}$, a bird.

Av. parant- ; P. parhanikāle, a bird.

Av. apərənāyu-, a boy; B. parmu, G. pola, a child.

B. puc, W. pāc, P. Gār. panj, G. panč, K. Kh. pōnj, M. pāz, Š. puš, pūš, poī, Kś. pānč, but V. uc, five. See numerals. Skr. puspa- ; B. put-ik, K. pūš-ik, Kś. pōš, a flower. Av. $p\bar{a}\delta a$ -, Prs. $p\bar{a}$; W. $p\bar{a}$ - $p\bar{o}$, P. $p\bar{a}$, pai, S. $p\bar{a}$, Kh. po-ng, a foot.

Mj. pāser, Yd. pāsr; B. pšai, a head. See Vocab.

Skr. *\paś*, paśyati; Kh. *\poš*, M. *\paš*, Š. *\pac*, pāš, see.

Av. $pu\theta ra$ -, Skr. putra-; B. pitr, putr, V. pič, W. piutr, K. $p\bar{u}tr$, G. pult, P. $puthl\bar{e}$, M. $p\bar{v}th$, Gar. put, $p\bar{u}c$, Š. puc, puš, a son.

Skr. rūpa- ; G. rup, Š. rūp, Kś. rvap, rop, but B. aru, aria, V. iuri, W. ūrei, K. rūwā, silver.

189. p > k.—Only one instance—an initial.

B. di-ktī, V. kčeh, behind. See 'back' in Vocab. See No. 188.

190. p > ph.—Only when initial. Rare. The change of p > f is not uncommon in Eranian. GIP. 1², 78. Cf. No. 196.

K. $\sqrt{a \cdot ph\bar{a}c}$ (transfer of aspiration), ask. See No. 188. Š. $phat\bar{a}$, behind. See No. 188.

Wkh. piš; K. phūš-ak, but B. pišaš, pšīāš, V. pši-kh, W. pišā, G. psāsi, P. pīšā-uḍ-ik, Kh. puši, Gār. pīšī-r, a cat.

191. $\mathbf{p} > \mathbf{b} > \mathbf{w} > \ddot{\mathbf{o}} > \breve{\mathbf{u}}$.—This change does not occur in Pais.

It is the rule in Mod. Paiś when p is non-initial. The change is frequent in both Indian and Eranian, but the vocalization to n or u is more common in the latter. Cf. Gray, 294.

Skr. vūpa-; B. arn, aria, V. iuri, W. ūrei, K. rūwā, but G. rap, Š. vūp, Kś. rcap, rop, silver.

Skr. upa-višati ; Kš. V byah, bch, M. Shai (with transfer of aspiration), Gar. V bai, Š. Vbē, sit..

Av. $\check{a}p$ - ; B. $\check{o}r$, $\check{a}o$, V. $\check{a}r$ -eh, W. ao, K. u-k, G. $a\tilde{u}$, Kh. \check{u} - γ , M. $w\tilde{i}$, Gar. \check{u} , Š. wei, $w\tilde{o}\tilde{i}$, $w\tilde{e}$, Kś. ab.

192. Aphæresis of p. -V. *uc*, five. See numerals. 8-2

193. pt > kt > kc. See No. 189.

194. pt > t.—B. sut, V. sete, W. s $\bar{o}t$, P. G. K. Gar. S. sat, Kh. sot, M. s $\bar{a}t$ (with Indian compensatory lengthening), Kś. sath (for sat), Š. also sath, owing to the tendency (the rule in Kś.) to aspirate final surds. See numerals. Cf. Shb. nataro.

195. pr, fr = pr.—This is the usual rule. So also in Shb.

Av. fra (pra) + $\sqrt{d\bar{a}}$; B. W. $\sqrt{pr\bar{e}}$, give, K. prau, Kh. prai, he gave, but V. $\sqrt{aph-le}$.

B. $\sqrt{preč}$, but V. \sqrt{pez} , go. See Vocab. Skr. $pr\bar{e}sita$ -; W. prešya, sent.

196. pr > p > ph.—Cf. No. 190.
V. √pez, go; V. √aph-le, give. See No. 195.

197. $f > \bar{o}$, \bar{u} , au.—This is in combination with a preceding *a*. Cf. Eranian change of f > r. (Gray 299).

Prs. kafš; G. $k\bar{o}\bar{s}$ -ar, Kh. $kau\bar{s}$, M. Gār. $k\bar{o}\bar{s}$, Kś. $k\bar{u}\bar{s}$, a shoe.

198. b = b.—This is when initial. Skr. bidala-; Kś. $br\bar{a}r^{\bar{a}}$, a cat.

Skr. $\sqrt{bh\bar{u}}$, Av. \sqrt{bar} , become ; Kh. $\sqrt{b\bar{\iota}}$, Š. \sqrt{bo} , M. \sqrt{ba} , become, go.

199. b > p.—Cf. No. 249. The same change occurs in C.Paiś. and in Shb. *padham*.

Av. cvant- > *vcant- ; V. pseh (from *bseh), what.

Ar. bābat ; Kś. bāpat, concerning.

Ar. ashāb; B. aspāp, property.

W. *jip*, tongue. Cf. No. 323.

Ar. tabīb; B. tapip, a physican.

200. b > bh.—Only one instance in which the aspiration has been transferred. The *b* is secondary ($\langle r \rangle$).

M. *\bhai*, sit. See No. 191.

201. b > w.—Av. $b\bar{a}za$ -, Šg. vaz, Yd. viza; B. wez-eh, W. wasei, a she-goat.

202. Aphæresis of bu.—Skr. bubhukşā; Kh. chuī, M. būcha, Gār. būthō (hungry), Kś. bŏchī, hunger.

203. br = br.--So in Shb.

Av. brātar-, Prs. birādar, Mj. werāī; B. brōh, brå, W. brā,
Kh. brār, but V. way-eh, K. bāya, Kś. båy^a, G. bliaia, P. lāī,
M. Š. žā, Gār. jā, Š. jrā, a brother.

204. br $> j > jr > \check{z}$.—This is typical of Š. Cf. Nos. 104, 141, 152, 157. Gār. $j\check{a}$, Š. $jr\check{a}$, M. Š. $\check{z}\check{a}$, a brother. See above.

205. br > b > w > m.—K. $b\bar{a}ya$, Kś. $b\bar{a}y^{u}$, V. way-ch, a brother. See No. 203.

S. bring or bing, M. ming, a bird. See Vocab.

206. br > bl > 1.—G. bliaia, P. $l\bar{a}\bar{\iota}$, brother. See No. 203.

207. bh = bh.—Skr. *bhaginī*; M. $bh\tilde{e}$, a sister, but Kś. *byaña*, *benye*.

M. is a semi-Indian language. Other modern Pai^s. lanuages do not tolerate sonant aspirates.

208. bh > b.—This is the usual rule. See above. Kś. byañ^a, benye, sister. See above.

Skr. bubhukşa; M. $b\bar{u}cha$, Gār. $b\bar{u}th\bar{o}$ (hungry), Kś. $b\bar{o}ch\bar{i}$, but Kh. $chu\bar{i}$, hunger. In all these the initial bu has been elided.

209. bh > 0, \bar{u} .—Always non-initial.

Skr. gardabha-; K. gardō-k, Kh. gurdō-γ, gurdō-χ, but
W. G. Gār. gadā, M. ghadā, ass.
Skr. rşabha-; Kh. rešā, a bull.

210. Apocope and Aphæresis of bh.—W. G. Gār. $gad\bar{a}$, M. (with transfer of aspiration) $ghad\bar{a}$, ass. See preceding.

Kh. chuī, hunger. See No. 208.

211. $\mathbf{m} = \mathbf{m}$.—Skr. mukha-, face; B. pa-myuk, V. timikh, W. myuk-ne, Gār. mūka, Š. mōcō, mồžē, M. mūthō, before.

B. maran-gač, mrenze, but V. $n\bar{i}ze$, W. nigeče, a bird. See Vocab.

Av. Skr. \sqrt{mar} , die; B. W. \sqrt{mr} , G. \sqrt{mi} , M. Gār. Kś. \sqrt{mar} , Š. \sqrt{mir} , die, V. $m\bar{o}$, dead, but Kh. \sqrt{bri} , die. See Vocab.

Skr. manuja-, B. manje, Š. manujrō, manužō, man.

Skr. mānuṣa-, manuṣya-; W. manaš, G. manuš, B. mancī, mach-kū-ŗ, K. mōc, V. muš, Š. mūš, Kh. mōš, M. māš, Gār. mēš, Kš. mahan-iru, man.

Skr. māsa-; B. mōs, V. mas-ekh, W. Kh. mās, G. masoi, moon, month.

Pš. $my\bar{a}st$, a month; K. mastr-uk, moon, month.

Av. $m\bar{a}h$ -; P. mai(y)-ik, moon, month.

Skr. grāma-; B. grom, K. grōm, a village.

Bur. comar or chomar; B. cimr, cimeh, V. žema, W. cima, G. čimar, P. Gār. S. cimar, P. cumar, Kh. cumr, cum $\bar{u}r$, but K. cīmbar, M. sēwar, S. cingār.

212. m > ng.—So also occasionally in Eranian. Cf. Av. naman-, Wkh. nung.

S. cingār, iron. See No. 211.

213. m > $^{\circ}$ b > mb. 214. m > $^{\circ}$ b > b. 215. m > $^{\circ}$ w.—Kh. \checkmark bri, die. See No. 211. K. cīmbar, M. sēwar, iron. See No. 211. **216.** m > mh.—Prs. $m\bar{a}dar$; M. $mh\bar{a}\bar{\imath}$, but Š. $m\bar{a}l\bar{\imath}$, Kś. $m\bar{a}j^{\bar{\imath}}$, mother.

217. Aphæresis of mar.—V. nīze, W. nigeče, a bird. See No. 211.

218. Insertion of m.—Av. apərənāyu-, a boy; B. parmņ, but G. pola, a child.

219. Syncope of mā.—Skr. $kum\bar{a}ra$ -; V. kiur, a child, Kś. $k\bar{u}r^{\bar{u}}$ (for $*k\bar{o}r\bar{\imath}$), a girl.

220. $\mathbf{y}, \mathbf{i} = \mathbf{y}$.—So also in Pai^s. In Eranian it is typical of non-Prs. dialects (GIP. I², 415).

Av. \sqrt{i} , Skr. \sqrt{ya} , go; Gār. \sqrt{ya} , but K. $\sqrt{i}(h)$, M. \sqrt{ai} , G. \sqrt{ja} , Š. \sqrt{wa} , come. In P. \sqrt{ye} , Kš. \sqrt{yi} the y is a late prefix.

Wkh. \sqrt{yar} , eat; B. W. $\sqrt{y\bar{u}}$, V. \sqrt{oyu} , but K. Kh. \sqrt{zu} , G. \sqrt{zo} , P. \sqrt{e} , \sqrt{a} , eat.

221. $\mathbf{y} > \mathbf{i}$, \mathbf{e} , $(\mathbf{a})\mathbf{i}$, $(\mathbf{o})\mathbf{i}$.—Skr. $s\bar{u}rya$ -; V. isi-kh, W. $s\bar{o}i$, K. $s\bar{u}ri$, G. suri, Š. $s\bar{u}ri$, Kś. siri, M. swir, Gar. sir (meta-thesis of i in the last three), but B. $s\bar{u}$, P. sur, sun.

K. $\sqrt{i}(h)$, M. \sqrt{ai} , come. See No. 220.

P. \sqrt{e} , \sqrt{a} , eat. See No. 220.

Av. $\theta r \bar{a} y \bar{o}$; B., K., Kś. treh, W. trē, Š. trē, cē, trā, V. chī, P. hlē, hl^a, G. $\theta l \bar{e}$, Kh. troi, Gār. <u>t</u>hā, M. cā, three. See numerals.

222. $y > j > \check{z}$.—Only initial. In Eranian y > j is typical of Prs. rather than of non-Prs. dial. GIP. I², p. 415.

Sg., Sq. \sqrt{yet} ; V. $\sqrt{jo\epsilon}$, but W. $\sqrt{a\epsilon h}$, B. $pr + \sqrt{e\epsilon}$, come.

G. $\sqrt{j\bar{a}}$, come. See No. 220.

K., Kh. \sqrt{za} , G. \sqrt{zo} , eat. See No. 220.

223. Aphæresis of y.—B. $pr + \sqrt{e\xi}$, W. $\sqrt{a\xi}h$, come. See No. 222.

Š. $\sqrt{w\bar{a}}$, come (see No. 220). Here w has been prefixed instead.

P. \sqrt{c} , \sqrt{a} , eat. See No. 220.

224. Insertion of y.—This is frequent between vowels. Thus:

V. wa(y)-ch, K. $b\bar{a}(y)a$, G. bliaia (for *bla(y)a), brother. See No. 203.

P. mai(y)-ik, moon.

225. Prothesis of y.—P. $\sqrt{y\bar{e}}$, Kś. \sqrt{yi} , come. See No. 220.

These languages invariably prefix y to a word beginning with i or e.

Cf. GIP. I², p. 298.

226. r=r.—This is almost the universal rule except in the Kāfir group, in which r is often elided.

Av. xara-, Skr. khara-; B. kur, V. köru, P. kär, ass.

Av. $ap \partial r \partial n \bar{a} yu$ -, a boy; B. $parm \mu$, a child.

Av. $du\gamma\delta ar$ -, Skr. duhitar-; Kh. $j\bar{u}r$, $\check{z}\bar{u}r$, daughter, but V. $lu\check{s}tu$, B. $j\bar{u}$, ju-k, W. $j\bar{u}$, G. $z\bar{u}$, K. chu, M. $dh\bar{\iota}$, Š. $\delta\bar{\iota}$, $d\bar{\iota}$ (obl. base $d\bar{\iota}j$ -), Gar. $d\bar{u}\bar{\iota}$, a daughter.

Av., Skr. \sqrt{mar} ; M., Gār., Kś. \sqrt{mar} , Š. \sqrt{mir} , die.

Most of the other forms given in the Vocabulary are derived from mrta- or *marta-.

Av., Skr. \sqrt{kar} ; B. \sqrt{kor} , K. $\sqrt{k\bar{a}r}$, G. \sqrt{ker} , P., M., Gār., Kś. \sqrt{kar} , Kh. \sqrt{kor} , do. W. *chēp-am*, I do, is derived from *kpta-* or **karta-*.

Av., Skr. dāra-; G. durae, P., M., Š., Kś. dār, Kh. dudēr-i, Gār. dēōr, but B. dynr, dyor, W. (?) sudu, K. dē-ša, far.

Skr. angāra-; K., G., P., Kh. angār, Gār. āgār, M., Š. agār, M. Kś. nār. but B. agō, angā, V. an-ckh, fire.

Skr. khura- ; B. kyur, kũr, G., M. khur, Kś. khōr, but Š. (dial.) küti, foot.

Av., Skr. \sqrt{car} ; K., Gār. \sqrt{car} , Kh. (?) \sqrt{roch} , M. \sqrt{sar} , Š. \sqrt{cer} , graze.

Av. stawra-; V. wištar, great.

Av. sarah-, Skr. śiras-; Kh. sor, P. šīr, Kś. hīr, but B. šei, pšai, V. ji, W. šei, G. šau-ța, head.

Av. staora-; Kh. istor, a horse.

Av. dvar-, Skr. dvār; V. war-ekh, tar-ekh, K., Kh. dűr, Kś. lār, house.

Av. antarə, Skr. antar; B. atēv, W. attar, K. nδrī-man, G. atra-n, Kh. andr-ēnī, Kś. andar, but B. also atē, within.

Av. drar-, Skr. drār-; W. ber, G. berà-ta, P. dörē, Kh. bēri, Š. darā, Kś. nya-bar, but. B. bar, ber- \tilde{n} , V. be, K. bī-en, out, outside.

Skr. sārya-; K. sāri, G. suri, P. sur, M. swīr, Gār. sīr, S. sārī, Kś. sirī, but B. sā, V. isi-kh, W. sōi, the sun.

227. r > r.—B. maran-gat or mrenze, a bird. Here the r of mrenze is due to analogy with B. \sqrt{mr} , die, which is derived from mrta. See No. 211.

W. $\checkmark cher$, do. Here the *r* is really derived from *rt* (*krta-, * karta-*). See No. 226.

B dyur, dyor, far. See No. 226.

B. bay, bey- \dot{a} , out, outside. See No. 226.

With regard to the last two, attention must be paid to the remarks on p. 16 regarding the difficulty of distinguishing between r and r.

228. $r > \check{z}$, j. Cf. Nos. 104, 141, 152, 157.

This curious change of $r > \dot{z}$, like $jr > \dot{z}$, and $tr > c > \dot{z}$, is not uncommon in S., where we find it in dialectic variations. An r in the S. of Gilgit is frequently represented by \dot{z} in the S. of Dras and Dāh-Hanū. For instance:

Gilgit.	Drās.	Dāh-Hanū.
	$r\bar{e}$, to.	$r\bar{a}$, $\check{z}\bar{a}$, to.
jō, jrō, žō, from	. $\tilde{z}\tilde{o}$, from.	$rar{o}$, $\check{z}ar{o}$, from.
$r\bar{o}$, in.	žā, in.	$r\bar{a}$, $\check{z}\bar{a}$, in.
Throughout S.	there is an in	timate connexion between

121

the dative, the ablative, and the locative. In Dāh-Hanū, r and \check{z} are quite interchangeable.

So Š. $r\bar{o}$, Drās, $z\bar{o}$, he. See pronouns.

Compare L. (dial.) $dh\bar{\iota}r$ - $\bar{\iota}$, plural of $dh\bar{\iota}$, with S. obl. base $d\bar{\iota}j$ - of $d\bar{\iota}$, a daughter.

In B. we have $r\bar{a}_{!}\bar{a}$ or z_{arr} , noise. Cf. L. \sqrt{rarr} , cry out.

Compare Standard Tibetan mgrom, Purik Tibetan grun, Baltī (spoken in the immediate vicinity of Š.) žun, a feast.

229. Apocope and syncope of r.—While this is rare in both Indian and Eranian, it is very common in modern Paiś., especially in the languages belonging to the Kāfir group. It is also common in the Tālišī dialect of Prs. GIP. I^2 , p. 355. Thus:

V. *nīze*, W. *nīgeče*, as compared with B. *maran-gač*, a bird. See Vocab.

Av. $dn\gamma\delta ar$ -, Skr. duhitar-; V. luštu, B. $j\bar{u}$, ju-k, W. $j\bar{u}$, G. $z\bar{n}$, K. chu, M. $dh\bar{i}$, Š. $\delta\bar{i}$, $d\bar{i}$, Gar. $d\bar{u}\bar{i}$, a daughter. See No, 226.

G. \sqrt{mi} , as compared with S. \sqrt{mir} , die. See No. 226.

P. kar-am or ka-m, I do. Gâr. kēr, kē-th, he made. See Vocab.

B. $ag\tilde{o}$, $ang\tilde{a}$, V. an-ekh (Skr. $ang\tilde{a}ra$ -). See No. 226.

B. šei, pšai, V. ji, W. šei, G. šau-ta, a head. See No. 226. Av. zərəd-; W. zō, but B. zare, heart.

Av. antara, Prs. andarān; K. hāndā-n, house.

B. $at\bar{e}$ or $at\bar{e}r$, inside. See No. 226.

V. be, K. bī-en, out. See No. 226.

Skr. srasār-, Av. χ^{ranhar} , Wkh. χ^{ni} ; B. sus, V. siusu, W. sös; G. sase, P. sāī, Tirāhī spaz, Gār. išpō, šā, Š. sah, but Kh. ispusār, sister.

B. sū, V. isi-kh, W. sōi, sun. See No. 226.

Skr. dāru-; B. dāo, wood.

K. cau, four. See numerals.

230. rn > n > n.—The compound rn occurs, naturally,

only in words of Indian origin. The change to u, u, is most frequent in the eastern Modern Paiśācī languages.

Skr. karņa-; M. kāņ, Gār. kyan, Š. kūn, kön, Kś. kan, but B. kör, W., Kh. kār, P. kāŗ, K. knրð, krô, G. kham-ţu, ear. Skr. svarņa-; B. sūn, sön, W., G. son, P. sönā, Š. sön, Kś. svan, son, but V. šiù, K. sūra, Kh. sör-m, gold.

ine searcy sone, but to man, in surface, interested

231. rn > n > r, r' > .

232. rn > n > r, r > r.

This is confined to the Western languages.

K. $s\bar{u}ra$, V. $s\bar{u}$, Kh. $s\bar{o}r$ -m, gold. See No. 230.

K. $kur\delta$, $kr\delta$, B. $k\delta r$, W., Kh. $k\delta r$, P. $k\delta r$, ear. See No. 230.

233. rn > m.—This only appears in one very doubtful case, G. *kham-ta*, ear. The *m* may be a termination as in Kh. *sor-m*, gold.

234. rt > r.—This is the regular Pastō change. Cf. GIP. I², p. 208. In Shb. rt > t.

Av. $m \partial r \partial t a$ -, Skr. $m \gamma t a$ -, *marta-, dead : B. W. $\sqrt{m} \gamma$, die. Av. $k \partial r \partial t a$ -, Skr. $k \gamma t a$ -, *karta-, done : B. $k a \gamma \overline{a}$, he made.

235. rd=rd.—The compound is preserved in K. and Kh. Skr. gardabha-; K. gardō-k, Kh. gurdō-γ, but W., G., Gār. gadā, M. ghadā, an ass.

Skr. hydaya-, *hardaya-, Av. zərəd-, Sq. zård; Kh. herdi, but G. hera, P. harā, heart.

236. rd > d.--W., G., Gār. *gadā*, M. *ghadā*, an ass. See No. 235.

237. rd > r.—G. hera, P. harā, heart. See No. 235. Cf. Ps. zp^{a} .

238. ry > rı́ > ir > i (with syncope of r) > syncope of i.

239. ry > ri > r.—In Shb. ry > riy. In Pais. ry > jj or riy.

Skr. sārya- ; K. sāri, G. suri, Š. sārī, Kś. sirī, M. swīr, Gār. sīr, V. isi-hh, W. sōi, B. sā, P. sur, sun.

240. $r_{\tilde{s}} > \tilde{s} > s_{\tilde{s}}$ -Cf. Shb. vasa- for varsa-. Cf. also Av. bareša-, Prs. buš, mane.

Skr. śīrṣa-; K., M., S. šīš, šiš; Gār. thos, head.

241. ršt > št st > t, t.—A regular Eranian change.

Av. paršti-, Prs. pušt, Bal. phut; G. pišți, Kś. pušt, K. pišțō; B. pțī, ktī, W. yā-pațī, Š. pūtū, G. pata, M. patō, Gār. patā, Kś. pat, back (or behind).

242. $ršt > \dot{s} > \dot{c}$, $\dot{c}h$.—Av. paršti-, Yd. pišco ; P. paš-k-in, V. kčeh (cf. B. $kt\bar{\iota}$, above), Kš. pačh, behind. See No. 241.

243. l=1.—This is the usual rule.

Skr. chayala-; Kś. čawul^a, a he-goat.

Skr. chēla-; M. sāil, Gār. chēl, a she-goat.

Skr. vāla-; M. bāla, Gār. bāl, Š. bālī, Kś. wāl, hair.

Prs. lavand; B. lonë, W. laver, G. lawand, P. lawant, a slave.

244. l > j.—In Kś. this is the rule when \bar{a} (< \bar{i}) or y follows l.

Skr. aiguli-; Kś. $anguj^{u}$, a finger. A good example is the Prs. $m\bar{a}dar$. From the same original we have the Š. $m\bar{a}l\bar{a}$, mother. From this a masculine, $m\bar{a}l\bar{a}$, has been formed, with the meaning of 'father.' Kś. has the latter under the form mal^{u} , father, of which the feminine in Kś. is $maj^{\bar{u}}$, mother. Again, Kś. $kumul^{u}$, delicate, $kumujy\bar{a}r$, delicateness.

245. 1 (> 1) > r. 246. 1 > r.

The change of l > l is the rule in Pais. As regards l > r, cf. Shb. arabhati and rocetu.

Skr. anguli- ; W. ağur, K. angurya-k, B. angyur, Gar. angir, but V. igi, Kś. anguj^u, a finger. Skr. bidāla- ; Kś. brār^ū, a cat.

247. Apocope of 1.—V. igi, finger. See above.

B. gol, V. gul, W. göl, Š. gui (? through gujī, cf. No. 244), a country.

248. $\mathbf{v} = \mathbf{w}$, \mathbf{v} .—In Eranian this is typical of non-Prs. dialects. GIP. I², 415.

Aryan \sqrt{vadh} ; W. $\sqrt{a-vi}$, Š. \sqrt{wal} , bring. This root is typical of East Eranian. GIP. I², 417.

Skr. kykavāku-, cock; K. kakawak, but B. kakak, V. kakokā, a fowl.

Skr. vāla-; Kś. wāl, but M. bāla, Gār. bāl, Š. bālī, hair.

Av. vaēn-āmi, I. see; B. Jwar, W. Jrer, see.

Skr. /vat, rant, divide; P. wante, but B. bar-este, V. but-og, K. baš, G. /bent, M. bat-ha, W. mat-ini, share.

Prs. lavand; W. lavěr, G. lawand, P. lawant, but B. lově, a slave.

Av. vāra-; P. war-k, water.

B. ev, one. See numerals.

B. *viči*, W. *viši*, P. *wöst*, twenty. See numerals.

249. v > p.—This is peculiar to V. Cf. Nos. 148, 199, and 323.

V. ip-in, one. See numerals. Cf. No. 90.

Cf. W. *vī*, Kh. *pi-sa*, you. See p. 47.

250. $\mathbf{v} > \mathbf{b}$.—M. *bāla*, Gār. *bāl*, Š. *bālī*, hair. See No. 248.

Skr. vādya-; Kh. baše-ik, singing.

B. bay-este, V. but-og, K. baš, G. *Abent*, M. bat-ha, share. See No. 248.

Av. $hiz\bar{u}$, Śg. $z\bar{e}v$; G. zib, M. $z\bar{e}b$, but Kś. $z\bar{e}o$, tongue. K. $hi\bar{s}\bar{i}$, Kh. $hi\bar{s}r$, Gar. M. $b\bar{i}\bar{s}$, twenty. See numerals.

-250]

251. $\mathbf{v} > \mathbf{m} > \hat{\mathbf{u}}$.—The change of v > m is rare in both Indian and Eranian.

W. mat-ini, share. See No. 248.

Gār. num, M. nan, nine. See numerals.

252. Vocalisation of v.

253. ava=ava. See No. 248.

254. ava > a. See No. 263.

255. va, ava $> \breve{o}$, \breve{u} (iu, see No. 17).

Skr. svarņa-; B., Š son, W., G. son, P., sonā, Kh. sor-m, Kš. son, B. sūn, V. šiù, gold.

Skr. sva-, Av. $\chi^r a - t \bar{a}$; V. $\check{s} \bar{\bar{a}}$, W. $\check{s} \bar{\bar{a}}$, self.

Av. span-, *svan-; W. čā, G. šunā, P. šāri-ng, Š. šā, Kš. hūn", but K. šēr, dog.

Skr. pravat- ; G. puda-mi, P. pōyā, Kh. pru-šţa, before. Skr. kykavāku-, cock ; V. kakokā, but K. kakawak, B. kakak, a fowl.

O. Prs. /šiyav, Av. /šav; W. /cñ, Gār. /cō, go.

Prs. larand; B. lonē, a slave, but W. larèr, G. lawand, P. lawant.

Av. $\chi \check{s} r a \check{s}$; B. $\check{s} o$, V. $u \check{s} \bar{u}$, W. $\check{s} \bar{u}$, Gar. $\check{s} \bar{o}$, M. $\check{s} oh$, but P. \check{s}^a , $\chi \bar{e}$, Š. $\check{s} ah$, six. See numerals.

256. ava > e. K. šėr, dog. See No. 255. W. *laver*, a slave. See No. 255. P. $\chi \bar{e}$, six. See No. 255. Cf. Kurd *neh*, nine.

257. iv>ä, ð.

258. $v \bar{v} = v$

The change of $\tau ra > \tau$ is frequent in Eranian. Gray, 391.

Av. $j(\bar{\imath})$ vant-; B. $\tilde{s}\bar{u}w\bar{a}$, alive; V. $\tilde{s}\bar{o}$ - $\bar{o}kso$, he is alive:

W. $\hat{sud}a$, alive; K., Kh. *junu*, alive, G. *zien*, alive, Š *juno*, alive. Kh. *žanu*, Gar. *jundo*, are derived from *juant*.

259. $\mathbf{\bar{ev}} > \mathbf{\bar{e}}$, $\mathbf{\bar{i}}$, $\mathbf{\bar{a}}$. **260.** $\mathbf{\bar{ev}} > \mathbf{eo.}$ Cf. Shb. $\mathbf{\bar{e}}cam > yo$. Av. $a\mathbf{\bar{e}}ca$ - ; B. $\mathbf{\bar{e}}$, W., P., Kh. $\mathbf{\bar{i}}$, Gar. $\mathbf{\bar{a}}$, one. See numerals. Šg, $z\mathbf{\bar{e}}c$; Kś. $z\mathbf{\bar{e}}o$, but G. zib, M. $z\mathbf{\bar{e}}b$, tongue.

261. Aphæresis of v(i). V. $z\bar{u}$, G. $i\bar{s}\bar{t}$, twenty. See numerals.

262. Prothesis of w. A few sporadic instances. Cf. Shb. *cuta*. Cf. also, No. 21.

Av. $\bar{a} + \sqrt{ay}$; S. $\sqrt{w\bar{a}}$, come.

Av. angušta-, toe, Prs. angušt-ar, a ring; V. $w \bar{o} g i \chi$, a finger-ring. See Vocab.

Av. stawra-; V. wištar, great. Skr. \sqrt{is} ; Kh. \sqrt{wes} , but V. \sqrt{es} , G. \sqrt{sa} , send. Cf. GIP. I², 298.

263. Syncope of w, v.—B. kakak, a fowl. See No. 255.

264. $\dot{s} = \dot{s}$.—This follows Eranian rather than modern Indian custom. In Paiś. $\dot{s} > s$.

Skr. śtrsa- ; K., M., Š. šiš, štš, a head.

Skr. *\drś*; P. *\laš*, see.

Skr. daśa- ; W. $d\bar{a}\check{s}$, Kh. $ja\check{s}$, K., G., Gār., M. $da\check{s}$, Š. $d\bar{a}\check{s}$, ten. See numerals.

Skr. viaisati- ; W. $v\bar{\imath}s\bar{\imath}$, G. $is\bar{\imath}$, K. $bis\bar{\imath}$, Kh. bisr, Gar., M. $b\bar{\imath}s$, twenty. See numerals.

265. $\dot{s} = \dot{s}$.—This is the usual Eranian custom (Gray, 423).

Wkh. piš, Prs. pušak; B. pišaš, pšīāš, V. pši-kh, W. pišā, K, $ph\bar{u}\bar{s}-ak$, P. $p\bar{i}\bar{s}\bar{o}$ -, Kh. $pu\bar{s}i$, Gar. $p\bar{i}\bar{s}\bar{i}$ -r, but G. $ps\bar{a}si$, a cat.

127

Av. nišhidaiti, he sits; W., G., Kh. \sqrt{ni} , but B. \sqrt{ni} , K. \sqrt{ni} , P \sqrt{ni} , set.

266. $\dot{s} > \chi$.—This is common in P. In the Eastern dialect every \dot{s} becomes χ . Cf. Pš and Ghalcah.—See GIP. I², 417. Cf. also Prs. $ri\dot{s}$; Kh. $ri\chi$ - $i\dot{s}$, beard.

In Ks. the suffix of the 2nd person singular is -kh, as compared with B. -s.

267. $\dot{s} > c.$ —Skr. *śuşka-*; Kh. *cuco*, dry (Tom, 895). Skr. \sqrt{pas} ; Š. \sqrt{pac} . See No. 264.

268. $\dot{s} > \dot{c} > z$.—Skr. daśa- ; B. dič, V. leze, ten. See numerals.

Skr. viiiisati- ; B. viči, V. $z\bar{u}$, twenty. See numerals. Cf. the following.

269. Š>c>č

270. $\dot{\mathbf{s}} > \mathbf{c} > \dot{\mathbf{z}}$.—The change of $\dot{s} > c$ also occurs in Prs. dialects. GIP. I², 71. The change of $\dot{s} > \dot{z}$ also occurs in Šg and Ps.

Av. aši-; B., W. ace, K., Kh. ec, G. iči-n, V. iži, eye.

O. Prs. \sqrt{siyar} , Av. \sqrt{sar} , Skr. \sqrt{eyar} ; W. $\sqrt{e\bar{u}}$, Går. $\sqrt{c\bar{o}}$, go.

B. $\sqrt{ni\tilde{z}}$, sit. See No. 265.

Š. biža, twenty. See numerals.

271. $\hat{s} > s$.—This is the Paiśācī rule. It is rare in Modern Paiśācī. Cf. Shb. anusocanam, samacariya- The only certain example is :—

Skr. kēśa-; G. khēs, hair.

272. $\dot{s} > s$.—There is also only one example of this. Cf. 286.

Av. nišhi $\delta aiti$, he sits; K. \sqrt{nis} , sit.—See No. 265.

273. \$ > h > apocope of \$.—Skr. $upa + \sqrt{vi\$}$; K\$. \sqrt{byah} , beh, M. \sqrt{bhai} (for *baih), G $ar. <math>\sqrt{bai}$, $\$. \sqrt{b\bar{e}}$, sit. Š. bī, bēh, Kś. wuh, twenty; Š. dāī, deii, Kś. dah, ten; Kś. hath, a hundred, See numerals. Cf. No. 321.

274. Š > h > apocope of Š. – See Gray, 430, 431. Av. $\chi \check{s} r a \check{s}$; G., M. $\check{s} o h$, K. $\check{s} \bar{o} h$, Š. $\check{s} a h$, B. $\check{s} o$, V. $u \check{s} \bar{u}$, W. $\check{s} \bar{u}$, P. \check{s}^{a} , Gar., $\check{s} \bar{o}$, six. See numerals.

275. $\mathbf{\check{st}} = \mathbf{\check{st}}$.—Prs. angušt-av; B. angušti, W. anguštö, Kh. pulangušt, but V. $w \bar{o} g i \chi$, P. ang $\bar{o} e^{-a} k$, Gar. angusiv, finger-ring.

Av. ustra-; B. styur, V. istiur, but W. $\bar{u}k$, G., M. $\bar{u}\chi$, camel. Cf. No. 290.

276. Št $> \chi$ t $> \chi$.—V. $w \bar{a} g i \chi$, a finger-ring. See above. Cf. Av. $a \dot{a} g u \dot{s} t a$ -, Sq. $i n g a \chi t$, a finger.

277. št > c.—Cf. No. 63.
P. anyōc-"k, a finger-ring. See No. 275.

278. st > s.—This is common in Eranian. See Gray, 918.

Gār. angusir, a finger-ring. See No. 275.

279. Štr = Štr (with anaptyxis of u).—Av. uštra-; B. štyur, V. ištiur, but W. $\bar{u}k$, G. M. $\bar{u}\chi$, a camel. Regarding the insertion of y, i, see No. 17.

280. štr > št > χ t > χ > k.— $u\chi$, G., M. $\bar{u}\chi$, W. $\bar{u}k$, a camel. See No. 279.

281. $\dot{sy} > \dot{s}$.—Cf. Eranian change of $\dot{sy} > \dot{s}$ (Gray, 931). In Shb. $\dot{sy} > \dot{siy}$.

Skr. \sqrt{uas} , uasyati; K. \sqrt{uas} (with compensatory lengthening), die.

Skr. $\sqrt{pa\hat{s}}$, $pa\hat{s}yati$; Š. (dial.) $\sqrt{pa\hat{s}}$ (with compensatory lengthening), Kh. $\sqrt{pa\hat{s}}$, M. $\sqrt{pa\hat{s}}$, but Š. \sqrt{pac} .

[282-

282. śy > c.—Cf. Eranian change of $\delta y > c(c)$ (Gray, 930).

Š. \sqrt{pac} , see. See above.

283. šl > hl.—P. šlī-kā or $hl\bar{\iota}$ -kā, a woman.

284. § > c, ch.—Cf. Hindī *cha*, six. Also Cf. No. 269. B. *mancī*, *mach-ku-y*. K. *mŏc*, a man. See No. 285.

285. \$ > \$.—This is not Indian. \$ is treated as if it were \$. See No. 265.

Skr. rşabha-; Kh. rešū, a bull. Cf. Shb. manuśa-.

Skr. možnușa-; W. manaž, G. manuž, V. muž, S. mūž, Kh. mož, M. māž, Gār. mēž, but B. mancī, mach-ku-ŗ, K. mŏc, Kš. mahan-iru, a man.

Skr. prēșita-; W. prešya, sent.

Skr. \sqrt{is} , $\tilde{e}sati$; G. $\sqrt{s}a$, Kh. \sqrt{wes} , but V. \sqrt{es} , send.

286. \$ > \$.—Cf. No. 272. Also cf. Shb. arabhiyisu, yesu, abhisita.

V. $\land es$, send. See No. 285.

287. $\mathfrak{s} > \mathfrak{h}$.—Kś. mahau-ivu, a man. See No. 285. After the change there has been metathesis of h.

288. $\mathbf{sk} > \mathbf{kh.}$ —Skr. *śuska-*; Kś. *hwąkh^u*, dry. The Kś. feminine is *hwąch^a*. Cf. No. 289. In Shb. sk > k.

289. sk > c.—Cf. Eranian $\delta k > c$.

Av. huška-, Pš. wuc, Skr. śuşka- ; Kh. cuco, dry (Tom, 895).

290. st or t > t, t > t > t, t > t, t > t, t > t, t = t.—Here, again, t is treated as if it were Eranian t.

B., W. ośt, Kh. ošt, K., G., Š. ašt, P. ašt, V. aste, Š. ačh, aš, ažat; but Gār. ath, Š. ath, M. āth, Kś. aith, eight. See numerals.

291. st > (t)th, (t)th.—Here s! is approximately treated in the Indian fashion, but there are also Eranian analogies.

Skr. drsta-; Gar. \sqrt{lith} , see (no compensatory lengthening).

Gār. ath, Ś. ath, Kś. aith, M. $\bar{a}th$ (compensatory lengthening), eight. See No. 290 and numerals. Cf. Wkh. $h\bar{a}\theta$, $h\bar{a}t$, Ps. ata, Shb. atha-.

292. str > (t)th > t.—See No. 279. Here the Indian fashion is followed. Skr. *ustra-:* Gar. *ūth*, Kś. *wŭth*, K., Kh., Š. *ut*, a camel.

293. $sp > \check{s}$.—This is not an Indian change. Skr. *puspa*- ; K. *pūš*-*ik*, Kś. *pōš*, a flower ; B. has *put*-*ik*.

294. s = s.—The preservation of s in Eranian is typical of the non-Persian dialects. GIP. I², 414.

Skr. divasa-; V. ves, W. wās, K., Kh. bas, P. dawās, dwās, M. dis, Gār. dōs, Š. dēs, but Kś. dwah, doh, G. bā, a day.

Av. sarah-, Skr. śiras-; Kh. sor, but B. šei, pšai, V. ji, W. šei, G. šau-ța, P. šīr, Kś. hīr, a head.

Skr. māsa-, Sq. mâs; B. mōs, V. mas-ekh, W., Kh. mās, G. māsoi, moon, month.

Aryan, nās-; B. nas-ur, V. nes, W. nasū, G. nāsi, Kh. nas-kā-r, but B. (also) naz-ur, Gār. nōz-ōr, nose.,

See all the words for 'seven' under numerals.

Skr. srasār-; B. sus, V. siusu, W. sōs, G. sase, Kh. ispusār, but P. sāī, Tirāhī spaz, Gār. išpo, šā, Š. sah, sister.

Skr. sārya-; B. sā, V. isi-hh, W. sōi, K. sāri, (4. suri, P. sur, M. swīr, Gār. sīr, Š. sārī, Kś. sirī, sun.

295. $\mathbf{s} > \check{\mathbf{ch}}$.—In Kś. *s* optionally $> \check{ch}$ before $\check{u} (< \bar{\imath})$ or *y*. The *y* is always elided. Thus \sqrt{bas} , dwell, $bas^{\tilde{u}}$ or $ba\check{c}h^{\tilde{u}}$, she dwelt: bas^{a} or $ba\check{c}h^{a}$ (for $basy^{a}$), they (fem.) dwelt.

296. s > z > j.—The change of s > z also occurs in Kurd.

B. azem, but V. esmo, I am. In B. before i s becomes ξ . See No. 297.

B. naz-ur, Gār. nōz-ōr, nose. See No. 294.

Tirāhī, spaz, sister. See No. 294.

G. \sqrt{phus} or phuz, lose, compared with B. $\sqrt{ps\bar{e}}$, V. $\sqrt{ps\bar{a}}$, W. \sqrt{pus} .

V. *ji*, head. See No. 294.

297. $s > \dot{s} > kh$.—Only before original *i*. In Eranian the interchange of *s* and *š* is typical of non-Prs. dialects. GIP. I², 416. Cf. Shb. anuśaśanani.

B. eši, thou art. See No. 296.

B. šei, pšai, W. šei, G. šau-ța, P. šīr, head. See No. 294.

Kś. kar-akh, thou doest. See verbs.

298. s > h > i > apocope of s.—The change to h has only been noted in Š. and its related Kś.

Kś. $h\bar{i}r$, head ; doh, day. See No. 294.

S. sah, sister. See No. 294.

Skr. māsa-, Av. māh-, Pš. -maī; P. mai(y)-ik, moon.

P. sāī, sister. See No. 294.

Gār. i spo, sister; G. ba, day. See No. 294.

299. st = st.—Cf. Paiśācī, kasaļa- $\langle kasla-, sināta- \langle snāta-$. The preservation is, of course, Eranian in method. Indian changes st to tth, but Shb. st = st.

Av. ast- (Horn, 81); Kh. ast \overline{i} , bone.

Av. zasta-, O. Prs. dasta- ; V. lust, but B. dušt, dui, W. došt, hand.

Skr. hasta- ; K. hāst, G. hast, P. hāst, hās, Kh. host, but Š. hatth, hath, Kś. hath, M. hā, hand.

Av. staora-; Kh. istor, horse.

Skr. nasta-; P. nāst, Kś. nast, but K. nāte-ur, M. nath-ār,

S. nātō, nutō, nose. Av. star- ; Kh. istāri, but B. raštā, V. ištī-kh, star. 300. st > (t)th θ > t > tc. st > (t)th is Indian.

Š. hatth, hath, Kś. hath, hand. See No. 299.

M. *nath-ŭr*, nose. See No. 299.

O. Prs. * $ava + \sqrt{sta}$; M. \sqrt{uth} , Kś. \sqrt{woth} , B. \sqrt{ut} , arise. See No. 303. Cf. Horn, 84.

S. uātō, uutō, nose. See No. 299.

O. Prs. * $adi + \sqrt{sta}$; Gar. \sqrt{it} , but V. \sqrt{ist} , arise. Cf. Horn, 84.

K. uātc-ur, nose. See No. 299.

301. st $> \theta > h$.—O. Prs. (stā, stand; (t. θ anaïm, Š. hanus, I am.

302. st > r.—With this may be compared the old legend that Kālidāsa, when a boy, sometimes pronounced *ustra-*, '*ur*,' and sometimes '*ukh*.'

O. Prs. * $ava + \sqrt{sta}$; P. \sqrt{ur} , arise. See No. 303. Cf. Horn, 84.

303. st > st > st.—This change is confined to words of Eranian derivation, and only occurs in these dialects.

O. Prs. * $ava + \sqrt{st\bar{a}}$; B. \sqrt{ost} , \sqrt{ut} , V. \sqrt{ost} , G. \sqrt{ust} , but P. \sqrt{ur} , M. \sqrt{uth} , Ks. \sqrt{woth} , arise.

Aryan sauti, they are; B. ašt, but V. asto, they are. Cf. Pś. šta.

Av. zasta-, O. Prs. dasta-; B. dušt, W. došt, but B. also dui, V. lust, hand.

Av. star-; B. rašta, V. ištī-kh, but Kh. istāri, a star. Av. stawra-; V. wištar, great.

304. st > ss > s (> h) > apocope of st.—This is Eranian, but rare. See Gray, 864, GIP. I², 81.

B. *acūnistai* or *acūnissī*, they had run. See verbs.

V. eso (for asti), P. $h\bar{a}s$, he is, but V. asto (santi), they are. See verbs.

Skr. hasta-; P. hās, M. hā, hand. See No. 299.

305. $str = str > \check{s}tr$.—In Shb. str = str.

Skr. strī; K. istri, B., W. ištrī, but V. westi, G. ši-gālī, P. šlī-kā, hlī-kā, Gār. īs, Š cei, čhrī-ga, čhaī, Kś. trēī, trai.

306. str > čhr > šl> hl.—Š. čhrī-ga, P. šlī-kā, hlī-kā, woman. See above.

307. str > tr > c > čh.—Cf. No. 141. Kś. trēī, trai, Š. cei, čhaī, woman. See above.

308. str > šl (as above) > š > s. — G. ši- $gal\overline{\iota}$, Gar. $\overline{\iota}s$ (with compensatory lengthening), woman. See above.

309. str > st.—V. westi, woman. See above.

310. sp > šp > š> h.

311. $sp > \check{s}p > \check{s} > \check{c}$.—These are Eranian rather than Indian. See Gray, 878, 879.

Av. span-; K. šēr, G. šunā, P. šur-ing, S. šū, Kś. hūn^u, W. čū, dog.

Av. aspa- ; B. u^sp, Š. a^sp \bar{o} or ap^s, K. $h\bar{a}$ ^s, horse.

312. sm > sp > s.-So in Shb.

Kh. ispa, V. as, etc., we, our. See pronouns. V. esmo, aso, I am. Cf. Av. asman-; Prs. dial. asbān, heaven. (Gray, 886.) Cf. also Ptolemy's $Ka\sigma\pi\epsilon i\rho a$ for Kaśmira.

313. sy > si > si > si > si > i.—Cf. Gray, 891, 892. In Shb. sy > siy.

Skr. $\bar{a}sya$ -; G. haisi (with compensatory nasalisation); Kś. $\bar{a}s^i$ (with compensatory lengthening), B., K. $a\dot{s}i$, V. $i\ddot{s}$, W. $\bar{a}\dot{s}$ (compensatory lengthening), M. Gār. $\bar{a}\tilde{i}$, Š. $\tilde{a}\tilde{7}$, but B. also $a\dot{z}i$, Š. (dial.) $\bar{a}z\bar{\imath}$, mouth.

314. sy $\geq \dot{z} \geq z$.—B. $a \not\equiv i$, Š. $\bar{a} z \bar{i}$, mouth. See No. 313.

315. sr > s.—In Shb. sr > s.

Av. \sqrt{srav} , Prs. $\frac{sun\bar{u}dan}{s}$: K. \sqrt{san} , V. \sqrt{nus} (meta-thesis), M. \sqrt{sun} , hear.

316. sva > sŏ, sū.—Cf. No. 255. In Shb. sv usually > s. Skr. svarya- : B., Š. sōn, W., G. son, P. sōnā, Kh. sōr-m, Kś. son, B. sōn, but V. šiū, gold.

Skr. svasār- ; W. sōs, B. sus, but V. siusu, G. sase, P. sāī, Š. sah, Kh. ispusār, Tirāhī spaz, Gār. išpō, šū, sister.

317. sva > siu, šiu > šū.—The only examples of this are in V., but in all the dialects *i* is commonly inserted before *u*.

V. siusu, Gār. šū, sister, šiù, gold. See No. 316.

318. sva $> s\check{a}$.—G. sase, P. saī, Š. sah, sister. See No. 316.

319. sva > špo, spu, spa.—Compare Skr. śun-, Av. span-, dog, and Skr. aśca-, Av. aspa-, horse. See Nos. 310, 311. The change of sp to šp is peculiar to these dialects. Cf. Shb. spasman.

Går. išpö, Kh. ispusār, Tirāhī, spaz, sister. See No. 316.

320. $\mathbf{h} = \mathbf{h}$.—Skr. hydaya- ; G. heya. P. hayā, Kh. herdi, heart. Cf. Sq. zård.

321. h > i.—Eranian.

Av. $m\bar{a}h$ -; P. mai(y)-ik, moon. Cf. Ps. - $ma\bar{a}$, etc., as given in Vocab. See Gray, 451.

Cf. Kh. *choi*, for *choh*, six: S. $da\overline{a}$, *dvii*, for *dah*, ten. See numerals.

322. h > s.—This is the rule in Ks. when h is followed by $\tilde{\mathbf{u}}$ ($< \bar{\imath}$) or y. Thus hih^a , like; fem. sg. $hi\check{s}^a$, fem. pl. $hi\check{s}\bar{e}$ (for $hi\check{s}y^a$). In every case the h has been derived from \acute{s} . The real rule is therefore not $\acute{s} > h$, but $\acute{s}^{\bar{u}}$, $\acute{s}y > \acute{s}^{\bar{u}}$, $\check{s}y$, respectively. 136

323. hv > (b)bh > b > p.-Skr. jihvā; Gār. (semi-Indian) jībh, K., Š., P. jib, W. jip, tongue.

324. Prothesis of h.—Cf. Shb. hia, hida, hediśa..
Š- hagār or agār, fire, from Skr. angāra.. See Vocab.
Av. antara; K. hāndū-n, house.
Skr. āsya-; G. hūsi, mouth. See Vocab.
Kh. haiya, etc., he. See pronouns.

325. Metathesis of consonants.—This is not unfrequent. Especially frequent is the transfer of r when it forms part of a conjunct consonant. Thus:

Skr. karņa-, K. krõ, ear.

Skr. parna-; K. pron, a leaf.

Skr. karman-, Š. krom, work.

Skr. dīrgha-; K. drīga, M. līga (for *drīga), Š. žīgō (through *drīgō), long.

Compare also a still more perfect metathesis in Av. star., B. rašta, star.

It is hardly necessary to draw attention to the similar transfers of r in the Shb. inscriptions.

Examples of metathesis of other consonants are : n and h—

Kś. mahaniru for manahiru, man.

n and s—

V. \sqrt{nus} for sun, hear.

c and r—

Av. *crant-*; V. *pseh* (through #sp for *cv*), what? *c* and *r*, with additional aspiration of *c* to *ch*—

Av. Skr. \sqrt{car} ; Kh. \sqrt{roch} , graze. $\frac{s}{2}$ and p—

Š. $a \not > p \overline{p}$ or (dial.) $a p \not >$, horse.

Cf. in connexion with this the transfer of aspiration in M. $dh\bar{a}$, daughter (see Vocab.), and in M. \sqrt{bhai} for *baih*, sit.

326. Harmonic sequence of vowels.-This is the rule

in the neighbouring Burusaskī, and there are many traces of it in the Kāfir dialects, though the rules to which it is subject are not yet ascertained.

We may quote V. *tu-gnl*, to a country, but *ti-bzi*, going, approaching, entering (a house) (\sqrt{pez}). Again Skr. *mukha-*, a face, but V. *ti-mikh*, before.

B. bay-este, but V. but-og, a share. Here the a of bat seems to have been changed to u to harmonise with the o of og.

K. güro for gäro (gāna-), singing.

327. Epenthesis of vowels.—Epenthesis of i and u is very common in Kś. The whole grammatical system of that language is mixed up with changes produced by epenthesis. The student is referred to works dealing with the language for further information.

In the Käfir languages epenthesis of i is frequent. Thus—

Av. aši- : V. iži, G. ičiu, K., Kh. ec, eye.

B. dušt, hand, plur. duišt for dušti, hands.

Skr. $\bar{a}sya$ - (i.e., $\bar{a}sia$); V. $i\check{s}$, Kś. $\bar{a}s^i$, pronounced $\ddot{o}s^i$, mouth.

Skr. sārya- (i.e., sāria); V. isi-kh, M. swīr, Gār. sīr, Kš. sirī, sun.

328. Nasalisation of vowels. — Vowels are often nasalised. Thus—

Av. $\bar{a}\theta r$ -; W. $\tilde{e}r$, fire.

Skr. khura-; B. kyur or kũr, a foot.

Cf., possibly, B. ouč or õč, V. unzu, I; V. eude-š, my. See Pronouns. Cf. also No. 110.

329. Voicing of initial surd consonants after a preceding soft letter occurs in the Kāfir language, but the rules have not yet been ascertained with sufficient accuracy. As a certain example, we may quote V. \sqrt{pez} , go, be-bzi, going outside : ti-bzi, going to, approaching. Similarly we have B. as-ke, he, but $am-g\bar{i}$, they, and many others.

A. MODERN PAIŚÀCĪ.

[Order of letters : Words commencing with vowels are put first. Then those commencing with consonants. In other respects, vowels are altogether neglected in arranging words in alphabetical order. Consonants are alone considered. The following is the order of consonants :—k, kh, χ , g, (gh), γ , n, c, ch, j, z, ξ , n, ℓ , ℓh , j, n, t, th, d, r, p, t, th, θ , d, (dh), \hat{c} , n, p, ph, f, b, (bh), m, y, r, l, v, w, \dot{s} , s, h.]

1. Bašgalī.

ao, water, 8, 191. *š*, my, 108. *σ*, one, 37, 259. *agõ*, fire, 1, 8, 82, 83, 226. *angā*, fire, 1, 3, 82, 226.

angyur, a finger, 1, 17, 20, 82, 246. angušti, a finger-ring, 1, 82, 275. $ac\tilde{e}$, an eye, 5, 56, 209. acūnistai, they had run, 304. acūnissī, they had run, 304. azem, I am, 296. ati, the mouth, 4, 313, 314. aže, a bull, 11, 41, 44, 45, 68, 72. √ ač, come, 126. $\sqrt{e\check{e}}$, see $pr + \sqrt{e\check{e}}$. [ac], I, 106, 176, 328. onč, I, 105, 106, 176, 328. *at*, hunger, 51, 125. √ ut, arise, 20, 300, 303. Cf. wut. ot, hunger, 51, 125. ate, within, 1, 179, 181, 226, 229. ater. within, 1, 40, 179, 181, 226, 229. am- gī, they, 329. ariu, silver, 11, 17, 20, 188, 191. aru, silver, 11, 17, 20, 188, 191. ev. one, 37, 248. ōv, water, 8, 191. aši, the mouth, 4, 313. ašu, a bull, 11, 44, 68, 72. cši, thou art, 297. ast, they are, 303. ost, eight, 8, 290. √ ošt, arise, 20, 23, 303. ištrī, a woman, 13, 305. ušp, a horse, 8, 310. as-ke, he, 329. aspāp, property, 199. kē, what?, 47. kai, what ?, 47. kakak, a fowl, 31, 47, 248, 255, 263. kara, he made, 234. kuri, a dog, 30, 47. ktī, the back, 5, 12, 126, 241, 242. kyur, the foot, 17, 20, 61, 62, 226, 328. krùī, a dog, 30, 47.

kur, an ass, 1, 8, 61, 62, 226.

kùr, a foot, 20, 61, 62, 226, 328.

, kor, do, 8, 47, 226. kör, ear, 8, 47, 230, 232. gio, a cow, 44, 68. √ gi-ač, bring, 68, 93. grom, a village, 75, 211. gol, a country, 247. 2015 gōh, a cow, 44, 68. cõ, a kid, 18, 85. cimr, iron, 85, 211. comar, iron, 85. cimeh, iron, 85, 211. jn, a daughter, 81, 150, 152, 226, 229. ju-k, a daughter, 81, 150, 152, 226, 229. zare, the heart, 105, 154, 229. žu, hair, 23, 152, 157. žarr, noise, 228. Cf. rārā. In tiu, thou, 129. INTE tot, a father, 8, 125. tōtt, a father, 8, 125. tapip, a physician, 199. treh, three, 137, 221. dao, wood, 229. du, two, 150. diu, two, 17, 150. dui, a hand, 8. 150, 299, 303. di-ktī, behind, 126, 188, 189. dič, the tongue, 16, 91, 153. (1212 dič, ten, 5, 150, 268. dutt, a tooth, 8, 150, 179, 181. 110 dyor, far, 17, 20, 150, 226, 227. dyur, far, 17, 20, 150, 226, 227. dru. hair, 23, 152, 157. duišt, hands, 327. dušt, hand, 8, 150, 299, 303, 327.

 $n\bar{v}$, a mother, 169, 175. naz-ur, the nose, 4, 115, 169, 294, 296. $\checkmark n\bar{v}$, sit, 13, 169, 265, 270. $\checkmark n\bar{v}t$, dance, 31, 135, 169. $\checkmark n\bar{v}t$, dance, 31, 34, 169. $n\bar{v}n$, a mother, 169. nas-ur, the nose, 169, 294. $no\bar{h}$, nine, 169.

puc, tive, 111, 188. pti, the back, 5, 12, 188, 241. put-ik, a flower, 188, 293. pitr, a son, 20, 26, 138, 188. putr, a son, 20, 138, 188. putr, a son, 20, 138, 188. pu-myuk, before, 20, 61, 62, 211. \checkmark prē, give, 155, 195. pr + \checkmark eč, \checkmark preč, come, go, 195, 222, 223. parmų, a child, 9, 172, 188, 218, 226. \checkmark psē, lose, 30, 296. pšātāš, a chat, 19, 190, 265. pišaš, a cat, 12, 190, 265.

bar, out, outside, 6, 162, 226, 227.
ber-ã, out, outside, 6, 162, 226, 227.
bar-este, a share, 113, 115, 248, 250, 326.
√ bar, share, 1.
brā, a brother, 8, 143, 144, 203.
brōh, a brother, 8, 143, 144, 203.

mach-ku-r, a man, 115, 169, 177, 211, 284, 285. *mancī*, a man, 1, 169, 211, 284, 285. *manje*, a man, 1, 169, 211, \sqrt{mr} , die, 211, 227, 234. *mrenze*, a bird, 12, 169, 211, 227. *myuk*, the face, 17. *maran-gač*, a bird, 12, 68, 93, 169, 211, 227, 229. *mōs*, the moon, a month, 8, 211, 294.

√ yū, eat, 220.

rārā, noise, 228. Cf. žarr. rašta, a star. 3, 18, 299, 303, 325.

10 - 2

viči, twenty, 130, 248, 268. wez-eh, a she-goat, 25, 26, 105, 201. √ war, see, 172, 248. √ wut, arise, 20, 21. Cf. ut. šū, life, 98, 102. šei, the head, 30, 226, 229, 294, 297. šo, six, 67, 255, 274. što, four, 88, 147. štyur, a camel, 17, 18, 20, 28, 275, 279. šāwā, alive, 98, 102, 257. sut, seven, 194. $s\bar{u}$, the sun, 18, 20, 221, 226, 229, 239, 294. / san, hear, 169, 315. sūn, gold, 17, 230, 255, 316. son, gold, 230, 255, 316. sus, a sister, 229, 294, 316. 2. Gārwī. ā, one, 37, 259. āi, the mouth, 8, 313. ū, water, 8, 191. ak, one, 37, 47. ãgār, fire, 1, 3, 82, 226. angir, a finger, 1, 20, 26, 82, 246. angusir, a finger-ring, 1, 82, 275, 278. ath, eight, 290, 291. *ith*, eye, 5, 56, 57, 96. $\bar{u}th$, a camel, 20, 22, 292. √ it, arise, 26, 300. išpō, a sister, 18, 229, 294, 298, 316, 319. is a woman, 13, 18, 305, 308. kai, what ?, 47.

louē, a slave, 185, 187, 243, 248, 255.

 $k\bar{n}kur$, a cock, 20, 22, 25–52–115. $kug\bar{u}$, a cock, 20, 22, 52, 115, 117. $k\bar{u}cur$, a dog. 47. $k\bar{v}$ -th, he made for thee, thou madest, 229.

kyan, the ear, 47, 50, 230. kēr, he made, 229. kōš, a shoe. 197. v'khō. eat, 4, 8, 61, 154. gar, a cow, 44, 68. \sqrt{gi} , bring, 68. gadā, an ass, 1, 68, 209, 210, 235, 236. giān, great, 5, 8, 78, 169. gör, a horse, 44, 79, 115. √ cō, go, 255, 269. cimar, iron, 85, 211. √ car, graze, 85, 226. cor, four, 85, 149. chēl, a she-goat, 94, 243. $j\bar{a}$, brother, 3, 104, 144, 203, 204. jāndō, alive, 98, 257. $j\bar{i}bh$, the tongue, 13, 14, 98, 323. thā, three, 137, 138, 221. tanī, own, 10, 131, 169. thair, hand, 150. thos, head, 240. √ da, give, 6, 150. dñ, two, 150. dūī, daughter, 81, 150, 226, 229. dand, a tooth, 1, 150, 179. dēōr, far, 17, 20, 150, 226. das, ten, 150, 264, dos, a day, 8, 19, 161, 294. nöz-ör, the nose, 4, 8, 115, 169, 294, 295. √ nēt, dance, 31, 33, 134, 135. num, nine, 251.

 $p\bar{u}c$, a son, 20, 22, 141, 188. panj, five, 87, 188. put, son, 20, 138, 188. pata, behind, 188, 241. $pa\bar{s}\bar{\imath}\cdot n$, a bird, 55, 59, 188. $p\bar{\imath}\bar{s}\bar{\imath}\cdot r$, a cat, 115, 190, 265.

\$b\vec{a}{s}\$e^{-i}\$k\$, singing, 156, 250.
\$b\vec{s}{s}\$r\$, twenty, 128, 250, 264.
\$bas\$, a day. 2, 8, 19, 162, 294.

 $m\bar{o}\dot{s}$, a man, 8, 169, 177, 211, 285. $m\bar{a}s$, moon, month, 3, 211, 294.

 $y\bar{o}r$, the sun, 8, 9.

 $ri\chi$ - $i\dot{x}$, the beard, 266. \checkmark roch, graze, 85, 226, 325. $re\check{s}\bar{a}$, a bull, 36, 209, 285.

KHŌ-WĀR, MAIYĨ

ligi-ni, the tongue, 16, 91, 153. $lc\tilde{s}\tilde{u}$, a cow, 36.

Jureš, send, 37, 262, 285.

šör, a hundred, 128.

sot. seven, 94.
 sor, the head, 226, 294.
 sör-m, gold. 230, 231, 233, 255, 316.

hato-γo, his, 48. haiya, he, 324. herdi, the heart, 235, 320. host, a hand, 8, 299.

7. MAIYÃ.

 \sqrt{ai} , come, 13, 15, 220, 221. \bar{ai} , mouth, 3, 313. ak, one, 37, 47. $\bar{a\chi}$, camel, 20, 22, 275, 279, 280. $ag\bar{a}r$, fire, 1, 3, 82, 83, 226. ainch, eye, 5, 7, 56, 58, 110. $\bar{a}th$, eight, 290, 291. \sqrt{ath} , arise, 20, 300, 303.

kūkō, a cock, 20, 52, 115, 117,
kāy, ear, 2, 47, 230,
√ kar, do, make, 1, 47, 226,
kūsar, dog, 47,
kūš, shoc, 197.

\khu, eat, 4, 61, 154. *khur*, foot, 20, 61, 226.

 $g\bar{\sigma}$, cow, 44, 60. $g\bar{\tau}$, what ?, 47, 49. $g\bar{\sigma}$, bull, 44, 68. $g\bar{\sigma}t$, house, 138. $g\bar{\sigma}t$, house, 44, 68, 138. $g\bar{\tau}la$, singing, 68, 172, 174. ghō, horse, 44, 77, 78, 115, 117. ghadā, ass, 1, 68, 70, 209, 210, 235, 236. $\gamma \tilde{b}$, great, 8, 77, 78, 169, 170. cā, three, 137, 141, 221. zēb, tongue, 105, 250, 260. $\tilde{z}a$, brother, 3, 104, 144, 203, 204. $d\bar{a}$, the back, 68. $d\bar{a}$ -g, the back, 68. $t\tilde{a}$, self, 10, 131, 170. tāra, star, 3, 125. dū, two, 150. / dai, give, 6, 7, 150. dan, tooth, 2, 150, 180, 182. dūr, far, 20, 150, 226, daš, ten, 150, 264. dis, a day, 6, 8, 19, 161, 294. dhī, a daughter. 81, 150, 164, 226, 229, 325. naù, nine, 251. √ nēt, dance, 13, 33, 169. nath-ār, nose, 2, 115, 169, 299, 300. nār, fire, 1, 9, 82, 84, 226. pāz, five, 87, 188. pāțh, son, 20, 22, 139, 188. pātō, behind, 188, 241. √ paš, see, 2, 188, 281. √ ba, become, go, 198. \sqrt{bat} , share, divide, 1. bat-ha, a share, 113, 248, 250. bücha, hunger, 20, 56, 202, 208. bāla, hair, 3, 243, 248, 250. bīš, twenty, 130, 250, 264.

 $bh\hat{\vec{v}}$, a sister, 170, 207. / bhai, sit, 27, 191, 200, 273, 325. ming, a bird, 205. māthā, before, 20, 61, 64, 96, 211. √ mar, die. 211, 226. māš, a man, 2, 169, 177, 211, 285. mhāī, a mother, 155, 216. liga, long, 78, 153, 157, 325. lām, a fortified place, 76. wi, water, 8, 10, 191. soh, six, 67, 255, 274. √ šun, hear, 169, 315. sal, a hundred, 128. sts, a head, 13, 240, 264. sāt, seven, 194. √ sār, graze, 85, 89, 226. sunr, four, 89, 149. sāil, a she-goat, 94, 97, 243. swir, the sup. 20, 26, 221, 226, 238, 294, 327. sewar, iron, 85, 89, 211, 215. hā, hand, 8, 299, 304. 8. PASAL √ a, eat, 220, 221, 223. ā, I, 108. āī, mother, 43, 98, 103. 7, one, 38, 259. √ e, eat. 220, 221, 223. angõc-^ak, a finger-ring, 1, 82, 275, 277. angār, fire, 1, 3, 82, 226. \sqrt{ac} , bring, 92. anc, eve, 5, 56, 110. √ ur, arise, 20, 302, 303. ašt, eight, 290. kö, what ?, 47. kukār, a cock, a fowl, 20, 22, 52, 115.

11 - 2

kăc, belly, 85.
ka-m, I do, 229.
√ kar, do, make, 1, 47, 226.
kār, ass, 1, 2, 61, 62, 226.
kār, ear. 2, 47, 230, 232.
kar-am, I do, 229.

 $\chi \bar{e}$, six, 67, 255, 256.

 $g\bar{a}$, cow, 44, 68. $g\bar{e}$, singing, 68, 172, 175. $g\bar{o}$ -, bull, 44, 68. $g\bar{o}r\bar{a}$, horse, 44, 78, 115. $ga\mu$, great, 8, 78, 169, 172. $g\bar{o}$ -lāng, bull, 44. $g\bar{b}\check{s}^{a}$ -g, house, 44, 68, 141. $g\bar{o}\check{s}i$ -ng, house, 44, 68.

cimar, iron, 85, 211. cumar, iron, 85, 211. cār, four, 85, 149.

jib, tongue, 13, 98, 323.
 jub, tongue, 13, 16, 98.

 $t\bar{a}t\bar{i}$, father. 3, 125. $t\bar{a}ni$ -k, self, 10, 131, 169. $t\bar{a}r\bar{a}$, star, 3, 125.

 $\sqrt{d\tilde{c}}$, give. 6, 150. $d\tilde{v}$, ten, 150. $d\tilde{v}$, ten, 150. $d\tilde{o}$, two, 150. $d\tilde{a}nt$, tooth, 150, 178, 179. $d\tilde{a}nd$, tooth, 1, 2, 150, 178, 179, 182. $d\tilde{u}r$, far, 23, 150, 226. $d\tilde{v}r\tilde{c}$, outside, 6, 161, 226. $d\tilde{w}\tilde{c}s$, a day, 2, 8, 19, 159, 294. $daw\tilde{c}s$, a day, 2, 8, 19, 294.

 $\sqrt{n\overline{i}}$, sit, 13, 14, 169, 265. $\sqrt{n\overline{i}t}$, dance, 31, 135, 169. $n\overline{a}st$ nose, 2, 169, 299.

 $p\bar{a}$, foot, 167, 188, pai, foot, 167, 188, panj, five, 87, 188, panj, five, 87, 188, $path\bar{c}$, a son, 10, 140, 188, $p\bar{c}\bar{c}\bar{a}$, before, 130, 255, $parhanik\bar{a}lc$, bird, 188, $p\bar{v}\bar{s}\bar{c}$ -, cat, 265, $p\bar{v}\bar{s}\bar{c}$ -, pad-ik, cat, 190, $pa\bar{s}$ -k-in, behind, 188, 242. mai(y)-ik, moon, 211, 224, 298, 321.

√yē, come, 13, 15, 220, 225.

λūτ, brother, 3, 144, 203, 206.
 lawant, slave, 185, 187, 243, 248, 255.
 √laš, sec. 31, 153, 264.

 \sqrt{want} , share, 1, 122. want, share, 113, 122, 248. wata, hunger, 51, 125. war-k, water, 248. wöst, twenty, 248.

š^e, six, 67, 255, 274. šā_f i-ng. dog, 169, 172, 255, 310, šīr, head, 14, 226, 294, 297, šlī-kā, a woman, 13, 283, 305, 306.

sāī, sister, 229, 294, 298, 316, 318.
sat, seven, 194.
sönā, gold, 230, 255, 316.
sur, sun, 20, 221, 226, 259, 294.

harā, heart, 235, 237, 320.
hl^a, three, 221.
hlī-kā, woman, 283, 305, 306.
hlī, three, 137, 140, 221.
hawata-, hunger, 51, 125.
hās, hand, 8, 299, 304.
hās, he is, 304.
hāst, hand, 18, 299.

WORD INDEXES

9. Šīnā.

āī, mouth, 3, 313. ek, one, 37, 47. agui, a finger, 1, 20, 82, 83. agār, fire, 1, 3, 82, 83, 226, 324. achī, eye, 5, 56, 96. āzī, mouth, 3, 313, 314. ā.ē, mother, 11, 43, 98, 100. ačat, eight, 290. ačh, eight, 290. ačhē, eye, 5, 56. ut, camel, 20, 22, 292. ath, eight, 290, 291. apš, a horse, 1, 310, 325. as, eight, 290. ašt, eight, 290. $a sp \bar{o}$, a horse, 1, 310, 325.

 \sqrt{ka} , eat, 4, 61, 62, 154. $kank\bar{o}r\bar{o}$ - $c\bar{o}$, a cock, 20, 23, 25, 52, 115. $k\bar{v}t\bar{i}$, foot, 20, 24, 61, 62, 226. $k\bar{v}n$, ear, 8, 47, 230. $k\bar{o}n$, ear, 8, 47, 230. krom, work, 8, 325. keh, why?, 47.

gui, a country, 247. $g\bar{o}$, a cow, 44, 68. $go\dot{z}$, a house, 44, 68, 141. $g\bar{o}t$, a house, 138. $g\bar{o}t$, a house, 44, 68, 138. $g\bar{o}-l\bar{o}$, a bull, 44, 68. $g\bar{o}\dot{z}$, a house, 44, 68, 141.

 $c\bar{c}$, three, 137, 141, 221. cei, woman, 13, 15, 42, 141, 305, 307. \sqrt{cak} , see, 141. $cing\bar{a}r$, iron, 85, 211, 212. cimar, iron, 85, 211. $c\bar{a}r$. four, 85, 149. \sqrt{ccr} , graze, 85, 226. corr, four, 85, 149. jö, from, 228. jīnō, alive, 98, 258. *jib*, tongue, 13, 98, 323. jrā, brother, 104, 144, 203, 204. jrō, from, 228. iā, brother, 3, 104, 144, 203, 204. żā, to, in, 228. 20, from, 228. ±ō, he, 228. žīgō, long, 78, 152, 157, 325. čhai, woman, 13, 15, 42, 141, 305, 307. čhrī-ga, woman, 13, 42, 141, 305, 306. t-am, I do. 165, 166. tomö, self, 10, 131, 173. trā, three, 137, 221. trē, three, 137, 141, 221. tārā, star, 3, 125. √trak, see, 141. 0-am, I do, 165, 166. daī, ten, 6, 7, 150, 273, 321. dī, daughter, 150. 226, 228, 229. dn, two, 24, 150. dii, two, 24, 150. \de, give, 6, 150. deii, ten, 6, 150, 273, 321. dīj-, obl. base of dī, 226, 228. dön, a tooth, 8, 150, 179, 182. dönö, a bull, 8, 124, 150. dör, far, 20, 150, 226. darn, out, 6, 161, 226. dāš, ten, 150, 264. des, a day, 6, 8, 19, 161, 294. îī, a daughter, 81, 226, 229. /nat, dance, 31, 135. $n\bar{a}t\bar{a}$, the nose, 2, 169, 299, 300.

nutō, the nose, 2, 169, 299, 300. √nath, dance, 31, 135, 136, 169.

 $p\bar{\sigma}$. foot, 167, 188. $po\lambda$, five, 111, 112, 188. \sqrt{pac} , see, 2, 188, 267, 281, 282. puc, son, 20, 141, 188. $p\bar{\pi}t\bar{\sigma}$, the back, 8, 188, 241. $\sqrt{p}\bar{\sigma}\check{s}$, see, 2, 188, 281. $pu\check{s}$, son, 20, 141, 188. $pu\check{s}$, five, 88, 111, 188. $p\check{\sigma}\check{s}$, five, 88, 111, 188.

phatā, behind, 188, 190.

\$\screwtarrow b\vec{v}\$, sit, 27, 191, 273.
\$\screwtarrow b\vec{v}\$, obsecome, 90, 198.
\$bing\$, a bird, 205.
\$bi\vec{v}\$, twenty, 270.
\$bring\$, a bird, 205.
\$bi\vec{v}\$, bird\$, hair, 3, 243, 248, 250.
\$bi\vec{v}\$, twenty, 273.
\$bi\vec{v}\$, twenty, 130, 273.

manujrō, a man. 104, 169, 211. manušō, a man. 1, 104, 169, 211. mācō, before, 20, 61, 63, 96, 211. $m\ddot{c}c\ddot{c}$, before, 20, 61, 65, 211. \sqrt{mir} , die, 211, 226, 229. $m\bar{c}l\ddot{c}$, a mother, 153, 155, 216, 244. $m\bar{c}l\ddot{c}$, a father, 244. $m\bar{c}s$, a man, 8, 169, 177, 211, 285.

rē, to, in, 228.
rē, to, 228.
rō, from, in, 228.
rō, he, 228.
rūp, silver, 11, 20, 188, 191.

 $\sqrt{w\bar{a}}$, come, 220, 223, 262. $w\bar{c}$, wei, $w\bar{a}\bar{i}$, water, 8, 10, 191. \sqrt{wal} , bring, 166, 248.

\$\vec{v}\$\overline\$, \$\vec{10}\$, \$169, \$170, \$255, \$310.

sete, seven, 194. siusu, sister, 222, 294, 316, 317.

12. WAI-ALĀ.

ao, water, 8, 191. *i*, one, 38, 259. oie, mother, 43, 98, 103. *āk*, camel, 20, 275, 279, 280. ek, one, 37. 47. àgàr, a finger, 1, 20, 82, 245. $\tilde{a}gu$ $\tilde{s}t\tilde{o}$, a finger-ring, 1, 82, 275. $ac\tilde{e}$, an eye, 5, 56, 269. √ ačh, come, 126, 222, 223. ěr, fire, 6, 142, 328. attar, within, 1, 179, 181, 226. *ārei*, silver, 11, 20, 28, 188. 191. √ a vī, bring, 166, 167, 248. avot, hunger, 51, 125. āš, mouth, 3, 313. ošt, eight, 8, 290. $\sqrt{\bar{o}st}$, arise, 20, 23, 303. ištrī, a woman, 13, 305. kiukiu, a fowl, 17, 20, 52, 115, 117. kiuč, the belly, 85, 86. kār, an ear, 2, 47, 230, 232. kas, what?, 47. gā, a cow, 44, 68. gur, a horse, 44, 46, 78, 115. gadā, an ass, 1, 68, 209, 210, 235, 236. *göl*, a country, 247. ch, a kid, 18, 85. √ cā, go, 255, 269. coro-k, hair, 20, 85, 120. cima, iron, 85, 211. \sqrt{car} , graze, 85. $c\bar{a}$ -st, he does, 50, 51. , cher, do, make, 6, 47, 94, 227. cher-am, I will do, 50, 226. $j\bar{a}$, a daughter, 81, 150, 152, 226, 229. *jip*, the tongue, 13, 98, 199, 323. zō, heart, 105, 154, 229.

čā, a dog, 169, 170, 255, 311.

tā, a father, 125, 130.
tata, a father, 1, 125.
trē, three, 137, 221.
tarā, a star. 3, 4, 125.
tanu, own. 10, 131, 169.

du, two, 150. $d\tilde{n}t$, a tooth, 1, 8, 150, 179, 181. $d\tilde{o}\tilde{s}$, ten, 8, 150, 264. $d\tilde{o}\tilde{s}t$, a hand, 150, 299, 303.

nã-geče, a bird, 68, 169, 211, 217, 229.
√ nat, dance, 81, 134, 135, 169.
√ niŝ, sit, 18, 169, 265.
nasū, the nose, 4, 169, 294.

 $p\bar{a}c$, five, 111, 188. pat, behind, 188. piatr, son, 17, 20, 137, 188. $p\bar{a}$ - $p\bar{a}$, foot, 167, 188. $\sqrt{pr\bar{c}}$, give, 155, 195. presya, sent, 37, 195, 285. $pis\bar{a}$, a cat, 190, 265. \sqrt{pus} , lose, 30, 296.

brā, brother, 3, 144, 203. ber. out. outside, 6, 162, 226.

√ mat, share, divide, 1.
 mat-ini, a share, 113, 248, 251.
 √ mr, die, 211, 234.
 manaš, a man, 1, 169, 211, 285.
 myak, face, 17.
 myak-ne, before, 20, 61, 62, 211.
 mās, moon, month, 3, 211, 294.

\$\sqrt y\vec{u}\$, eat, 220.
\$y\vec{v}\$, I, 108.
\$y\vec{u}\$-pat\$\vec{i}\$, back, 188, 241.

laver, a slave, 185, 187, 243, 248, 255, 256.

vĩ, you, 249.
√ vêr, see, 172, 248.
višĩ, twenty, 130, 248, 264.

wās, a day, 2, 8, 19, 162, 294. wasei, a she-goat, 25, 105, 107, 201.

\$\vec{x}\vec{a}\$, six, 67, 255, 274.
\$\vec{x}\vec{u}\$, self, 65, 255.
\$\vec{s}\vec{c}\$, head, 226, 229, 294, 297.
\$\vec{x}\vec{a}\$, four, 88, 147.
\$\vec{u}\vec{d}\vec{a}\$, alive, 98, 102, 257.

sōi, the sun, 18, 20, 221, 226, 229, 238, 294.
sōt, seven, 194.
sudu, far, 150, 226.
son, gold, 230, 255, 316.
sōs, a sister, 229, 294, 316.

B. ARYAN AND INDO-ARYAN.

Order of letters.— In all these the order of the Sanskrit alphabet is followed.

1. ARYAN.

nās-, nose, 294. √ *vadh*, bring, 166, 248. *santi*, they are, 303.

2. SANSKRIT.

aksi-, the eye, 5, 56, 96, 110. agni-, fire, 1, 82. aigāra-, charcoal, 1, 3, 82, 226, 229, 324. aigari-, a finger, 1, 20, 82. aiguli-, a finger, 1, 20, 82, 244, 245, 246. auda-, an egg, 186. antar, within, 1, 179, 226. *andra-, an egg, 187. asva-, a horse, 319. asti, he is, 304.

 $\bar{a}tman$ -, self, 10, 131, 173. $\bar{a} + \sqrt{n\bar{i}}$, bring, 4, 169.

ās-, mouth, 3. āsya-, mouth, 3, 313, 324, 327. , i, ēti, go, 13, 15. (*is, isati*, impel, 37, 262, 285. upa-visati, he sits, 27, 191, 273. ustra-, a camel. 20, 292, 302. rksa-, a bear, 35, 56. rsabha-, a bull, 36, 209, 285. ē-ka-, one, 37, 47. *ēti*, he goes, 13, 15. ēvam, so, 260. ēsati, he impels, 37, 262, 285. ka-, who?, 47. / kar, do, make, 1, 47, 51, 226. karna-, an ear, 1, 47, 230, 325. karman-, a work, 8, 325. kasta-, trouble, 299. kukkuta-, a cock, 17, 52, 115. kumāra-, a boy, 219. hrkavāku-, a cock, 31, 47, 248, 255. krta-, done, made, 226, 227, 234. kēśa-, hair, 37, 48, 271. kraya-, sale, 54. kröda-, breast, 44, 54, 121. khara-, an ass, 1, 61, 226. / khād, eat, 4, 61, 154. khura-, a hoof, 20, 61, 226, 328. gardabha-, an ass, 1, 68, 209, 235. qav-, ox, cow, 44, 68. gāna-, singing, 8, 68, 172. qō-, ox, cow, 44, 68. götra-, a family, 138, 141. grāma-, a village, 9, 75, 76, 211. qhana-, solid, 5, 8, 78, 168. ghōta-ka-, a horse, 44, 78, 115.

 \sqrt{car} , go, graze, 85, 226, 325. $c\bar{v}\dot{d}\dot{l}$ - $k\ddot{a}$, a top-knot, 20, 85, 120. \sqrt{cyav} , move. 269, 270.

chagala-, chagalah, a he-goat, 74, 95, 243. chēla-, a goat, 94, 243.

 $j\bar{a}yat\bar{v}$, he is born, 43, 98. $j\bar{a}y\bar{a}$, a wife, 43. $jihv\bar{a}$, the tongue, 13, 98, 823. $\sqrt{j\bar{v}v}$, live, 98.

tata-, a father, 1, 125. *tāta-*, a father, 125. *tārā*, a star, 3, 125.

 $\begin{array}{l} dam da , a \mbox{ staff, a horse, 8, 150.} \\ dad \bar{a}ti, \mbox{ he gives, 6, 150, 166.} \\ dad h \bar{a}ti, \mbox{ he gives, 6, 150, 166.} \\ danta, \mbox{ a tooth, 1, 150, 179.} \\ da \dot{s}a, \mbox{ ten, 153, 264, 268.} \\ \sqrt{d\bar{a}}, \mbox{ dad} \bar{a}ti, \mbox{ give, 6, 150, 166.} \\ d \bar{a}ru-, \mbox{ wood, 229.} \\ d \bar{i}vasa-, \mbox{ a day, 2, 6, 8, 19, 294.} \\ d \bar{i}rgha-, \mbox{ long, 78, 152, 153, 157, 325.} \\ d a h itar-, \mbox{ a day ten, 81, 150, 226.} \\ \sqrt{d\bar{a}}s, \mbox{ see, 131, 153, 264.} \\ d r_8/a-, \mbox{ seen, 31, 32, 153, 291.} \\ d r_8/a-, \mbox{ dor, 6, 160, 161, 226 (bis).} \end{array}$

√ dhā, dadhāti, place, put, 165, 166.

nanā, mother, 169. \sqrt{nas} , nasyati, perish, 2, 169, 281. nasta-, nose, 2, 169, 299. nāsā, nose, 4, 169. nāsi-kā, nose, 4, 6, 19, 169. nitya-, continual, 135. nisīdati, he sits, 18, 169. $\sqrt{n\bar{z}}$, nead, 4, 169. $\sqrt{n\bar{z}}$, nrtyati, dance, 31, 135, 169, 235. paksin-, a bird, 55, 188. panthan-, a path, 184. parna-, a feather, 325. ✓ paś, paśyati, see, 2, 188, 267, 281. putra-, a son, 17, 20, 137, 141, 188. puspa-, a flower, 22, 188, 293. prcchati, he asks, 11, 188. prstha-, the back, 188. / prach, prechati, ask, 11, 188. pravat., the slope of a mountain, 127, 130, 255. prēsita-, sent, 37, 195, 285. bidāla-, a cat, 19, 120, 198, 246. bubhuksā, hunger, 20, 96, 202, 208. bhaginī, sister, 170, 207. $\sqrt{bh\bar{u}}$, become, 198. bhrātar-, a brother, 3. manuja-, a man, 1, 169, 211. mänusa-, a man, 1, 169, 211, 285. manusya., a man, 6, 169, 211. mantra-, speech, 180. √ mar, die, 211, 226. māsa-, a month, 3, 211, 294, 298. mukha-, face, 17, 20, 61, 96, 211, 326. mrga., an animal, 68. mrta-, dead, 226, 227, 234. \sqrt{ya} , go, 220. rāpa-, silver, 11, 17, 20, 188, 191. / vat, share, divide, 1, 113, 248. √ vaµt, share, divide, 113, 248. vādya-, music, 156, 250. vāla-, hair, 3, 243, 248. vimsati-, twenty, 264, 268. √ viś, enter, 27, 273. siras-, the head, 14, 226, 294. sīrsa-, the head, 13, 240, 264. śun-, a dog, 169, 319.

śuska-, dry, 267, 288, 289. √ *śru, śruōti*, hear, 169.

santi, they are, 304.
sūrya-, the sun, 18, 20, 26, 221, 226, 238, 239, 294, 327.
strī, a woman, 13, 18, 141, 305.
snāta-, bathed, 299.
sva-, self, 65, 255.
svarņa-, gold, 230, 255, 316.
svasār-, a sister, 18, 229, 294, 316.

hasta-, a hand, 8, 299, 304. hrdaya-, the heart, 235, 320.

3. Shāhbāzgarhī.

agrabhuti-, first-born, 75. atha-, eight, 291. ata-, self, 10. anuśaśanam, teaching, 297. anusocanam, sorrow, 271. abhisita-, anointed, 286. arabhati, he slaughters, 246. arabhiyisu, they were slaughtered, 286. istri-, a woman, 18.

ku, verily, 62.

diyadha-, one and a half, 161. nataro, grandsons, 194.

padham, assuredly, 199. maka-, Magas, 68, 69. manuśa-, a man, 285.

ycsu, in whom, 286. *yo*, thus (*īvam*), 260. *rocetu*, they may see, 246. *vaṣa-*, a year, 240. *vutu-*, sown, 262.

samacariya-, impartiality, 271. spasunam, of sisters, 319.

hia, here, 324. *hida*, here, 324. *hediśa-*, of this kind, 324.

4. PRAKRIT.

appa-, self, 10. dhīā, daughter, 81, 150, 164. dhīdā, daughter, 81, 150, 164. √ pucch, ask, 11. pucchai, he asks, 188.

5. Paiśācī,

kasata-, difficulty, 299. tittha-, seen, 32. sināta-, bathed, 209.

6. Bihārī.

niti, continual, 185.

7. HINDĪ (HINDŪSTĀNĪ).

ăkh, eye, 110. √ khā, eat, 154. cha, six, 284.

8. LAHNDA.

 $dh\bar{\imath}$, daughter, 228. $dh\bar{\imath}r.\bar{\imath}$, daughters, 228. $\sqrt{mar\bar{\imath}c}$, be beaten (*Thali*), 98. $\sqrt{mar\bar{\imath}j}$, be beaten, 98. \sqrt{rarr} , ery out, 228.

9. Sindhī.

 $dd\tilde{a}d^{u}$, a bull, 8. nit^{u} , continual, 135. mantru, a spell, 180. mandru, a spell, 180.

C. ERANIAN AND ARMENIAN.

1. OLD PERSIAN.

 $adi + \sqrt{sta}$, stand up, 300. $ava + \sqrt{sta}$, stand up, 20, 300, 302, 303. dasta-, a hand, 8, 150, 299, 303. \sqrt{sta} , stand, 20, 300, 301, 302, 303. \sqrt{siyav} , go, 255, 269, 270.

2. Avesta.

[Order of letters.— $a, \bar{a}, c, \bar{c}, \bar{o}, o, \bar{o}, \bar{a}, i, \bar{i}, u, \bar{u}, \bar{k}, g, \chi, \gamma, c, j, t, d, \theta, \delta, p, b, f, w, n, \dot{n}, \tilde{n}, m, y, v, r, s, z, \check{s}, \check{z}, h, \chi^{v}$.]

 $a\bar{v}va$ -, one, 37, 38, 259. $ap pr pn\bar{a}yu$ -, a youth, 9, 172, 188, 218, 226. $angu \bar{s}ta$ -, toe, 82, 262, 276. antarp, within, 1, 38, 40, 179, 226, 229, 324. \sqrt{ay} , go, 31, 262.

ayarə-, day, 8, 9. ast-, bone, 299. aspa-, horse, 1, 310, 319. asman-, heaven, 312. aši-, eye, 5, 56, 110, 269, 270, 327. azəm, I, 105, 108.

 $\bar{a} + \sqrt{ay}$, come, 13, 262. $\bar{a}\theta r$ -, fire, 6, 142, 328. $\check{a}p$ -, water, 3, 8, 10, 191.

√ i, go, 13, 220.

uštra-, eamel, 17, 18, 20, 141, 275, 279.

ka-, who ?, 47.
kata-, a grave, 48, 125.
√ kar, do, make, 1, 6, 47, 50, 51, 226.
karəna-, ear, 1.
kərəta-, done, 234.

gaoša-, ear, 45, 46. găv-, ox, 11, 41, 44, 68. χara -, ass, 1, 61, 226. χšvaš, six, 67, 255, 274. canwārō, four, 148. Jear, go, 85, 226, 325. cvant-, how much ?, 90, 199, 325. $\sqrt{j\bar{\imath}v}$, live, 98. $j(\tilde{\imath})vant$ -, alive, 257, 258. jvant-, alive, 257. tiyri-, arrow, 76. dačūiti, he gives, 166. da&ati, he puts, 165, 166. dantan-, tooth, 1, 150, 173, 179. $\sqrt{d\tilde{a}}$, give, 6, 150, 153, 155, 166, 195. /da, put, 165, 166. $du\gamma \delta ar$ -, daughter, 80, 81, 226, 229. dūra-, far, 17, 20, 150, 226. dva-, two, 163. dvar-, door, 6, 160, 161, 226 (bis). θrā μō, three, 141, 221. pāča-, foot, 167, 188. pañca, five, 87, 112. *parant-, bird, 188. paršti-, the back, 5, 188, 241, 242. /pərəs, ask, 11, 188. puθra-, son, 17, 20, 137, 141, 188. \sqrt{bav} , become, 198. bareša-, a horse's mane, 240. būza-, a goat, 25, 105, 201. brātar-, a brother, 3, 144, 203.

 $fra + \sqrt{d\bar{a}}$, give, 153, 155, 195.

naman-, name, 212. nišhičaiti, he sits, 13, 169, 265, 272.

mai∂ya-, middle, 168.
√mar, die, 211, 226.
māh-, moon, month, 211, 298, 321.
mərəγa-, a bird, 12, 68.
mərəta-, dead, 234.

vaēn-āmi, I see, 172, 248. vāra-, rain, 248.

sarah-, head, 226, 294.
stawra-, firm, 18, 226, 262, 303.
star-, a star, 3, 18, 299, 303, 325.
staora-, a draught animal, 18, 226, 299.
span-, dog, 169, 255, 310, 319.
√srav, hear, 169, 315.

zasta-, hand, 8, 299, 303. zərəd-, heart, 105, 154, 229, 235.

√šav, go, 255, 269, 270.

hizū-, tongue, 105, 250. huška-, dry, 289.

 χva - $t\bar{v}$, of oneself, 65, 255. $\chi^{*}a\dot{n}har$ -, sister, 229.

3. PAHLAVI.

ēv-ak, one, 37, 47. *kat-ak*, house, 125.

4. Armenian.

dustr, daughter, 80.

5. BALŌCĪ.

 $g\bar{o}$ - χ , an ox, 44. phut, the back, 241.

GHALCAH

6. GHALCAH (l'Alcah).

Order of Letters.—In this and all the following Indexes the order of the English alphabet is followed as regards consonants. Vowels are neglected in fixing alphabetical order.

\$\sqrt{car, do, make, 6, 50.\$

 $\chi \ddot{u} i$, sister, 229. χur , ass, 61.

ndn, mother, 169. *nung*, a name, 212.

piš, a cat, 19, 190, 265. pötr, a son, 141. strēi, a woman, 13, 42, 141. šāč, six, 67. $v\bar{\iota}$ -k, water, 8, 10. yir, sun, 8. √yav, eat, 220. 6e. Yagnöbĩ. guš, an ear, 46. 6F. YÜDYÄ. išcuro, a camel, 141. cšīr, four, 149. $\gamma \bar{u}$, an ear, 46. los, ten, 153. pūsr, head, 30, 188. piśco, behind, 242. stāre, a star, 3. viza, a she-goat, 201. $y\bar{u}r$, fire, 6. 7. Ossetic. čippar, four, 148. čuppar, four, 148. 8. PERSIAN. andar, within, 1, 179. andarūn, inner apartments, 229. anguli, a finger (Kāšānī), 1, 20. angišt, charcoal, 1. angušt-ar, a finger-ring, 1, 82, 262, 275.

asbān (dial.), heaven, 312. asp, horse, 1. ustör, horse, 18. birādar, a brother, 3, 203. $b\bar{e}r$ - $\bar{u}n$, outside, 6. buš, the mane of a horse, 240. $du\chi tar$, a daughter, 81. dandān, a tooth, 1, 179. firod, before, 127. kafš, a shoe, 197. $\chi \bar{a} y \bar{i} dan$, to eat, 154. lagam, a bridle, 69. lavand, a volunteer, 185, 243, 248, 255. mādar, a mother, 153, 155, 216, 244. nana, a mother, 169. $p\bar{a}$, a foot, 167, 188. pisar, pusar, a son, 26. pušak, a cat, 19, 265. pušt, the back, 5, 241. rīš, beard, 266. sitāra, a star, 3, 18. šunūdan, to hear, 315. $t\bar{i}r$, an arrow, 76. yak, one, 37. 8A. KURD. awe, water, 8. $du\chi t$, a daughter, 81. ditt, a daughter, 81.

gō (Tūr Kurd), who, 49. nēh, nine, 256.

Sb. Samnānī.

ā, I, 108. u, I, 108.

9. Pastō.

 $\bar{a}ba$, water 8. $\bar{a}\chi$, camel, 20. ata, eight, 291. $ha-\gamma^a$, he, 48. -maī, moon, 298, 321. $my\bar{a}št$, a month, 211. $l\bar{u}r$, a daughter, 81. las, ten, 153. šta, there is, there are, 303. $vast^al$, to bring, 166. vuc, dry, 289. zr^a , heart, 237.

D. OTHER LANGUAGES.

1. ARABIC.

asbāb, property, 199. bābat, concerning, 199. qaht, famine, 51, 125. tabīb, a physician, 199.

2. Burušaskī.

comar, iron, 85, 211. chomar, iron, 85, 211.

3. TIBETAN.

glang, ox, 44. mgrom, grun, žun, feast, 228.

4. GREEK.

 $Ka\sigma\pi\epsilon\hat{i}\rho a$, Kaśmir, 312.

ADDENDA ET CORRIGENDA

DURING the eighteen months that this little book has been passing through the press some articles have appeared which incidentally throw light on the Pisaca question. Monsieur Senart's paper on 'Vajrapani dans les Sculptures du Gandhâra,' in vol. i. of the Actes du XIVe Congrès International des Orientalistes, contains many suggestive passages. Vajrapāņi was the chief of the Yaksas, who, in Buddhist legends, correspond to the Piśācas of our stories (see my article in the J.R.A.S. referred to in the footnote to p. 2). According to Yuan Chwang (Watters, i., 229) Vajrapāni conquered Apalāla, the Nāga of the source of the Swat river. This is a favourite subject of sculpture in the Gandhara country. It is unnecessary to point out that the Naga inhabited the country of what I call the Modern Piśācas. The Kaśmīr legend of the conflict between the Piśācas and Nāgas is given above on p. 2.

On p. 461 of the J.R.A.S. for 1906, Mr. Thomas, in dealing with the town of Kāpiša at the southern foot of the Hindū Kush, draws attention to the fact that $Kapiš\bar{a}$ is the name of the mother of the Piśācas, who are called $Kapiš\bar{a}putra$ and $K\bar{a}pis\bar{e}ya$.

Monsieur Sylvain Lévi, on p. 4 of the fifth series of 'Notes Chinoises sur l'Inde,' reprinted from the Bulletin de UÉcole Française d'Extrême Orient, gives an account of a Māhātmya of Khotan (the Sārya-garbha sātra of the Mahāsaimnipāta). Here the Yakṣas (i.e., Piśācas) are again brought into prominence as superseding the Nāgas. The latter refuse to accept charge of the twenty holy places of Buddhism. The Yakṣas then accept charge of nineteen, the twentieth, $G\bar{o}$ śriga, in Khotan, being left to the Nāgas.

In the text I have forgotten to draw attention to the fact that the Šīnā superstitions are full of a belief in demons, whom they call Yach. There is also a belief in fairies, who often take the form of Nāgas and Nāginīs (see Biddulph and Leitner passim). I may mention that this belief in Nāginīs extends into Western Tibet, where, according to Mr. Franckė, they are called Klu-mo.

Finally, although I have not anywhere referred to the later Sanskrit traditions locating the Piśācas only in Central India, I do not pretend to be ignorant of the fact of their existence, especially in the Kathā-sarit-sāgara. So far as I am aware, this tradition is not supported by any facts hitherto brought forward, linguistic or otherwise. Markandeva mentions no less than eleven kinds of Paiśaci Prakrit spoken in widely separated parts of India (see Pischel, p. 27). Amongst them he mentions two-the Kaikēya and the Vrācada of North-Western India-and they are sufficient for my purposes. I do not deny that in later times there may have been people called Piśācas, or even Pisaca colonists, in other parts of the country, but that opens out too wide a question to be discussed here. I may, however, mention that the Konkani dialect of Marāthī has certain phonetic peculiarities which are characteristic of Modern Paisaci (see vol. vii. of the 'Linguistic Survey of India,' pp. 168, 169). Könkani is probably the only modern survival of the old Saurastri Prakrit.

The following errata should be corrected in the text; most of them are letters broken after the final proofs had been passed for press:

Page 6, line 3 from below, for Tirāh read Tīrāh. Page 12, line 21 from above, for *st* read *st*. Page 13, line 22, for S. read Ś. Page 16, line 4, for $j\bar{a}rlm$ read $j\bar{a}rlm$.

Page 18, line 20, for kröda read kröda-.

Page 27, line 14, for $yau \gamma \bar{a}$ read $yau \gamma \bar{a}$.

Page 29, line 19, for kham-ta read kham-ta.

Page 30, line 15, for pišo ud-ik read pišo ud-ik.

Page 30, line 18, for *nas*- $k\bar{a}$ r read *nas*- $k\bar{a}$ -r.

Page 30, line 19, for $nath\bar{u} r$ read $nath\bar{u}$ -r.

Page 32, table, opposite B., for $-k\hat{e}$ read $-k\tilde{e}$.

Page 32, table, opposite Kś., read $-kyut^u$.

Page 34, line 2, for $-\tilde{a}$ read $-\tilde{a}$.

Page 34, line 18, for $-t\tilde{a}$ read $-t\tilde{a}$.

Page 35, line 23, for dhīrī read dhīrī.

Page 37, last line of table, for visi read visi.

Page 40, line 27, for cipu read $cip\overline{u}$.

Page 42, last line of table, for $z\bar{a}$ read $z\bar{a}$.

Page 43, table, opposite Gār., for ase read ase.

Page 51, table, opposite What?, for ke read $k\bar{e}$.

Page 51, table, opposite What?, delete keh, which means ' why?' not 'what?'

Page 57, table, opposite B., for $v\bar{\imath}$ -r read $v\bar{\imath}$ -r.

Page 57, table, opposite P., for han ik i read han-ik-i.

Page 57, line 5 from below, for vi-amis read vi-amis.

Page 59, line 9 from below, for \tilde{r} read \tilde{r} .

Page 63, line 4 from above, for woth read woth.

Page 64, line 2, for *di-kti* read *di-ktī*.

Page 65, line 9 from below, for G.M. $q\bar{a}$ read G. $q\bar{a}$, M. $q\bar{a}$.

Page 71, line 10 from above, for $kuk\bar{u}$ read $k\bar{u}k\bar{u}$.

Page 71, line 10, for kukō read kūkō.

Page 71, line 21, for Sg. read Sg.

Page 71, line 23, for $d\bar{a}$ read da.

Page 72, line 11 from below, for *šiu* read *šiu*.

Page 73, line 12 from above, for S. read S.

Page 74, line 2 from below, for $c\bar{o}\gamma$ read $c\bar{o}\gamma$.

Page 75, line 1 from above, for šô-ākzo read šõ-ākso.

Page 76, line 8 from below, for $t\tilde{a}$ read $t\tilde{a}$.

Page 78, line 4 from below, for *pchc* read *pche*.

Page 83, line 12 from above, read $n\bar{a}sik\bar{a}$.

Page 84, line 15, for $\bar{a} > a\bar{1}$ read $\bar{a} > \bar{a}\bar{1}$.

Page 84, line 18, for o read ö.

Page 84, line 20, for Ps. read Ps.

Page 84, line 20, for \check{a} read \hat{a} .

Page 86, line 11, for i=i read $i=\overline{i}$.

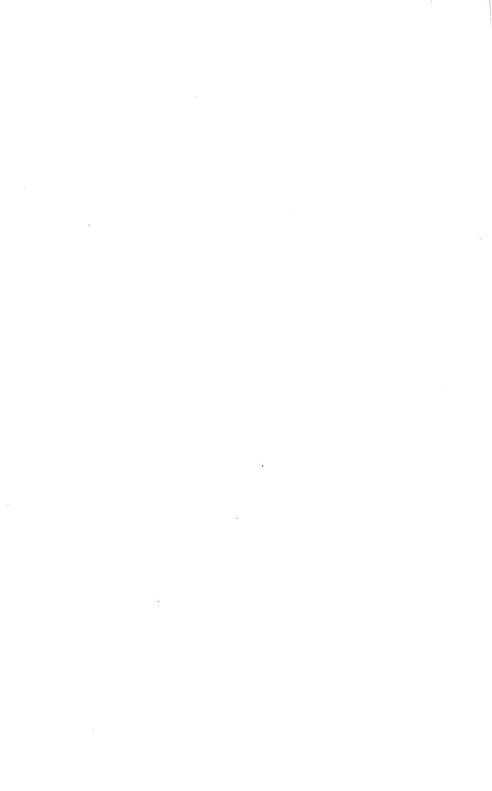

Page 86, line 19, for *čhri-qa* read *čhrī-qa*.

Page 88, line 11, for G. read V.G.

Page 91, line 18, for ater read ater. Page 92, line 10, for $\overline{\mathbf{o}} > \overline{\mathbf{i}}$, \mathbf{e} read $\mathbf{\breve{o}} > \overline{\mathbf{i}}$, $\mathbf{\breve{e}}$. Page 92, line 13, for ō read ŏ. Page 93, line 22, for cher-am read cher-am. Page 94, line 2, for $k\bar{u}k\bar{u}r$ read $kuk\bar{u}r$. Page 94, line 7, for kr>kr, gr read kr=kr>gr. Page 94, line 19, for izi read izi. Page 95, line 3, for $i\check{z}\check{\imath}$ read $i\check{z}\check{\imath}$. Page 96, line 11 from below, read $g\tilde{o}\check{s}^{a}$ -g. Page 100, line 1 from above, for c > c read c = c. Page 100, line 9 from below, for No. 249 read Nos. 199, 249. Page 102, line 3 from below, for $\tilde{a}kh$ read $\tilde{a}kh$. Page 105, line 11 from below, for viči, viši read viči, viši. Page 107, line 1 from above, for Nos. 88, 228 read Nos. 88, 228, 307. Page 108, line 2, after 'four' insert 'and Nos. 249, 323.' Page 113, line 2 from below, for 'fact.' read 'fact,'. Page 117, last line, for ö read õ. Page 118, line 1, for $gura\bar{o}\gamma$ read $gurd\bar{o}\gamma$. Page 124, line 11 from below, for $anguj^u$ read $anguj^{\tilde{u}}$. Page 126, line 13 from below, read lawant. Page 130, line 13 from below, read \sqrt{es} . Page 133, line 16 from below, for st>st>st read st>st>št. Page 134, line 5 from above, for S. read S. Page 139, under ANAPTYXIS, add 'i, 18.' Page 141, line 8, for 2 read 2. Page 143, line 11 from below, for Sīnā read Sīnā. Page 155, headline, for KALĀSĀ read KALĀŠĀ. Page 155, line 6, for š er read s er. Page 155, line 16, for Kāśmīr read Kāśmīrī. Page 166, line 2, for $\bar{a}\bar{i}$ read $\bar{a}\bar{i}$. Page 169, line 1, for \tilde{su} read \tilde{sn} . Page 172, line 5, for *ãgušto* read *ãgušto*. Page 172, line 11, for $a v \overline{i}$ read $a \cdot v \overline{i}$. Page 172, last line, for $\check{c}\tilde{n}$ read $\check{c}\tilde{n}$. Page 175, line 15 from below, for krta- read krta-. Page 176, line 13 from above, for danda read danda-

Page 176, line 8 from below, for nas read nas.
